Prostaglandins, Leukotrienes, and the Immune Response John L. Ninnemann, 1988-09-30 This study looks at the way the products of arachidonic acid metabolism are active both in normal and abnormal immune responses While some of the fundamental issues such as whether lymphocytes are capable of producing prostaglandins and leukotrienes are still hotly debated the evidence is overwhelming that many specific immunological problems and disease states are associated with alterations in the normal balance of arachidonic acid metabolism This book provides a review of the history and chemistry of the arachidonic acid cascade as well as an exhaustive survey of the literature concerning the interaction of arachidonic acid metabolites with cells of the immune system The author also presents and discusses the evidence demonstrating prostaglandin and leukotriene participation in response to injury and in malignancy tissue and organ rejection rheumatoid arthritis autoimmunity and allergy **Advances in Prostaglandin, Leukotriene, and other Bioactive Lipid Research** Zeliha Yazici, Giancarlo C. Recent Advances in Prostaglandin, Thromboxane, and Leukotriene Research Helmut Sinzinger, Bengt Samuelsson, Sir John R. Vane, Rodolfo Paoletti, Peter Ramwell, Patrick Y-K Wong, 2013-11-11 The International Symposium on Prostaglandins and Related Compounds first held in Vienna 1972 revisited the city after 24 years for the 10TH Symposium For the many researchers working in this multi disciplinary field it was an opportunity to exchange their experiences and share new data with colleagues from all around the world This scientific exchange was largely encouraged by the unseasonably cold and rainy weather For the first time there was quite a large attendance from the former Communist countries Eugene Garfield prepared a key note address delivered during the meeting The Scientist 1996 12 reviewing the contribution of the Nobel Laureates U S von Euler l R Vane S K Bergstrom and B I Samuelsson discussing the relevance of the more than 40 000 papers in this area published since 1991 Overall there is still a rapidly growing interest and in particular a great variety of clinical applications of this family of compounds which were discussed in detail during the meeting Beside the lectures there were 19 workshops covering nearly all the topics of key interest All the speakers were invited to prepare a manuscript which has resulted in the volume now in your hands Special thanks to Dr Patrick Wong and the new publisher of this series who helped to publish the proceedings in the usual

Prostaglandin Inhibitors in Tumor Immunology and Immunotherapy Jules E. Harris, Donald P. Braun, Kenning M. Anderson, 2024-12-06 This book provides an updated overview of eicosanoid metabolism It also presents a timely discussion of eicosanoid metabolism in the process of tumor cell metastasis in chemoprotection and radioprotection associated with cancer therapy and in cell differentiation The book focuses on the role of eicosanoids in the immunology of malignant disease This includes how various immune cell populations in cancer are affected by the secretion and action of various eicosanoids and metabolites of eicosanoids and how these processes may be affected by various pharmacological manipulations and interventions to augment anti tumor immunity Head and neck cancer is covered in great detail to illustrate a cancer in humans where these considerations are particularly relevant This important volume demonstrates that the principal factor in cancer patient immunologic deficiency is related to excess secretion by monocytes of prostaglandins
