

Sociology Exam 3

1) Identify and explain how various social factors impact health.

Healthy is a state of complete physical, mental and social well-being. Does social status effect our health? My answer to this question is yes. To show my point I would like to put my-self in a hypothetical person's shoes. Let us start from the very beginning. A woman becomes pregnant. The father and she do not get along. Through her pregnancy she is stressed, unhappy and consistently arguing with people around her. This baby is born in a low budget hospital. The mother is sent home right away. Her parents are no longer in her life, this means nobody is there to guide her on how to raise a child. This baby is slightly malnourished, but will still grow.

Let us jump ahead a few months. This baby doesn't own blocks, toys of various colours, or any items that could help him practice using his brain to solve problems. Step ahead a few years and now he's behind in preschool. This is due to the lack of toys, books and attention he has at home. Now he's in elementary school. There is nobody to help him outside of school and other kids cannot relate to his upbringing. This is when he begins to feel isolated. Here we see social exclusion.

Now I would like to pause my story in order to analyze how these factors may affect this child's health. The early years of a child's life matter greatly. This poor baby was behind the other kids from the very beginning. A fetus can feel when their mother is unhappy. This could very well cause mental distress and negatively impact brain development. It would be very difficult if not next to impossible to keep up with school without having learned the basics prior. This kid is now unhappy, lonely and behind in school. Now we can begin to see his health decline. Mental health has effects on our body. This kid may scratch his arms, refuse to eat and have difficulty sleeping at night.

All these factors have already effected a child! He will grow up one day and that poor guys childhood will forever leave him a few steps behind others. One day when he grows up how could we possibly expect him to get good grades? This means he may not get into university or even graduate. This leaves him fewer options than everyone else. Without an education it's much more difficult to make money legally.

Now let's touch on how money effects our health. Healthy food is more expensive, gym memberships require monthly payments, prescriptions, physio, dental and more are not free. Hygiene products and first aid must also be taken into consideration. It's much more difficult to be mentally and physically healthy with a low income.

This person that I have described will one day have a kid of his own. He is not educated and does not have a stable income. He is now forced to raise a child. And so, the cycle continues.
