Protecting The Periphery:

Protecting the Periphery Susan Baker, Kay Milton, Steven Yearley, 2019-03-22 First published in 1994 In *Protecting the Periphery* the editors present a series of papers revealing the impact of EU policies on environmental quality in regions at the edge of the European Union and in those lying just outside it In many cases these regions contain habitats and landscapes of international importance they have also often escaped some of the environmental damage caused by industrialization But as the papers reveal attempts by the EU to safeguard these environmental benefits are often contradicted by the EU's own development policies bringing air pollution from new roads contamination from new industries and leading to habitat destruction from modern agricultural practices and increases in tourism As the Union pushes for the deepening of the integration process including completing the internal market the pressures on the periphery's environment are increasing Furthermore the efforts of the periphery to catch up economically with the developed core can often heighten the tension between economic considerations on the one hand and the need for environmental protection on the other The studies in this book examine the ambivalent responses to EU environmental policy among policy makers and environmentalists in the periphery Both the willingness as well as the capacity of the periphery to protect its environmental heritage are explored In particular the administrative capacity institutional arrangements political culture as well as economic development needs are taken into account in an examination of the nature of the periphery's response to and implementation of Union environmental policy The book will appeal to policy makers and academics in the countries of the European periphery and to analysts of European policy making everywhere especially those concerned with environmental policy and politics

Tourism and Conservation-based Development in the Periphery Trace Gale-Detrich, Andrea Ednie, Keith Bosak, 2023-10-06 This open access book applies a social ecological systems SES lens to conservation based development in Patagonia bringing together authors with historical contemporary and future oriented perspectives in order to increase understanding of the social and environmental implications of nature based tourism and other forms of conservation based territorial development By focusing on Patagonia as a region and its various forms of conservation based development this book contributes one of the first collections of South American based lessons and will be valuable to researchers and practitioners both locally and around the world seeking to better understand complex interconnections between social and ecological environments and pursue a similar path to resilience and sustainability

Must We Defend Nazis? Richard Delgado, Jean Stefancic, 1999-11-01 In *Must We Defend Nazis* Richard Delgado and Jean Stefancic set out to liberate speech from its current straight jacket Over the past hundred years almost all of American law has matured from the mechanical jurisprudence approach which held that cases could be solved on the basis of legal rules and logic alone to that of legal realism which maintains that legal reasoning must also take into account social policy common sense and experience But in the area of free speech the authors argue such archaic formulas as the

prohibition against content regulation the maxim that the cure for bad speech is more speech and the speech act distinction continue to reign creating a system which fails to take account of the harms speech can cause to disempowered marginalized people Focusing on the issues of hate speech and pornography this volume examines the efforts of reformers to oblige society and law to take account of such harms It contends that the values of free expression and equal dignity stand in reciprocal relation Speech in any sort of meaningful sense requires equal dignity equal access and equal respect on the parts of all of the speakers in a dialogue free speech in other words presupposes equality The authors argue for a system of free speech which takes into account nuance context sensitivity and competing values such as human dignity and equal protection of the law Manufacturers' News ,1918 **Official Gazette of the United States Patent Office** USA Patent Office,1889
