**Struggling Middle School Readers** Sarah Louise Feldman, 2007 This study suggests that struggling middle school readers could be better supported if teachers integrated explicit reading strategies into their subject area teaching created supportive classroom environments conducive to reading conversations and discreetly created opportunities to help students individually Middle school curriculum needs to include more variety of reading materials and resources on the same content at multiple reading levels so that all readers can be included in the learning conversation Finally this research calls for policy makers and administrators to create a vision for middle school literacy development that goes beyond the proficiency measurements of standardized testing There is a need to create reading intervention programs as well as school wide literacy initiatives to support middle school students reading development in a way that is congruent with fostering reading for understanding

**Talking Through Reading and Writing** Daniel Rose, Christine Walsh, 2020-11-15 In this book you will read many examples of rich literacy conversations

between a teacher and his 8th grade students that never would have occurred face to face in the classroom. These conversations take place online when 8th graders write to their teacher about the books they're interested in reading and choosing to read independently. Students write about what happens when they read or don't read, how they feel about reading, how they're connecting with characters and ideas, why they don't have enough time to read, and what their reading goals are. And their teacher writes back to them. Every week. After each conversation, you will read some meta-talk that shines a light on what the conversation has taught us about this language learner and how this data is informing our beliefs and practices. Embedded within the chapters are suggested resources, articles, book recommendations, links, websites, blogs, etc. you can follow should you want to read more in that chapter. What these students reveal about their own literacy development, their successes, their challenges, their lives, and how their teacher nudges them along socially, emotionally, and academically, teach us the value and power of one practical, authentic literacy tool: the Reading Conversation Journal.

**Reading Reasons** Kelly Gallagher, 2023-10-10. In *Reading Reasons: Motivational Mini Lessons for Middle and High School*, author and teacher Kelly Gallagher offers a series of mini lessons specifically tailored to motivate middle and high school students to read, and in doing so, to help them understand the importance and relevance reading will take in their lives. This book introduces and explains in detail nine specific real-world reasons why students should be readers. The book contains 40 practical, classroom-tested and reproducible mini lessons that get to the heart of reading motivation and that can be used immediately in English and other content area classrooms. These easy-to-use motivational lessons serve as weekly reading booster shots that help maintain reading enthusiasm in your classroom from September through June. The mini lessons, ranging from 5-20 minutes in length, hit home with adolescents and in turn enable them to internalize the importance reading will play in their lives. Rather than telling students reading is good for them, the lessons in this book show them the benefits of reading.

What Do Middle School Boys Read? Sheilah Cooper Barnett, 2012. This qualitative study investigated what current middle school boys are reading. The purpose of this study was to gain information that would aid educators in providing those reading materials and communicating with male students concerning their reading habits. Six middle school males were chosen for this study, which utilized a phenomenological approach to capture individual experiences. Results showed that boys do read, but they often read materials which educators do not generally accept as valid reading material, such as magazines. Boys often do not view themselves as readers. Males enjoy books with a lot of action and prefer to observe other males' choices of books instead of explicitly receiving or making recommendations. Boys also like to choose their own reading materials. Males learn differently from females and may need to be taught in different environments or taught reading at a later age. Boys usually require more action and movement than girls, and this must be incorporated when educators teach males. Future studies could focus on how the male brain works and how males learn. Future researchers could also study the effectiveness of a reading teacher who works with male students who have reading deficiencies and/or who state that they dislike reading.
