**Awareness and Learning to Read** J. Downing,R. Valtin,2012-12-06 During the 1970s there was a rapid increase in interest in metacognition and metalinguistics The impetus came from linguistics psychology and psycho linguistics But with rather unusual rapidity the work from these scientific disciplines was taken over in education This new direction in these various areas of academic study was taken simultaneously by several different investigators Although they had varying emphases their work sometimes appears to be overlapping despite this it has been rather difficult to find a consensus This is reflected in the varying terminology used by these independent investigators linguistic awareness metacognition metalinguistic ability task awareness lexical awareness and so on For educators these developments presented a glittering array of new ideas that promised to throw light on children s thinking processes in learning how to read Many reading researchers and graduate students have perceived this as a new frontier for the development of theory and research However the variety of independent theoretical approaches and their accompanying terminologies has been somewhat confusing **Approaching**

**Reading Disaster** Mona McNee,2012-02-20 By the late 1980s half the nation s children were receiving eleven years of progressivist schooling that failed to give them even the elementary basis of education that was completed by the age of seven in earlier days This great reading disaster was caused by the look say method of teaching which presented whole words not individual letters This book explains the causes and provides the solution to this problem In 2006 the Secretary of

State for Education and Skills has ordered schools to use the phonic method but there seems little evidence that its implications are properly understood or that any serious re training programme for teachers is being put in place The authors believe their explanations and recommendations in this book are thus needed just as much as ever *Children and Parents Enjoying Reading* Peter Branston, Mark Provis, 2025-08-05 With the introduction of the Literacy Hour in 1998 the case for harnessing parental involvement in promoting children s literacy was stronger than ever Originally published in 1999 this book offered a detailed and practical approach based on three key concepts keeping the child in the driving seat continuing support from the school to the parents and daily reading at home It is presented in an accessible manner and offers practical advice to teachers in running and evaluating a scheme It also gives parents a chance to think about the nature of their involvement at word sentence and text levels introducing them to the framework of the National Literacy Strategy Good reading skills are essential for access to the wider curriculum yet above all reading is fun This book helped teachers parents and children to work together to make reading at home more enjoyable It was also to help ensure that children achieved the standards of literacy expected for their age by 2002 Today it can still be used to help children learn to read *Handbook of Emotional and Behavioural Difficulties* Peter Clough, 2005 The book reveals itself to be both a scholarly and practical resource that will be indispensable to anyone seeking insight and direction for understanding and responding to EBD in the 21st century Professor Paul Cooper The University of Leicester
