Territorial Development, Cohesion and Spatial Planning

Neil Adams, Giancarlo Cotella, Richard Nunes, 2012-08-06 This book examines some of the evolving challenges faced by EU regional policy in light of enlargement and to assess some of the approaches and trends in terms of territorial development policy and practice that are emerging out of this process Focusing on the experiences on Central and Eastern Europe these chapters reflect on the diversity of approaches to spatial planning and the the politics of policy formation and multi level governance operations from local to trans national agendas Promoting increased awareness and understanding of these issues is the main purpose of the book as well as harnessing the extensive capacity and knowledge within these countries that can greatly enrich the discourse within an enlarged epistemic community of European spatial planning academics

practitioners and policy makers The recently acquired CEE dimension provides a unique opportunity to examine the evolution of existing epistemic communities as well as to explore the potential emergence of new ones *Handbook of Cities and Networks* Neal, Zachary P., Rozenblat, Céline, 2021-07-31 This Handbook of Cities and Networks provides a cutting edge overview of research on how economic social and transportation networks affect processes both in and between cities Exploring the ways in which cities connect and intertwine it offers a varied set of collaborations highlighting different theoretical historical and methodological perspectives

Understanding the Firm Michael Taylor, Päivi Oinas, 2006-12-21 Firms are at the very heart of modern day life They come in a seemingly infinite variety from transnationals to small firm from corporations to branch plants to subsidiaries and joint ventures from subcontractors to franchisees from sole proprietorships to partnerships from manufacturers to service providers and retailers For the most part we view them as the creators destroyers and repositories of jobs the creators and destroyers of people's livelihoods lives and dreams But deciding just what a firm is is neither a simple nor a straightforward task Against a background of the dynamic complexity and plurality that business forms and firms can assume there is a constant search within academic research for the processes that create and maintain both enterprise and enterprises in capitalist societies a search for a theory of the firm This book addresses some of the gaps in the current state of the theory of the firm from an economic geography perspective issues around the boundaries of the firm the collective agency of the firm the political firm financial markets and the state and the firm in place

The New Oxford Handbook of Economic Geography Dariusz Wójcik, 2018-01-02 The first fifteen years of the 21st century have thrown into sharp relief the challenges of growth equity stability and sustainability facing the world economy In addition they have exposed the inadequacies of mainstream economics in providing answers to these challenges This volume gathers over 50 leading scholars from around the world to offer a forward looking perspective of economic geography to understanding the various building blocks relationships and trajectories in the world economy The perspective is at the same time grounded in theory and in the experiences of particular places Reviewing state of the art of economic geography setting agendas and with illustrations and empirical evidence from all over the world the book should be an essential reference for students researchers as well as strategists and policy makers Building on the success of the first edition this volume offers a radically revised updated and broader approach to economic geography With the backdrop of the global financial crisis finance is investigated in chapters on financial stability financial innovation global financial networks the global map of savings and investments and financialization Environmental challenges are addressed in chapters on resource economies vulnerability of regions to climate change carbon markets and energy transitions Distribution and consumption feature alongside more established topics on the firm innovation and work The handbook also captures the theoretical and conceptual innovations of the last fifteen years including evolutionary economic geography and the global production networks approach Addressing the dangers of inequality instability and environmental crisis head on the volume

concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future

Making 21st Century Knowledge Complexes Julie Miao, Paul Benneworth, Nicholas A. Phelps, 2015-05-15 The world has changed profoundly since the publication of the influential book *Technopoles of the World*. As policy makers and practitioners attempt to harness science technology and innovation to create dynamic and vibrant cities many wonder how relevant Manuel Castells and Peter Hall's messages are today. Twenty years later this book returns to their concepts and practices to update their message for the 21st century. *Making 21st Century Knowledge Complexes: Technopoles of the World Revisited* argues that the contemporary technopole concept encompasses three new dimensions. Firstly building synergy between partners is vital for the success of complexes. Secondly the correct governance arrangements are critical to balance competing interests inevitable in any science city project. Thirdly new evaluation mechanisms are indispensable in allowing policy makers to steer their long term benefits. Through twelve case study chapters and a detailed comparative analysis this book provides academics policy makers and practitioners with critical insights in understanding managing and promoting today's high technology urban complexes.

Regional Development in the Knowledge Economy Philip Cooke, Andrea Piccaluga, 2006-09-27 International contributors provide the first examination of the growing subject of regional knowledge economy development. Illustrated by data and stylized accounts the international contributors chart the evolution of knowledge economies questioning the way in which they work and criticize accepted theories and inform how places can cope in the knowledge economy. Based in concept on Cooke's *Knowledge Economies* (Routledge 2002) *Regional Development in the Knowledge Economy* is a well grounded work exploring this increasingly important theme with relevance to innovation systems and related economic development literature.
