 theworld is a valuable corollary to effective investmentdecision making within the property sector and will be of interestto

post graduate property students researchers and practising real estate investors Recent years have seen some rapid developments in the global scale and structure of real estate markets Such transformations have been paralleled by significant changes in the financial structures and processes that serve these markets including sophisticated new investment and finance structures and products Examples of these include the real estate investment trusts REIT products that have been developed in USA Europe and Asia the range of unlisted products emerging in UK and Europe and the innovative financing structures being developed in many countries Global Trends in Real Estate Finance addresses this emerging complexity and sophistication in contemporary real estate markets by discussing the history merits and implications of a range of products and processes Also examined are the changes in the practices and environment needed to ensure the success of these property products including increased disclosure corporate governance market transparency and improved skills base Chapters are written by leading international contributors both academic and practitioner The context is explicitly international with a focus on UK Europe Asia Australia and the USA The aim is to identify specific market areas to describe the key innovations rather than simply providing a description of various geographical markets

Property Investment Appraisal Andrew E. Baum, Neil Crosby, 2014-10-13 This book explains the process of property investment appraisal estimating both the most likely selling price market value and the worth of property investments to individual or groups of investors investment value Valuations are important they are used as a surrogate for transactions in the construction of investment performance and they influence investors and other market operators when transacting property Valuations need to be trusted by their clients and valuers therefore need to produce rational and objective solutions In a style that makes the theory as well as the practice of valuation accessible to students and practitioners the authors provide a valuable critique of conventional valuation methods and argue for the adoption of more contemporary cash flow methods They explain how such valuation models are constructed and give useful examples throughout The UK property investment market has been through periods of both boom and bust since the first edition of this text was produced in 1988 and the book includes examples generated by the different market states for example complex reversions over rented situations and leasehold examples are in ready supply and are examined fully by the authors They have retained the book's basic structure and thrust setting out fundamental investment and appraisal theory in Part One of the book but adding a new chapter on building and modelling cash flows as a precursor to the investment material in Part Three The heart of the book remains the critical examination of market valuation models addressed in Part Two it remains the case that no other book addresses this issue in detail
