The Natural

and Modified History of Congenital Heart Disease Robert M. Freedom, Shi-joon Yoo, Haverj Mikailian, William G. Williams, 2008-04-15 Exhaustive in its scope this book provides a comprehensive study of the natural and modified history of congenital heart disease Focusing particularly on the discussion of fetal and post natal outcomes the contributors seek to place developments in historical perspective Virtually all surgical and catheter based strategies to enhance outcomes of all forms of congenitally malformed heart are analysed covering the morphology and genetic basis of each particular abnormality and issues that were germane to evolving different therapeutic strategies Using data from the records of the Toronto Hospital for Sick Children contributors highlight the complications of the various forms of therapies and identifies particular risk factors for mortality and morbidity

Nutrition and Heart Disease H.K. Naito, 2012-12-06 Entering the 1980 s coronary heart disease CHD still remains the major cause of death in the United States and ranks second in the world in terms of CHD mortality rates However CHD mortality and morbidity rates in the United States have declined significantly since the 1950 s There are many reasons for this positive and encouraging change one of which is the increasing awareness of the importance of the role of nutrition in health and disease Diet has been identified as an important factor contributing to hyperlipidemia in individuals and populations Dietary modification has become a routine means of treating patients with lipid disorders The relationship between diet and chronic disease is however far from simple and at the present time needs further intensive research Many significant advances have recently taken place in our understanding of the effect of different nutritional components on blood lipids and lipoproteins and on the initiation progression and regression of atherosclerotic processes This symposium The 19th annual meeting of the American College of Nutrition Cardiovascular Disease and Nutrition held at Bloomington Minn on June 1 2 1978 addressed many of the important questions concerning the association of diet and CRD We have not restricted the topic to hyperlipidemia and CHD per se but have considered cardiovascular disease in general This monograph should be of interest to the dietitian nutritionist pediatric clinician cardiologist physicians in general and researchers in the field of cardiovascular disease Herbert K Naito Ph D
