Real Dreams The Future From The Present:

Real dreams are actions of the true Self Helena Petrovna Blavatsky, 2018-01-03 Dreams are images of hopes and fears Somnambulism premonitions and second sight are a disposition energised by the power of the imagination to perceive and guess by intuition reflections from the Astral Light In sense dreams the mind is always asleep The sensual tendencies of the dreamer are readily impressed by pictures from the Astral Light and thus the direction of such dreams is always towards the animal plane We should therefore train ourselves to wake up when a sense dream occurs and the instantaneous rejection of impure thoughts during the period of waking consciousness will tend to set up a habit of rejection which will act automatically in sleep There is no simple answer to the question what is it that dreams for it depends entirely on each individual what principle will be the chief motor in dreams and whether they will be remembered or forgotten When the material man dreams all he sees with his eyes shut and in or through his mind is of course subjective But the Inner Man who is the silent spectator of the life of the dreamer all he sees is as objective as he is himself to himself The dream state is common not only to all men but also to all animals from the highest mammalia to the smallest birds and even insects Every being endowed with a physical brain or organs approximating thereto must dream Human dreams do not differ much from those of the animals But that which is entirely terra incognita for science is the real dreams and experiences of the immortal Ego overshadowing mortal man which thinks and acts independently of the physical body What we often regard as dreams or idle fancies may be stray pages torn out from the life and experiences of the Inner Man the dim recollection of which at the moment of awakening becomes more or less distorted by our physical memory Every night when the Inner Man is freed from the trammels of matter he lives a separate life within his prison of clay But the outer man cannot be conscious of the Inner Man for his brain and thinking apparatus are paralyzed more or less completely Ordinary dreams are caused by sensuously desirous consciousness awakened into chaotic activity by the slumbering reminiscences of the lower mind The combined action of desires and animal soul is purely mechanical It is instinct not reason which is active in them But as a rule our memory registers only the fugitive and distorted impressions which the brain receives at the moment of awakening Among the vast number of meaningless dreams there are some in which presages are given of coming events When such dreams come true they may be termed prophetic In the case of individuals who have truly prophetic dreams it is because their physical brains and memory are in closer relation and sympathy with their Higher Ego than in the generality of men The Adept however does not dream he just paralyzes his lower self during sleep and becomes perfectly free Dreams are illusions and the Adept is beyond illusion Imagination is the best guide of our blind senses We see through our imagination and that is the natural aspect of the miracle But we also see actual and true things and it is in this that lies the marvel of the natural phenomenon Those of a nervous temperament whose sight is weak and imagination vivid are the fittest persons for this kind of divination The stronger the spirituality of the dreamer the easier it will be for the Higher Ego to impress on the brain a

vivid picture of the dream In the materialistic man in one whose proclivities and passions have severed his astral soul from her spiritual counterpart and master in him whose labour has so worn out the body as to render him temporarily insensible to the voice of his soul such persons rarely if ever will have any dreams at all On the other hand highly spiritual people will see visions and dreams when asleep and even in their hours of wakefulness Messages sent by one soul to another are perceived as premonitions dreams and visions Facts are generally inverted in dreams and this can be explained by the law of introverted mental vision The Higher Ego does not think as its evanescent personality does Its thoughts are vivid pictures and visions of past and future scenes of wonderful living acts and heroic deeds which are all present in the eternal now even as they were when speech expressed in sounds did not exist when thoughts were things and men did not need to express them in speeches for they instantly realised themselves in action by the power of Kriyashakti that mysterious power which transforms instantaneously ideas into visible forms In persons of a very materialistic mind because the Ego is so trammelled by matter it can hardly give all its attention to one s actions even though the latter may commit sins for which that Ego will have to suffer conjointly in future True dreams being actions of the Higher Ego they produce effects which are recorded on their own plane Ordinary dreams by and large are the waking and hazy recollections of such actions Between the inner man and the physical brain there is a kind of conscious telegraphic communication going on incessantly day and night When the brain is asleep the physical memory and imagination are also asleep and all cognitive functions are at rest Our mundane life is a dream to the Higher Ego while the inner life or what we call the dream plane is the real life for it The will of the common man is dormant in dreams and therefore inactive A sick person especially just before death is very likely to see in dream or vision those whom he loves and is continually thinking of and so also is a person awake but intensely thinking of a person who is asleep at the time In cases of consumption or other emaciating diseases dreams become pleasant because the astral soul of the patient has begun detaching from the physical body and therefore becomes more clairvoyant in proportion As death approaches the body wastes away and ceases to be an impediment or barrier between the brain of the ailing man and his Higher Ego In Black Magic it is no rare thing to evoke the spirit of a sleeping person Thus the sorcerer may learn from the apparition any secret he chooses while the sleeper remains ignorant of what is going on A nightmare arises from oppression and difficulty in breathing and the latter will always create a feeling of oppression and a sensation of impending calamity By cultivating the power of dreaming clairvoyance is developed But only one s clairvoyant faculty aided by spiritual intuition can interpret one s dreams The only one who profits from a dream book is its author If you could remember your dreams in deep sleep when the spiritual consciousness is active you would be able to remember all your past incarnations That exalted state of remembrance is the Memory of the Heart and the capacity to impress itself on the brain so that it becomes part of its consciousness marks the opening of the Third Eye Beloveds in dreams. Dreams that tell about future and present: Beloveds in dreams. Dreams that tell about future and present Victoria Socolova,2016-10-15 The world of our

dreams is something more than our reality It is in a dream where we can find ourselves in any point of space and time where we learn secrets of the part essence of the present and possibilities of the future It is only in dreams where we can meet those who are no more with us study options for forthcoming events or make our choice *The Positive Power of Sadness*
Ron Johnson Ph.D., Deb Brock Ph.D., 2017-03-09 Written by two clinical psychologists with nearly a century of combined experience this book explains how people who suffer from depression anxiety or undue anger can overcome these difficulties by allowing the normal process of grieving to occur Sadness is generally characterized as a negative emotion yet experiencing sadness plays a positive and key role in achieving and maintaining mental health and in avoiding anxiety depression and anger Indeed sadness can be understood as a normal and necessary feeling that always occurs when one loses something that is loved The Positive Power of Sadness examines the experience of sadness taking into account the personal relational and neurological factors of sadness explains the cultural reasons that many resist feeling sad and consequently displace sadness into secondary processes and provides a practical and systematic way to overcome anger anxiety and depression by allowing the normal process of being sad to occur This simple paradigm of love and loss causing joy and sorrow in tandem is founded on solid research carefully considered theory and extensive experience and will serve to stimulate further thought and writing Professional therapists psychologists counselors teachers and clergy who work with people in various settings will find this enlightening reading as will general readers seeking self help or possessing an interest in psychological functioning or relational difficulties From Dream to Action Tatiana Valério, Ana Clara S. Bastos, Luca Tateo, 2021-01-01 The ubiquitous presence of imaginative work points at its importance among the higher mental functions This collective volume discusses both the social relevance of imagination that cannot be reduced to an individual feature and the cultural historical conditions of imagining The authors develop different theoretical and empirical works in which imagining planning anticipating remembering and acting are put in relation with crucial moments of human existence as early as birth and even after death The proposal of this volume emerged during a kitchen seminar session at the III International Seminar of Cultural Psychology in Salvador da Bahia Brazil 2017 The debate revolved around the imaginative capability of human beings and the possibilities to investigate this phenomenon in a new key The awareness that an innovative theoretical and empirical contribution was needed to the understanding of imaginative phenomena in everyday life led to the proposal of the book From Dream to Action Imagination and Im Possible Futures The book aims to talk to different audiences psychologists sociologists artists teachers and healthcare professionals addressing a variety of life experiences such as imagining alternative futures when facing a terminal illness an adoption a transplant waiting list or the choice to give up your musical instrument mobilize multiple dimensions of human psyche from the basic emotions to the more sophisticated higher mental functions The constant effort is to understand the psychological and sociocultural dynamics of each event and to contribute to the understanding of human imagining in the area of semiotic cultural psychology

dialoguing with contributions from all the human and social sciences Time, Will, and Mental Process Jason W. Brown, 2007-08-28 In this volume distinguished neurologist Jason W Brown extends the microgenetic theory of the mind by offering a new approach to the problem of time and free will Brown bases his work on a unitary process model of brain and behavior He examines the problem of subjective time and free will the experiential present the nature of intentionality and the creative properties of physical growth and mental process **Future Time Perspective and Motivation** Joseph Nuttin, 2014-04-04 First published in 1985 The present volume is a theoretical and methodological supplement to the Nuttin's book Motivation planning and action A relational theory of behaviour dynamics in which he showed that behaviour dynamics in man due to their interaction with higher cognitive functioning are processed into goals and means end structures that is behavioural projects or plans The main purpose of the theoretical section of this book is to contribute to the integration of the future time dimension on the study of human motivation and behaviour The main part is then devoted to a two step method for studying the content and density of a person's future time perspective and for measuring its depth or extension

The US Sports Film: A Genre of American Dream Time Danny Gronmaier, 2022-12-05 Sports and film are media that create time They are temporal not only in the sense that they are defined and regulated by certain temporalities as a result of processes of social negotiation but also in the sense of modulating and intervening in these processes in the first place They are determined by multiple temporalities referring to and aligning along perceptual corporeality but at the same time they also produce time through and along temporalities of bodily expression and perception Thus as much as we perceive and understand sports and film by means of our culturally coded conceptions of time this comprehension is itself already the product of these media's fabrication and modulation of certain audiovisual imaginations of time This book examines these imaginations with regard to US team sports feature films understanding the former as the latter's constitutive conflict which makes these films graspable as a genre in the first place By addressing temporality as an ever new crystallization of a heroic past and an unattainable future in a saturated yet volatile present this conflict connects substantially to the American Dream as an idea of community building historicity Departing from a non taxonomic approach in genre theory and such philosophical recognition of the American Dream as less an ideological narrative but more a social and socially effective imaginary embedded in an audiovisual discourse of time this book demonstrates the interrelation of sports cinema and American subjectivization along close readings of the poetics of affect of five exemplary sports films *FIELD OF DREAMS* *WE ARE MARSHALL* *KNUTE ROCKNE* *ALL AMERICAN* *JIM THORPE* *ALL AMERICAN MIRACLE*
