Rediscovering China Dynamics And Dilemmas Of Reform:

Rediscovering China Cheng Li, 1997 Li shows readers from the grassroots a country full of energy irony and paradox

Rediscovering China Cheng Li, 1997-03-20 This engrossing and evocative account of the profound changes overtaking China explores the major dilemmas it confronts at the turn of the millennium Shanghai born and Western educated Cheng Li provides the unique dual perspective of a local resident and a political scientist who returned to his homeland to observe from the grassroots China's remarkable social transformations During his travels Li interviewed people from all walks of life including local officials technocrats entrepreneurs intellectuals and migrant laborers His first hand account shows how broad changes in rural industrialization urban privatization and internal migration have deeply influenced people's lives and ways of thinking The magnitude of these transformations is unprecedented in Chinese history His account brings a sense of immediacy to the crucial issues that have bedeviled the country official corruption growing disparities between rich and poor the halting reform of state owned enterprises transportation and infrastructure bottlenecks and environmental degradation In rediscovering his native country full of energy irony paradox and contradiction Li challenges some mainstream perceptions of China and presents a fresh perspective on U S Sino relations during this period of uncertainty His clear eyed and engaging account provides the reader with the sounds and smells tastes and textures of this rapidly changing country *From*

Revolution to Reform He Li, 2004 In *From Revolution to Reform* He Li examines political and economic transformation in China and Mexico from the Mexican and Chinese revolutions at the beginning of the 20th century to economic reforms and political liberalization in recent decades Li also explores lessons that other developing countries could learn from the experiences of China and Mexico China's Leaders Cheng Li, 2001-02-28 Who will govern China at the dawn of the twenty first century What are the social backgrounds and career paths of the new generation of leaders How do they differ from their predecessors in their responses to perplexing economic and sociopolitical challenges Drawing upon a wealth of both quantitative and qualitative data on the so called fourth generation of leaders those who were young during the Cultural Revolution Cheng Li sheds valuable light on these key questions He shows that this group is more diversified than previous generations of CCP leaders in formative experiences political solidarity ideological conviction and occupational background The author explores the contradictions between political leaders and non elite peers in the same generation those approaching middle age who were barred from education during the Mao era and now often are unemployed and disenchanting with the government The book concludes with the intriguing notion that this generation of leaders may have a better understanding of its peers needs and concerns and therefore may make the regime more accountable to its people thus contributing to rather than opposing democratic development China's Peaceful Rise in a Global Context Jinghao Zhou, 2010-04-02 China's rise has become inevitable but there is no agreement about whether China will rise peacefully or pose a threat to the United States The author asserts that both theories of China threat and peaceful rise failed to address

China's central domestic problem. Thus both theories are not convincing. This book attempts to develop a third view of China's rise from a domestic perspective and contends that China's potential threat to the existing global order is not derived from her rapid economic growth and military expansion but from her potential domestic chaos. A strong democratic China will contribute to the global peace but the collapse of China will gravely threaten Western societies. The current Chinese political system directly contributes to this social instability and could possibly cause China's social crash. China's democratization is the key to ensure China's peaceful rise in a global context. However, the Party is still in power and any attempt to dissolve the one-party system in present-day China has poor prospects. China must take a two-step gradual reform approach to complete the transition from an authoritarian regime to a democratic one. In the two-step theory, the first phase for promoting China's democratization includes exercising freedom of media, increasing the consciousness of citizen participation, and enacting religious rights. Through all these democratic exercises, China will gradually be able to achieve a fully democratic society. This two-step theory is crucial for the United States if it is to enact effective foreign policy toward China and for China to develop a democratic harmonious society.

Popular Political Support in Urban China Jie Chen, 2004. On the basis of three carefully drawn surveys of Beijing residents between 1995 and 1999, the author finds that diffuse support for the current political system based on attitudes toward institutions and values remains strong at least among city dwellers, though it is gradually declining.

Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition Jinghao Zhou, 2020-07-23. History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War. As a result, the socialist camp was dissolved. China is one of the few communist countries to survive in the twenty-first century. The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s, guided by the China model. China became the world's second largest economy in 2010 and has quickly expanded its enormous global market and political influence. The second global competition between the capitalist countries and China has started. The second global competition is in fact between the China model and the Washington Consensus. Will Western hegemonies end as the result of the second global competition? Will China be able to rewrite the international rules? Will the Chinese communist political system collapse during the competition? What should the West do to the China model? This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China's global expansion are the two sides of the same coin. The China model is losing its power but not broken. China would be able to become even stronger if it could reshape the philosophical foundation of the China model. The future of Western hegemony will depend on how the West understands the China model and deals with it. This book addresses these aspects and more.
