Protection Of Coastal Fisheries Under International Law:

Protection of Coastal Fisheries Under International Law Stefan A. Riesenfeld, 1942 *Protection of Coastal Fisheries Under International Law* Stefan Albrecht Riesenfeld, 1971 International Law and Ocean Use Management Lawrence Juda, 2013-02-01 This book places contemporary problems of ocean use management in historical context beginning with the time of Hugo Grotius whose seminal 1609 work *The Freedom of the Seas* was the basis of ocean law for the next three centuries Individual use problems are dealt with in detail and include overfishing migrating fish stocks and fish wars oil drilling deep sea mining and marine pollution Throughout the author notes the need to seek solutions in ocean management from a more integrated perspective Emphasis is placed on the United Nations Conference on the Law of the Sea and the resulting agreements This book therefore presents a unique breadth of view which will make it salient to policy makers diplomats scholars and ocean users *International Law Studies* Anthony D'amato, 2023-12-18 Reader beware You are about to be challenged and drawn into a realm of unorthodox ideas often stated provocatively From the Foreword The field of international law is blessed with a broad range of high quality scholarship But a truly fresh approach and real original ideas always provide a welcome addition Any serious player in the international law world will seek out these rare challenges to classic scholarship *International Law Studies* is one of these unique works In this second volume of collected papers the author addresses environmental law human rights international criminal law foreign relations law the intersection of political science and international law and the study and practice of international law The insightful and probing nature of the author's wholly new analysis of these critical topics will intrigue any international law scholar or practitioner To miss *International Law Studies* is to shut out one of the most thought provoking voices in the field This is the second volume in a series of collected papers International Control of Sea Resources Shigeru Oda, 2021-11-15 The International Law of Fisheries Douglas M. Johnston, 2023-09-20 *Fisheries Regulations Under Extended Jurisdiction and International Law* William T. Burke, 1982-01-01 This paper discusses two of the problems associated with the changes taking place in the international law of the sea The first of these deals with the transit of fishing vessels through zones of national jurisdiction beyond the territorial sea Transiting fishing vessels have an interest in expeditious transit and the coastal States have an interest in ensuring that the vessel is not fishing within its zone during transit passage This conflict in interest is examined and various alternatives for resolving the conflict are appraised in terms of the international law of the sea The second problem is that of the regulation of fishing for highly migratory species in high seas enclaves beyond national jurisdiction The interests of fishing and coastal States are examined in the light of developments in customary and conventional international law Although the problems discussed are of primary interest to the South Pacific States they are also relevant to other regions of the world International Legal Personality Fleur Johns, 2017-07-05 Who or what is entitled to act on the international plane Where should responsibility for violations of international law lie What sort of entities are capable of possessing international

legal rights What is the status of individuals minority groups non governmental bodies international organisations and animals in the international legal order and how has their status shifted over time International Legal Personality contains fourteen articles that address these and related questions In historical and contemporary writings international lawyers grapple with the nature of legal identity and confront global distributions of authority and responsibility as they explore who or what is a person in the international legal order These essays document the emergence of an international legal order increasingly conceived in terms of patterns and probabilities rather than as the stagecraft of a small company of permanent players

International Control of Sea Resources Shigeru Oda, 1989-03-17 This book provides for the first time in a single publication a collection of basic documents relating to the international law of nuclear energy The series of introductions facilitate the understanding of the documents that nuclear material that nuclear facilities are not subject to attack during armed conflict that nuclear material facilities are not used for military purposes The book is an invaluable reference work for all those working in the field of international nuclear law the regulation of the use of nuclear energy as well as for teachers students of law
