The Debate on the English

Reformation Rosemary O'Day, 2015-11-01 Extensively revised and updated this new edition of *The debate on the English Reformation* combines a discussion of successive historical approaches to the English Reformation with a critical review of recent debates in the area offering a major contribution to modern historiography as well as to Reformation studies It explores the way in which successive generations have found the Reformation relevant to their own times and have in the process rediscovered redefined and rewritten its story It shows that not only people who called themselves historians but also politicians ecclesiastics journalists and campaigners argued about interpretations of the Reformation and the motivations of its principal agents The author also shows how in the twentieth century the debate was influenced by the development of history as a subject and in the twenty first century by state control of the academy Undergraduates researchers and lecturers alike will find this an invaluable and essential companion to their studies

Cultures of Calvinism in Early Modern Europe Crawford Gribben, Graeme Murdock, 2019-11-01 Scholars have associated Calvinism with print and literary cultures with republican liberal and participatory political cultures with cultures of violence and vandalism enlightened cultures cultures of social discipline secular cultures and with the emergence of capitalism Reflecting on these arguments the essays in this volume recognize that Reformed Protestantism did not develop as a uniform tradition but varied across space and time The authors demonstrate that multiple iterations of Calvinism developed and impacted upon differing European communities that were experiencing social and cultural transition They show how these different forms of Calvinism were shaped by their adherents and opponents and by the divergent political and social contexts in which they were articulated and performed Recognizing that Reformed Protestantism developed in a variety of cultural settings this volume analyzes the ways in which it related to the multi confessional cultural environment that prevailed in Europe after the Reformation
