the interaction between child school and curriculum and summarises mainstream psychological contributions to current thinking on achievement self esteem and education He covers areas of social learning and attribution theory not commonly dealt with in education texts showing that there are major fields of research which have until now been neglected Children and Schooling is constructed so that its chapters can be used as independent study guides to specific subjects or read in sequence each subject inter related The text can be treated as an introduction particularly in view of the notes and comprehensive and apposite scholarly apparatus and as a spring board for serious study at advanced level Role: Volume 4, Sociological Studies J.
