Liu, 2012-12-06 In March 1999 New York University Salomon Center in association with the Department of Finance at NYU Stern held a one day conference on the impact of real estate cycles on the real estate industry both from a domestic as well as an international perspective The conference featured the leading research on this topic in the United States Europe and Asia Currently the real estate industry is at a critical point New development projects around the world are being put on hold given recent developments in the international capital markets The industry is hard hit by the decline in real estate investment trust REIT share prices and a shrinking pool of capital for real estate ventures This has unfortunately coincided with serious financial problems of very large hedge funds

and other institutional investors in the market for commercial mortgage backed securities There is need for new insights into the implications of U S and global real estate cycles on real estate securities including REITs and mortgage backed securities as well as direct real estate investment This global orientation is important given the high mobility of capital into the real estate the increasing integration of real estate markets and the proposed expansion of real estate investment trusts REIT into international real estate The process of globalization has resulted in increased competition between cities for the attraction of investment

An Empirical Investigation of the Role of Legal Origin on the Performance of Property Stocks Within the Context of a Tactical Asset Allocation Strategy Christopher Shun, 2005-07-06 The role of legal origin was first introduced in the Law and Finance Literature by La Porta et al 1997 in an original study of legal determinants of external finance Their study is timely given that investor protection is crucial because in many countries expropriation of minority shareholders and creditors by controlling shareholders or corporate insiders is extensive This dissertation intends to replicate the original La Porta et al 1997 study for Property stocks in 23 countries whose legal jurisdictions falls into the four of the legal fraternities established by La Porta namely English French German and Scandinavian The primary motivations for this thesis is that the Property stocks broadly captures several critical aspects of the original La Porta study Specifically Property stocks are very tangible assets that can easily be collateralised due to the direct property underpinning the net asset backing of Property stocks The end result of this research endeavour is to provide a framework for institutional portfolio investors to determine the appropriate countries whose real estate markets have the most favourable investor

climate to facilitate a more attractive environment for institutional investors given the Means Variance Optimisation MVO methodology A tactical asset allocation strategy will be employed to determine the three stages that a global investor should undertake to arrive at the optimum proportions of funds to invest in Common stocks or Real Estate stocks in any country firstly based on an Emerging Developed country analysis then secondly a geographic Regional analysis and finally on Legal Origin analysis to distil the appropriate proportions of funds that should be invested This Dissertation has three original contributions which are as follows 1 An Empirical investigation of role of Legal origin on the performance of Real Estate stocks within the context of a tactical asset allocation strategy This dissertation studies the impact that Developed versus Emerging Regional markets and Legal Origin jurisdictions have on the results of the optimal MVO portfolios based on the highest Sharpe ratio and presents the research findings of this study at the Primary Secondary and Tertiary levels This dissertation is envisaged to fill the research gap between legal origin and the performance of Property stocks across four legal fraternities in 23 countries and make an original contribution in the Law Finance and Portfolio Management Literature 2 ACTIVE Ex Ante versus PASSIVE na ve portfolio management strategy The original contribution is the application of this methodology to property stocks specifically within a Legal Origin and Regional market framework Data is collated from 1984 to 2003 20 years inclusive from 23 countries with specific reference to the Common and Real Estate stocks markets therein A 5 year rolling Ex Post analysis is computed to determine the optimum allocation weights in a multi asset portfolio and subsequently an Ex Ante analysis next immediate year of the portfolio weights applied to an Actively managed portfolio This portfolio will be compared with actual portfolio performance from 1989 to 2002 fifteen subsequent years to determine whether the Ex ANTE methodology which underpinned the Active management strategy is preferred over a Passive equal investment in each asset class strategy for real estate stocks portfolio management The Ex Ante analysis will be undertaken at two stages Firstly Legal Origin markets and Secondly Regional markets 3 A replication of the Gordon et al 1995 study which determined the appropriate percentage based on the Markowitz Portfolio Theory MPT that should be invested in the Real Estate stock markets in 14 countries The original contribution is the application of Gordon s methodology to the Legal Origin markets proposed by La Porta et al 1997 This research study encompasses 23 c
