Coronato,2007-08-07 Bring out the reader in every child This one of a kind guide helps parents raise their kids to be readers for life Includes tips for moms and dads even when English isn t their first language along with the other adults in their lives suggests great titles to be read aloud apart and together from birth to high school and much much more The book s Great Titles to Share together lists are broken out by age in appropriate chapters and then gathered together in an appendix for easy cross referencing Dyslexia in Practice Janet Townend,Martin Turner,2012-12-06 Dyslexia is a specific learning

difficulty that hinders the learning of literacy skills This problem with managing verbal codes in memory is neurologically based and tends to run in families Other symbolic systems such as mathematics and musical notation can also be affected Dyslexia can occur at any level of intellectual ability It can accompany but is not a result of lack of motivation emotional disturbance sensory impairment or meagre opportunities The effects of dyslexia can be alleviated by skilled specialist teaching and committed learning Moreover many dyslexic people have visual and spatial abilities which enable them to be successful in a wide range of careers The appearance of this book is to be welcomed It represents a full statement of the best practice to be found in the many kinds of intervention that are conducted with dyslexic students It addresses some fundamental questions that are seldom asked and much of what the skilled teacher knows and does is set down here in print for the first time From the Preface Collectively the chapters provide a synthesis of current practice focusing on how to assess and treat the symptoms of dyslexia guided by a proper understanding of the cognitive and linguistic weaknesses that underpin the condition The book makes clear that the backbone of intervention for dyslexia is a highly structured multisensory approach that teaches reading and spelling skills at the appropriate rate However it is also explicit in pointing out that such a programme must be delivered with due attention to individual differences in the other cognitive skills that contribute to literacy development and take account of the learner's style interests and not least their confidence and self esteem This book provides an important resource for teachers who wish to become competent in the skills required for the assessment teaching supporting and counselling of dyslexic people in a variety of settings It promises to reach many teachers and in turn their students and families Margaret J Snowling University of York UK *The Complete Home Learning Sourcebook* Rebecca Rupp, 1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level **Readers' Guide to Periodical Literature** Anna Lorraine Guthrie, Bertha Tannehill, Neltje Marie Tannehill Shimer, 1957 **Resources in Education**, 2001 **Hockey Made Easy : Instructional Manual** John Shorey, 1995 **Cribsheet** Emily Oster, 2019-04-23 From the author of *Expecting Better* The Family Firm and The Unexpected an economist's guide to the early years of parenting Both refreshing and useful With so many parenting theories driving us all a bit batty this is the type of book that we need to help calm things down LA Times The book is jam-packed with information but it's also a delightful read because Oster is such a good writer NPR With *Expecting Better* award winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies By digging into the data Oster found that much of the conventional pregnancy wisdom was wrong In *Cribsheet* she now tackles an even greater challenge decision making in the early years of parenting As any new parent knows there is an abundance of often conflicting advice hurled at you from doctors family friends and strangers on the internet From the earliest days parents get the message that they must make certain choices around feeding sleep and schedule or all will be lost There's a rule or three for everything But the benefits of these choices

can be overstated and the trade offs can be profound How do you make your own best decision Armed with the data Oster finds that the conventional wisdom doesn't always hold up She debunks myths around breastfeeding not a panacea sleep training not so bad potty training wait until they're ready or possibly bribe with M Ms language acquisition early talkers aren't necessarily geniuses and many other topics She also shows parents how to think through freighted questions like if and how to go back to work how to think about toddler discipline and how to have a relationship and parent at the same time

Economics is the science of decision making and Cribsheet is a thinking parent's guide to the chaos and frequent

misinformation of the early years Emily Oster is a trained expert and mom of two who can empower us to make better less fraught decisions and stay sane in the years before preschool
