Protection Or Liberalization:

Protection and Liberalization W. M. Corden, 1987-08-04 This paper deals with trade policy issues of particular interest to the Fund. It is motivated both by the revival of protectionist attitudes in the industrial countries and the prevalence of liberalization proposals for developing countries. In view of Fund concerns with the functioning of the International Monetary System and with the individual countries' macroeconomic policy and especially exchange rate issues, relate to protection.

Micro and Small Enterprises in India Keshab Das, 2011-04-26 This book presents a set of analytical and deeply policy oriented articles on the dynamics of growth and performance of micro and small enterprises in India during the period of reforms. It provides fairly detailed analyses of policy changes for the micro and small enterprises sector as well as empirical analyses of performance and efficiency of the unorganised manufacturing sector. It examines a range of emerging and persistent complex issues facing this crucial sector including credit exports trade regulations capacity building subcontracting clustering entrepreneurship and rural industrialisation. Focusing on the constraints facing this sector even during the economic reforms, most of the articles analyse how and why special attention particularly by the state needs to be paid towards enhancing firm competitiveness. Broad basing the benefits of policy interventions to the overwhelmingly present yet left out micro enterprises including rural areas forms an important concern. This volume attempts to critically examine critical areas of intervention that could open up possibilities of developing a strong micro and small enterprises sector in India.

Constituent Interests and U.S. Trade Policies Alan Verne Deardorff, Robert Mitchell Stern, 2010-05-25 The contributors to this volume economists and political scientists from academic institutions the private sector and the Ways and Means Committee of the U S House of Representatives came together to discuss an important topic in the formation of U S international trade policy the representation of constituent interests. In the resulting volume they address the objectives of groups who participate in the policy process and examine how each group's interests are identified and promoted. They look at what means are used for these purposes and the extent to which the groups' objectives and behavior conform to how the political economy of trade policy is treated in the economic and political science literature. Further they discuss how effective each group has been. Each of the book's five parts offers a coherent view of important components of the topic. Part I provides an overview of the normative and political economy approaches to the modeling of trade policies. Part 2 discusses the context of U S trade policies. Part 3 deals with the role of sectoral producing interests including the relationship of trade policy to auto steel textile semiconductor aircraft and financial services. Part 4 examines other constituent interests including the environment human rights and the media. Part 5 provides commentary on such issues as the challenges that trade policy poses for the new administration and the 105th Congress. The volume ultimately offers important and more finely articulated questions on how trade policy is formed and implemented. Salin,2017-09-27 Competition and free trade are both concepts which are absolutely central for the understanding of human societies but are also often the subjects of fears and criticisms It is argued that it is not possible to understand what competition really is without referring to the concept of freedom and that free trade must be understood as the way to expand the scope of competition This book uniquely analyses the two concepts as closely interlinked by approaching them in two parts The first Competition introduces the reader to the traditional competition model and explores the dynamics and range of the term in an authoritative way The second part Free Trade examines the different types of trade and analyses them in a wealth of contexts from customs duties to import quotas With discussions surrounding protectionist arguments politics liberalization and history the author presents an overview of how competition and free trade operate in the real world This book dispels the fears and misunderstandings which have developed around these central pillars of the modern economy and is essential reading for those studying international economics international trade political economy or corporate finance
