Roberts, 2019-03-07 Learning to read and the teaching of reading have long been surrounded with controversy Originally published in 1969 this book takes the view that the subject is best approached via linguistic theory The relationship between reading and spoken language is clearly brought out in the author's attempt to define more closely the area in which the teacher has to operate when teaching children to read His analysis of reading problems in children up to the age of 11 will encourage experienced teachers to question constructively their own beliefs and practices while the book as a whole provides a valuable introduction to the psychology of reading for the student of education      **Young Children Reading** Rachael Levy, 2011-06-22 Developing and supporting literacy is an absolute priority for all early years settings and primary schools and something of a national concern By presenting extensive research evidence Rachael Levy shows how some of our tried and tested approaches to teaching reading may be counter productive and are causing some young children to lose confidence in their abilities as readers Through challenging accepted definitions and perspectives on reading this book encourages the reader to reflect critically on the current reading curriculum and to consider ways in which their own practice can be developed to match the changing literacy landscape of the 21st century Placing the emphasis on the voices of the children themselves the author looks at what it feels like to be a reader in the digital age children's perceptions of reading home and school reading reading in multidimensional forms the future teaching of reading Essential reading for all trainee and practising teachers this critical examination of a vital topic will support all those who are interested in the way we can help future generations to become literate This book will encourage researchers and practitioners alike to redefine their own views of literacy and situate reading literacy within the digital world in which young children now live      Research in Reading at the Primary Level Doris Virginia Gunderson, 1963      Literacy in Early Childhood and Primary Education Claire McLachlan, 2013 Provides a comprehensive reader friendly introduction to literacy teaching and learning exploring both theoretical underpinnings and practical strategies      Promoting Reading for Pleasure in the Primary School Michael Lockwood, 2008-06-24 Winner of the UKLA Author Award 2009 Lockwood has written a useful supportive book which will help teachers and librarians He describes the background and summarises the research and then proposes thoroughly practical programmes Carousel Michael Lockwood has produced an excellent practical overview and analysis of what works in the primary school to promote reading for pleasure Lockwood's work is grounded and valuable to those who need it most teachers in the classroom working hard to engender a love of reading English Drama Media This book is first class It puts the matter very clearly and succinctly and presents a great deal of evidence to support the argument that pleasure is not a frivolous extra but the very heart and essence of what reading is about It also gives readers plenty of ideas for carrying the principle into the classroom and for justifying it This is an excellent piece of work which I hope will find a place on every staffroom bookshelf Philip Pullman English primary school children are less likely to read for pleasure than their counterparts in many other countries This

practical and focused book discusses the background to this situation and looks at how government initiatives have tried to address it Drawing on the author s own research project in order to identify good practice in promoting reading for enjoyment the book presents specific activities which teachers can use to develop their own whole school and classroom practice enabling them to put the fun back into reading Each chapter features case study material and provides examples of planning from schools that have successfully created thriving reading cultures through schemes such as reading assemblies book clubs library loyalty cards school book evenings and quizzes There is also an extensive annotated list of print and internet based resources Topics covered include Becoming a reading for pleasure school Promoting a love of reading in the early years Developing reading enjoyment in the later primary years Getting boys reading Promoting Reading for Pleasure in the Primary School is written for all those involved in education who would like to see as many children as possible develop a love of reading It will be particularly relevant for primary teachers teaching assistants trainee teachers advisers and consultants as well as teacher educators and researchers Reading in the Primary Grades Frances Jenkins,1915 *PISA Let's Read Them a Story!
