Protein Pharmacokinetics and Metabolism Bobbe L. Ferraiolo, Marjorie A. Mohler, Carol A. Gloff, 1992-11-30 Investigation of the pharmacokinetics and metabolism of human proteins has escalated over the last two decades because of the use of recombinant human proteins as therapeutic agents In addition the development and improvement of analytical techniques enabling the detection of minute quantities of proteins in biological matrices have aided this process In assembling this volume we sought to provide a state of the art assessment of the pharmacokinetics and metabolism of protein therapeutics through complete reviews of selected examples A comprehensive review of all protein therapeutics was not attempted the majority of the therapeutic protein classes and crucial scientific issues have been addressed however Therefore we are confident that this volume will provide a useful reference for scientists in this field The volume has been divided into two general parts The first part Chapters 1-3 is composed of general reviews of topics of importance in pharmacokinetic metabolism studies of proteins goals and analytical methodologies effects of binding proteins and effects of antibody induction respectively The second part Chapters 4-8 consists of specific detailed reviews by therapeutic protein class growth factors and hormones cytokines cardiovascular proteins hematopoietic proteins and antibodies respectively The editors are grateful to the contributors for the patience personal sacrifice and perseverance required to complete this volume BoDDE L FERRAILO MARJORIE A MOHLER CAROL A GLOFF ix Contents Chapter 1 Goals and Analytical Methodologies for Protein Disposition Studies Bobbe L Ferraiolo and Marjorie A Mohler 1 Introduction Proteins and Peptides Randall J. Peptide and Protein Drug Delivery Using Polysaccharides Aakanchha Jain, Sonia Malik, 2023-10-05 Peptide and Protein Drug Delivery Using Polysaccharides offers an interdisciplinary discussion of polysaccharides applied in peptide and protein drug delivery. Chapters consider basic biology of different polysaccharides of current interest and their production at pilot and large scale stages by various techniques including but not limited to cell and hairy root cultures. Other sections examine factors affecting polysaccharide absorption, metabolism and excretion in nascent encapsulated or conjugated forms with unique coverage of vaccine absorption, metabolism and drug delivery. A final section considers analytical methods for detection in tissue fluids and homogenates. Accessible figures, tables and graphical abstracts are included throughout to support understanding. Specific polysaccharides discussed for therapeutic purposes include cellulose, hyaluronic acid, heparin, chondroitin, alginate, agar and myrrh, acacia, tragacanth, ghatti gum, chitin, chitosan, starch, glycogen and dextran. Adopts an interdisciplinary approach across biochemistry, molecular biology, pharmaceutical sciences and drug delivery and biotechnological perspectives. Features accessible figures, tables and graphical abstracts across all chapters to support understanding. Examines various polysaccharides of current interest and aspects affecting their absorption, metabolism, excretion and detection.

Pharmaceutical Biotechnology S. William Zito, 1997 The explosion of knowledge in the area of pharmaceutical biotechnology can certainly justify the need for a second edition of this text. While new techniques and topics have been introduced to ensure the content is current, the format of *Pharmaceutical Biotechnology* 2nd Edition has remained essentially unchanged. It provides a clear, concise self-teaching guide to the essentials of pharmaceutical biotechnology. Key topics are covered systematically with self-tests at the end of each chapter, helping the reader acquire a basic fund of knowledge in this important area of pharmacology. While prepared for undergraduate pharmacy students, this self-teaching text also serves the professional needs of all those in drug research, development, administration and government regulation.
