Cachexia and Wasting Stefan D. Anker, Giovanni Mantovani, Akio Inui, John E. Morley, Filippo Rossi Fanelli, Daniele Scevola, Michael W. Schuster, Shing-Shing Yeh, 2007-10-06 Cachexia may well represent the flip side of the tremendous achievements of modern medicine The aim of this volume written by world renowned scientists is to provide the best available evidence on the pathogenesis clinical features and therapeutic approach of cachexia and to facilitate the understanding of the complex yet unequivocal clinical role of this syndrome that truly represents a disease or more likely a disease within other different diseases

Nutrition and Immune Function Philip C. Calder, 2002-01-01 This text provides a review of the roles of specific nutrients in maintaining the immune response and host protection against infection It also considers the influence of various factors such as exercise and ageing on the interaction between nutrition and immune function

Military Strategies for Sustainment of Nutrition and Immune Function in the Field Institute of Medicine, Committee on Military Nutrition Research, 1999-06-13 Every aspect of immune function and host defense is dependent upon a proper supply and balance of nutrients Severe malnutrition can cause significant alteration in immune response but even subclinical deficits may be associated with an impaired immune response and an increased risk of infection Infectious diseases have accounted for more off duty days during major wars than combat wounds or nonbattle injuries Combined stressors may reduce the normal ability of soldiers to resist pathogens increase their susceptibility to biological warfare agents and reduce the effectiveness of vaccines intended to protect them There is also a concern with the inappropriate use of dietary supplements This book one of a series examines the impact of various types of stressors and the role of specific dietary nutrients in maintaining immune function of military personnel in the field It reviews the impact of compromised nutrition status on immune function the interaction of health exercise and stress both physical and

psychological in immune function and the role of nutritional supplements and newer biotechnology methods reported to enhance immune function The first part of the book contains the committee's workshop summary and evaluation of ongoing research by Army scientists on immune status in special forces troops responses to the Army's questions conclusions and recommendations The rest of the book contains papers contributed by workshop speakers grouped under such broad topics as an introduction to what is known about immune function the assessment of immune function the effect of nutrition and the relation between the many and varied stresses encountered by military personnel and their effect on health

Dietary Components and Immune Function Ronald Ross Watson, Sherma Zibadi, Victor R. Preedy, 2010-07-30 Dietary Components and Immune Function focuses on immune modulation immune mediated disease resistance immune changes due to AIDS immune modulated cancer therapy and autoimmune diseases as modified by dietary supplement bioactive foods and supplements The potential value of such approaches in maintaining wellness and preventing disease are addressed by examining their effects in vitro and in vivo on innate and adaptive immune responses Emerging fields of science and important discoveries relating to early stages of new nutraceuticals in cancer prevention prior to clinical trials are also covered This volume represents a single source of material related to nutraceuticals and their constituents as they relate to cancer therapy and prevention As such the book will be essential reading for nutritionists pharmacologists health care professionals research scientists cancer workers pathologists molecular or cellular biochemists physicians general practitioners as well as those interested in diet and nutrition in disease resistance via immune regulation

Nutritional Support in Cancer and Transplant Patients

Rifat Latifi, Ronald C. Merrell, 2001-08-01

Much has been learned great developments have occurred and so much has been written about cancer and transplantation in the last 2 3 decades Yet to the author s knowledge no monograph or book has addressed nutrition support of cancer and transplant patients together

Experts from the around the world have addressed the nutrition support in cancer and transplant patients in this unique monograph

The book is divided in two parts

Part I deals with nutrition support in cancer patients including the specific role of nutrition on immunity cancer cachexia and the role of different substrates

Part II addresses nutrition in transplant patients

The first two chapters deal with the immunologic role of nutrition and cancer cachexia

Chapter 3 elegantly and extensively reviews the nutritional implications its biochemistry and the role of one of the most studied amino acids in clinical practice

Glutamine

This is followed by two chapters of nutrition support of patients with head and neck cancer and nutrition support of patients with gastrointestinal cancer

Chapters 6 and 7 review the role of total parenteral nutrition on perioperative nutritional support and cell cycle kinetics

While the plasma amino acids profile in cancer patients and the role of L methionine is addressed in great details in Chapters 8 and 9 the role of ornithine alpha ketoglutarate administration on surgical trauma and cancer bearing patients is reviewed on Chapter 10

Part Two of this book starts with the review of nutritional support in small bowel

transplantation This Section elegantly describes the process of recovery of small bowel from the ischemia and preservation weaning from parenteral nutrition support and establishment of normal diets In addition monitoring techniques and the nutritional complications of surgical intervention is described Chapter 12 on liver failure and liver transplant patients addresses hepatic encephalopathy and the role of certain amino acids nutrition assessment techniques and metabolic changes following liver transplantation Furthermore it offers some practical advice on how to establish nutrition support routes in these very ill patients Nutrition support in renal transplantation including metabolic abnormalities in renal failure are described on Chapter 13 This monograph ends with a Chapter on total parenteral nutrition in bone marrow transplant patients
