Volumes) Mohamed M Hafez,Koichhi Oshima,1998-11-20 The first volume of CFD Review was published in 1995 The
purpose of this new publication is to present comprehensive surveys and review articles which provide up to date information
about recent progress in computational fluid dynamics on a regular basis Because of the multidisciplinary nature of CFD it is
difficult to cope with all the important developments in related areas There are at least ten regular international conferences
dealing with different aspects of CFD It is a real challenge to keep up with all these activities and to be aware of essential
and fundamental contributions in these areas It is hoped that CFD Review will help in this regard by covering the state of the
art in this field The present book contains sixty two articles written by authors from the US Europe Japan and China covering
the main aspects of CFD There are five sections general topics numerical methods flow physics interdisciplinary applications
parallel computation and flow visualization The section on numerical methods includes grids schemes and solvers while that
on flow physics includes incompressible and compressible flows hypersonics and gas kinetics as well as transition and
