Provinces Of The Sea:

Global City-Regions Allen J. Scott, 2001-01-25 There are now more than three hundred city regions around the world with populations greater than one million. These city regions are expanding vigorously and they present many new and deep challenges to researchers and policy makers in both the more developed and less developed parts of the world. The processes of global economic integration and accelerated urban growth make traditional planning and policy strategies in these regions increasingly inadequate while more effective approaches remain largely in various stages of hypothesis and experimentation. Global City Regions represents a multifaceted effort to deal with the many different issues raised by these developments. It seeks at once to define the question of global city regions and to describe the internal and external dynamics that shape them. It proposes a theorization of global city regions based on their economic and political responses to intensifying levels of globalization and it offers a number of policy insights into the severe social problems that confront global city regions as they come face to face with an economically and politically neoliberal world. At a moment when globalization is increasingly subject to critical scrutiny in many different quarters, this book provides a timely overview of its effects on urban and regional development, one of its most important but perhaps least understood corollaries. The book also offers a series of nuanced visions of alternative possible futures.

China's Provinces and the Belt and Road Initiative Dominik Mierzejewski, 2021-03-30 This book discusses the Belt and Road Initiative at the provincial level in China. It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China's economy in 1978, showing how the provinces initially competed with each other and how the central government was forced to react, developing more centralised policies. Unlike other books on the Belt and Road Initiative which focus on the international aspects of the initiative, this book demonstrates the importance of the Belt and Road in reinforcing China's unitary status and for managing and coordinating development at the local level as well as centre-province relations and province-to-province relations inside China.
