Redecision Therapy Carolyn E. Lennox, 1997-03-01 Editor Carolyn Lennox characterizes the rededecision therapist as a director in an improvisational theater Guided by the client's personal contract for change the therapist helps the client select and rewrite old scripts in which he or she was cast as victim By keeping the dialogue moving and assisting the client in confronting negative messages the therapist supports revision of the last act so that the self can be experienced as triumphant protagonist and the victory can be carried over into everyday life This compendium of contributions from twenty two experienced rededecision therapists first addresses issues of theory how to negotiate a clear contract for change how to identify client's impasses how to access the client's potential for creativity what transactional analysis calls the natural child and then illustrates applications of the theory in the treatment of depression anxiety bulimia PTSD and so forth in individuals and groups and in private HMO and hospital settings Closing chapters discuss rededecision therapy training and supervision The book's thoroughly accessible approach to brief action oriented therapy will be welcomed by students and practitioners alike as what Dr Lennox gracefully terms teachable and learnable magic

Transactional Analysis Approaches to Brief Therapy Keith Tudor, 2002-02-05 Of all the approaches to therapy Transactional Analysis or TA is arguably one of those most suited to time limited work At a time when short term therapy is increasingly dominant as a form of practice Transactional Analysis Approaches to Brief Therapy provides an insightful guide which both informs and challenges Rather than a single theory TA has developed as a group of four schools which share a common philosophy but place different emphasis on what occurs during the therapeutic process Written by therapists at the leading edge of developments in TA the book presents and differentiates each of these four approaches Through transcripts and commentaries it shows how theory applies to practice for example
