Rediscovering Mcgills Heritage:

An Intellectual Heritage Ann-Marie Hansen, Kristin Neel, 2013 **Rediscovering McGill's Heritage** Joan Edward, Anastasia Onyszchuk, 1997-01-01 **This is Our Place, this is Our Home** Joan Edward, 2006 This collection of revealing journal entries and biographical sketches describes some of the island's most colourful inhabitants. Interspersed with line drawings it reflects the land's rugged grandeur and the people's enduring strength. **A Noble Roster** Ian C. Pilarczyk, McGill University. Faculty of Law, 1999 *The Rediscovery of America* Ned Blackhawk, 2023-04-25 A sweeping and overdue retelling of U.S. history that recognizes that Native Americans are essential to understanding the evolution of modern America. The most enduring feature of U.S. history is the presence of Native Americans yet most histories focus on Europeans and their descendants. This long practice of ignoring Indigenous history is changing however with a new generation of scholars insists that any full American history address the struggle, survival and resurgence of American Indian nations. Indigenous history is essential to understanding the evolution of modern America. Ned Blackhawk interweaves five centuries of Native and non-Native histories from Spanish colonial exploration to the rise of Native American self-determination in the late twentieth century. In this transformative synthesis he shows that European colonization in the 1600s was never a predetermined success. Native nations helped shape England's crisis of empire the first shots of the American Revolution were prompted by Indian affairs in the interior. California Indians targeted by federally funded militias were among the first casualties of the Civil War the Union victory forever recalibrated Native communities across the West. twentieth century reservation activists refashioned American law and policy. Blackhawk's retelling of U.S. history acknowledges the enduring power, agency and survival of Indigenous peoples yielding a truer account of the United States and revealing anew the varied meanings of America. *Rediscovered Self* Ronald Niezen, 2009-05-18 In a series of thematically linked essays Ronald Niezen discusses the ways new rights standards and networks of activist collaboration facilitate indigenous claims about culture adding coherence to their histories institutions and group qualities. Drawing on historical legal and ethnographic material on aboriginal communities in northern Canada Niezen illustrates the ways indigenous peoples worldwide are identifying and acting upon new opportunities to further their rights and identities. He shows how within the constraints of state and international legal systems activist lobbying strategies and public ideas and expectations indigenous leaders are working to overcome the injuries of imposed change political exclusion and loss of identity. Taken together the essays provide a critical understanding of the ways in which people are seeking cultural justice while rearticulating and at times re-dignifying the collective self. The *Rediscovered Self* shows how through the processes and aims of justice distinct ways of life begin to be expressed through new media formal procedures and transnational collaborations. **McGill University** Stanley Brice Frost, 1984-05-01 The appointment of John William Dawson as principal in 1855 brought modern ideas of education to Montreal and he imparted to the emerging institution his own deep

commitment to science The Molson Hall in 1862 the first Medical School on campus in 1872 the Redpath Museum in 1882 the Macdonald Physics Building the Redpath Library and the Macdonald Workman Engineering Building all in 1893 were the major external evidences of the great intellectual advances that had been made Equally the admission of women students in 1884 marked the immense social developments in Montreal society An early contribution to elementary teaching through the work of the McGill Normal School was followed by the institution of examinations for a far flung network of affiliated secondary schools and by the encouragement and supervision of local colleges By the time Dawson retired in 1893 McGill's influence was already reaching across the new Dominion of Canada and the university was ready to make the transition into the twentieth century

Professional Historians in Public Berber Bevernage, Lutz Raphael, 2023-07-24 The past decades public interest in history is booming This creates new opportunities but also challenges for professional historians This book asks how historians deal with changing public demands for history and how these affect their professional practices values and identities The volume offers a great variety of detailed studies of cases where historians have applied their expertise outside the academic sphere With contributions focusing on Latin America Africa Asia the Pacific and Europe the book has a broad geographical scope Subdivided in five sections the book starts with a critical look back on some historians who broke with mainstream academic positions by combining their professional activities with an explicit political partisanship or social engagement The second section focusses on the challenges historians are confronted with when entering the court room or more generally exposing their expertise to legal frameworks The third section focuses on the effects of policy driven demands as well as direct political interventions and regulations on the historical profession A fourth section looks at the challenges and opportunities related to the rise of new digital media Finally several authors offer their view on normative standards that may help to better respond to new demands and to define role models for publicly engaged historians This book aims at historians and other academics interested in public uses of history

The Lives of Lake Ontario Daniel Macfarlane, 2024-09-03 Lake Ontario has profoundly influenced the historical evolution of North America For centuries it has enabled and enriched the societies that crowded its edges from fertile agricultural landscapes to energy production systems to sprawling cities In The Lives of Lake Ontario Daniel Macfarlane details the lake's relationship with the Indigenous nations settler cultures and modern countries that have occupied its shores He examines the myriad ways Canada and the United States have used and abused this resource through dams and canals drinking water and sewage trash and pollution fish and foreign species industry and manufacturing urbanization and infrastructure population growth and biodiversity loss Serving as both bridge and buffer between the two countries Lake Ontario came to host Canada's largest megalopolis Yet its transborder exploitation exacted a tremendous ecological cost leading people to abandon the lake Innovative regulations in the later twentieth century such as the Great Lakes Water Quality Agreements have partially

improved Lake Ontario's health. Despite signs that communities are reengaging with Lake Ontario, it remains the most degraded of the Great Lakes with new and old problems alike exacerbated by climate change. The Lives of Lake Ontario demonstrates that this lake is both remarkably resilient and uniquely vulnerable. *The Politics and Rhetoric of Collective Remembering* John E. Richardson, Tommaso M. Milani, 2024-11-15. This book critically examines the ways that collective pasts are commemorated and contested in a wide variety of national locations, media, and genres. Collective remembering is a dynamic process through which narratives about the past about us and them, as well as beliefs, values, and affective conditions contained in these stories, are produced and reproduced. This facilitates room for not only the creation of unity but also the potential for contestation and conflict given that different interpretations of the past are often vehicles for opposing political interests. This book reflects the geographical breadth and empirical depth of the field of collective remembering. Foregrounding the idea that collective remembering always entails contestation, individual chapters explore the field of remembrance and its various genres, including murals, memorials, museums, newspaper reports, speeches, textbooks, tourist tours, and the work of community activists in countries as diverse as Australia, Germany, Hungary, Israel, Italy, Portugal, South Africa, the UK, and the USA. This volume will be of interest to advanced students and researchers in Critical Discourse Studies, Memory Studies, Rhetoric, and Communications. The chapters in this book were originally published in *Critical Discourse Studies*. Historical Dictionary of Methodism Jennifer Woodruff Tait, Christopher J. Anderson, 2024-11-05. Methodism, originally founded in the eighteenth century, has grown into a large and influential Protestant denomination. As of 2016, it claimed around 50 million adherents in 80 churches in more than 150 countries. Its history illuminates our understanding of modern culture, ethics, literature, politics, Christian mission, women's studies, and many related topics. *Historical Dictionary of Methodism*, Fourth Edition, contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 700 cross-referenced entries on important institutions, events, doctrines, and people who have contributed to the movement and to broader society in the three centuries since it was founded. This book is an excellent resource for students, researchers, and anyone wanting to know more about Methodism as a global movement. Mountains, Climate and Biodiversity Carina Hoorn, Allison Perrigo, Alexandre Antonelli, 2018-04-30. *Mountains, Climate and Biodiversity* A comprehensive and up-to-date synthesis for students and researchers. Mountains are topographically complex formations that play a fundamental role in regional and continental-scale climates. They are also cradles to all major river systems and home to unique and often highly biodiverse and threatened ecosystems. But how do all these processes tie together to form the patterns of diversity we see today? Written by leading researchers in the fields of geology, biology, climate, and geography, this book explores the relationship between mountain building and climate change and how these processes shape biodiversity through time and space. In the first two sections, you will learn about the processes, theory, and methods connecting mountain building and biodiversity. In the third section, you will read compelling examples from around the world exploring the links

between mountains climate and biodiversity Throughout the 31 peer reviewed chapters a non technical style and synthetic illustrations make this book accessible to a wide audience A comprehensive glossary summarises the main concepts and terminology Readership Mountains Climate and Biodiversity is intended for students and researchers in geosciences biology and geography It is specifically compiled for those who are interested in historical biogeography biodiversity and conservation
