Sertillanges, 2024-03-01 Philosophy confronted with things is thought confronted with chaos To our mind things are in chaos for though we notice that they are superficially and we presume fundamentally in order still our minds are restless because we cannot fully comprehend this order We may grasp its main outlines but we are at a loss when we come to examine it more closely and the farther we go into it the more we find ourselves faced by a mystery **Analysis, Design and Construction**

Ens Primum Cognitum in Thomas Aquinas and the Tradition

Brian Kemple,2017-08-21 Ens Primum Cognitum in Thomas Aquinas and the Tradition presents a reading of Thomas Aquinas claim that being is the first object of the human intellect Blending the insights of both the early Thomistic tradition c 1380 1637AD and the Leonine Thomistic revival 1879 present Brian Kemple examines how this claim of Aquinas has been traditionally understood and what is lacking in that understanding While the recent tradition has emphasized the primacy of the real so called ens reale in human recognition of the primum cognitum Kemple argues that this misinterprets Aquinas thereby closing off Thomistic philosophy to the broader perspective needed to face the philosophical challenges of today and proposes an alternative interpretation with dramatic epistemological and metaphysical consequences

Rousseau's Reader John T. Scott, 2020-05-04 On his famous walk to Vincennes to visit the imprisoned Diderot Rousseau had what he called an illumination the realization that man was naturally good but becomes corrupted by the influence of society a fundamental change in Rousseau's perspective that would animate all of his subsequent works At that moment Rousseau saw something he had hitherto not seen and he made it his mission to help his readers share that vision through an array of rhetorical and literary techniques In Rousseau's Reader John T. Scott looks at the different strategies Rousseau used to engage and persuade the readers of his major philosophical works including the Social Contract Discourse on Inequality and Emile Considering choice of genre textual structure frontispieces and illustrations shifting authorial and narrative voice addresses to readers that alternately invite and challenge apostrophe metaphor and other literary devices and of course paradox Scott explores how the form of Rousseau's writing relates to the content of his thought and vice versa Through this skillful interplay of form and content Rousseau engages in a profoundly transformative dialogue with his readers While most political philosophers have focused understandably on Rousseau's ideas Scott shows convincingly that the way he conveyed them is also of vital importance especially given Rousseau's enduring interest in education Giving readers the key to Rousseau's style Scott offers fresh and original insights into the relationship between the substance of his thought and his literary and rhetorical techniques which enhance our understanding of Rousseau's project and the audiences he intended to reach

Reportatio I-A Johannes Duns Scotus, John Duns Scotus, 2008

Person-Centered Politics Eamonn O'Higgins, 2024-04-09 What accounts for the widespread disillusionment with politics Person centered Politics suggests that politics today through its structures processes and institutions tends to presuppose and to impose a certain caricature of the human person that inhibits and frustrates a real sense of personal participation in an authentic common good of politics and society In 12 chapters that touch on fundamental themes of political philosophy Person centered Politics proposes the social and transcendent dimensions of personal existence and their application to the renewal of politics today The themes explore the commonly accepted assumptions of politics today and how a renewed understanding of the person can invigorate political discourse and action In Person centered Politics the author is in continuous dialogue with some of the major contemporary philosophers and thinkers such as Eric Voegelin David Walsh Robert Sokolowski Vaclav Havel Pierre Manent Peter Simpson and Joseph Ratzinger Benedict XVI Detailed footnotes in each chapter provide reference to further sources of enlightenment and research Person centered Politics proposes an outline for a renewed vision of politics that is centered on the truth of human existence and not a politics that distorts and suffocates the human spirit because in the words of E Voegelin the right order of the soul through philosophy furnishes the standard for the right order of society and not the other way round

Personal Reality, Volume 1 Daniel Paksi, 2020-01-01 Western

civilization was built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his her body We use our billions of years old evolutionary skills and thousands of years old cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our thinking God or matter There is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies

Change and Relations David Svoboda, Prokop Sousedík, 2023-01-27 Relations belong to the fundamental philosophical concepts for everything that exists relates to something This leads us quite naturally to think about relations themselves In our book we consider relations against the background of the issue of change We draw on the Aristotelian but also the Platonic traditions of thought which for centuries have tried to come to terms with Aristotle's thesis that there is no change with respect to relations We critically examine and ultimately reject this certainly surprising claim As a part of our own solution to this difficulty we propose a particular reconstruction of the Aristotelian categorial schema that allows us to properly grasp not only ordinary changes but also relational changes The book is systematic in nature in dialogue with many great philosophers we seek a true solution to our difficulty using in particular the resources of contemporary analytic philosophy
