Ott, Greg Dickinson, 2012 Bringing together 50 key readings on rhetorical criticism in a single accessible format The Rhetorical Criticism Readerfurnishes instructors with an ideal resource for teaching and practicing the art of rhetorical criticism Unlike existing readers and textbooks which rely on cookie cutter approaches to rhetorical criticism The Rhetorical Criticism Reader organizes the field conceptually allowing teachers and students to grapple with the enduring issues and debates surrounding criticism over the past 50 years The readings are organized into four sections each representing key conceptual issues and debates in rhetorical criticism critic purpose object method theory practice and audience consequentiality Each section is preceded by an introductory essay that puts the readings into context For added flexibility an alternative table of contents is also included for instructors and students to customize their teaching and reading Intended for upper division undergraduate and graduate courses in rhetorical criticism The Rhetorical Criticism Reader uniquely lends itself to thoughtful discussion of the role of the critic in the critical process It assists readers not only in learning the tools of criticism but also in reflecting on the values that underlie the critical endeavor Reading Rhetorical Texts James Robertson Andrews, Michael C. Leff, Robert Terrill, 1997 This book is designed to orient the beginning student to the nature and function of rhetorical criticism to acquaint the student with those elements in the rhetorical situation that warrant serious attention and to teach the student a useful strategy with which to begin to practice criticism The focus of this book is clearly on public speeches Along with mastering basic concepts the beginning critic will also be given the opportunity to begin grappling with fundamental and enduring critical issues The authors have included in this book texts and examples of how critics have studied those texts They also offer two historical texts along with their own critical readings of those texts The book then presents two texts and illustrations of the various critical responses to these texts The first text is Richard Nixon's Address on the Vietnam War and the second is Jesse Jackson's Common Ground and Common Sense Finally several examples of critical readings by rhetorical scholars illustrate different ways to approach texts Pref Rhetorical Criticism in Communication Studies Georgina

Gabor,2017-10 This book focuses on seven entries in Carl R Burgchardt's Readings in Rhetorical Criticism to which it adds a complementary effort While maintaining a strategy of ongoing dialogue with both the prospective reader and the texts under scrutiny the book acknowledges the author's privileged moment of essential identification and represents a step out of the limiting frame of the inherently political character of inquiry This allows the book to present personal narrative about guidance by specific critics such as Edwin Black Forbes Hill Karlyn Khors Campbell Kenneth Burke William Lewis and Raymie McKerrow through the labyrinth of that Leviathan the public mind H Wichelns The volume mediates a cross cultural re conceptualization of academic writing more adequately inscribed within the symbolic border between the consolidated American and other fragile profiles of the discipline of Communication Studies

Rhetorical Criticism Jim A.

Kuypers,2016-04-21 Now in its second edition Rhetorical Criticism Perspectives in Action presents a thorough accessible and well grounded introduction to contemporary rhetorical criticism Systematic chapters contributed by noted experts introduce the fundamental aspects of a perspective provide students with an example to model when writing their own criticism and address the potentials and pitfalls of the approach In addition to covering traditional modes of rhetorical criticism the volume presents less commonly discussed rhetorical perspectives exposing students to a wide cross section of techniques

Television Criticism Victoria O'Donnell,2007 Television Criticism presents an original treatment of television criticism with a foundational approach to the nature of criticism an understanding of the business of television production background in creating television style in depth chapters on storytelling and narrative theories and television genres the interaction of rhetoric and cultural studies theories representation and postmodernism It presents new and comprehensive guidelines for analysis and criticism and it has a sample critique of the television program CSI Crime Scene Investigation **Politics** within Parentheses Georgina Gabor, 2017-08-21 The book purports to mediate between various culturally determined profiles of the discipline of Communication Studies While it directs the reader's attention to landmark American texts in intercultural communication it also signals the potential to make reading a relational praxis thus writing a way out of the disciplinary meta narratives of identification Through its focus on studies which employ critical or auto ethnographic methods the book represents a mediator of cultural meanings Its unique approach resides in the offering of a personal incursion through the texts under scrutiny which allows the reader a pathway a practical orientation towards criticism in general and the appropriate means to perform it Sourcebook on Rhetoric James Jasinski, 2001-07-19 Please update SAGE UK and SAGE INDIA addresses on imprint page A Hermeneutic of Curiosity and Readings of Psalm 61 W. H. Bellinger, 1995 Discourse as Structure and Process Teun A. van Dijk, 1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels. The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive

and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction *Political Perversion* Joshua Gunn,2020-10-10 When Trump became president much of the country was repelled by what they saw as the vulgar spectacle of his ascent a perversion of the highest office in the land In his bold innovative book Political Perversion rhetorician Joshua Gunn argues that this mean spirited turn in American politics of which Trump is the paragon is best understood as a structural perversion in our common culture on a continuum with infantile and gotcha forms of entertainment meant to engender provocation and sadistic enjoyment Drawing on insights from critical theory media ecology and psychoanalysis Gunn argues that perverse rhetorics dominate not only the political sphere but also our daily interactions with others in person and online From sexting to campaign rhetoric Gunn advances a new way to interpret our contemporary political context that explains why so many of us have difficulty deciphering the appeal of aberrant public figures In this book Trump is only the tip of a sinister rapidly growing iceberg one to which we ourselves unwittingly contribute on a daily basis

Eadie, 2009-05-15 The discipline of communication has grown in popularity from the time professors of journalism and speech decided in the mid 1960s that the term communication was an excellent general descriptor for the theory and research that each group aspired to create Over time the two groups grew closer and recognized significant overlap in their theoretical and research interests but there were also differences in their traditions that kept them apart While both groups agreed that communication is a practical discipline journalism professors focused a great deal of their attention on the education of media professionals Speech professors on the other hand often were more oriented to the liberal arts and valued the fact that communication could be approached from a variety of traditions including the arts humanities social sciences and even the sciences A key term in 21st Century communication however is convergence Not only are media and technology converging with each other to produce new means of communicating but individuals are increasingly using both new and existing communication tools to create new forms of communication This convergence

forces the various camps within the communication discipline to draw upon each other s theories and research methods to keep up with explaining the rapidly changing communication environment This convergence of ideas and theories provides a space to challenge conventional ways of thinking about the communication discipline and that s the goal of the SAGE 21st Century Reference Series volumes on Communication General Editor William F Eadie has sought to honor the diversity of the study of communication but also integrate that diversity into a coherent form dividing communication study into four basic properties 1 processes 2 forms and types of communication 3 characteristics to consider in creating messages and 4 relationships between communicators Via 100 chapters this 2 volume set available in both print and electronic formats highlights the most important topics issues questions and debates any student obtaining a degree in the field of communication ought to have mastered for effectiveness in the 21st Century The purpose is to provide undergraduate majors with an authoritative reference source that will serve their research needs going forward in this exciting field with more detailed information than encyclopedia entries but not as much jargon detail or density as a journal article or a research handbook chapter Comprehensive coverage captures all the major themes and subfields within communication For instance Volume 1 themes include the discipline of communication approaches to the study of communication key processes of communication forms and types of communication key characteristics of messages key communication relationships factors affecting communication and challenges and opportunities for communication Themes in Volume 2 are media as communication communication as a profession journalism public relations advertising and media management Authoritative content is provided by a stellar casts of authors who bring diverse approaches diverse styles and different points of view Curricular driven emphasis provides students with initial footholds on topics of interest in researching for term papers in preparing for GREs in consulting to determine directions to take in pursuing a senior thesis graduate degree career etc Uniform chapter structures make it easy for students to locate key information with a more or less common chapter format of Introduction Theory Methods Applications Comparisons Future Directions Summary Bibliography Suggestions for Further Reading and Cross References Availability in print and electronic formats provides students with convenient easy access
