Nuzzi, Darcia Narvaez, Daniel K. Lapsley, Thomas C. Hunt, Terry L. Hunt, 2007-12-30 This work delves into the topic of moral education in America's K 12 schools Following an introductory historical chapter it analyzes salient topics and notable leaders in the field of moral education It treats the issues thoroughly and fairly providing a heightened understanding of both the major and minor themes in moral education *Understanding Human Values* Milton Rokeach, 2008-06-30 This volume presents theoretical methodological and empirical advances in understanding and also in the effects of understanding individual and societal values *Global Perspectives on Spirituality and Education* Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children's spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education *Character Education* Wouter Sanderse, 2012 Many teachers want to contribute to children's moral development but this desire has not always resulted in a profound grasp of what moral education really means why it would be desirable and how it can best be achieved This book confronts these questions by examining what Aristotelian virtue ethics can illuminate about moral education At the same time it evaluates whether Aristotelian theory can still be useful for contemporary educational practice The argument culminates in a morally justified and psychologically realistic account of how virtue can best be taught in schools The approach called character education sees moral education not as enforcing rules or transferring values in separate subjects Instead it encourages teachers to be a morally exemplary teacher which is revealed through all kinds of small decisions and emotional reactions This philosophical essay takes a constructive but critical stance towards empirical research about the effectiveness of teaching methods and the realism of character traits

**Bringing in a New Era in Character Education** William Damon, 2013-09-01 The educational system in the United States has ended its failed experiment with separating the intellectual from the moral Schools from K 12 to colleges and universities are increasingly paying attention to students values and character But how can we ensure this new era in

character education makes the right kind of difference to young people What obstacles in our current educational system must we overcome and what new opportunities can we create This anthology offers unique perspectives on what is needed to make character education an effective lasting part of our educational agenda Each chapter points out the directions that character education must take today and offers strategies essential for progress The expert contributors reveal why relativism has threatened the moral development of young people in our time and how we can pass core values down to new generations of students in ways that will elevate their conduct and their life goals And they show the critical importance of reestablishing student morality and character as targets of higher education s central mission Perhaps most important they clarify the necessity of authority in any moral education endeavor and show how it is a powerful force for developing personal freedom and building character
