**A Theory of Phonological Features** San Duanmu, 2016 This book outlines a system of phonological features that is minimally sufficient to distinguish all consonants and vowels in the languages of the world The extensive evidence is drawn from datasets with a combined total of about 1000 sound inventories The interpretation of phonetic transcriptions from different languages is a long standing problem In this book San Duanmu proposes a solution that relies on the notion of contrast X and Y are different sounds if and only if they contrast in some language He focuses on a simple procedure to interpret empirical data for each phonetic dimension all inventories are searched in order to determine the maximal number of contrasts required In addition every unusual feature or extra degree

of contrast is re examined to confirm its validity The resulting feature system is surprisingly simple fewer features are needed than previously proposed and for each feature a two way contrast is sufficient Nevertheless the proposal is reliable in that the notion of contrast is uncontroversial the procedure is explicit and the result is repeatable The book also offers discussion of non contrastive differences between languages sound classes and complex sounds such as affricates consonant glide units consonant liquid units contour tones pre nasalized stops clicks ejectives and implosives *Reading Asia* Frans Husken Huskin, Dick van der Meij, 2013-10-11 This volume presents a wide variety of articles in the broad field of Asian Studies covering the latest results of research within the social sciences and the humanities reflecting the rich diversity within these areas of research The contributions stem from research carried out by scholars who are or have been affiliated with the International Institute for Asian Studies Leiden Amsterdam Etymological Dictionary of the Kartvelian Languages Georgij A. published as appendices to the volume      Secondary Predication and Adverbial Modification Nikolaus P. Himmelmann, Eva F. Schultze-Berndt, 2006-09-28 Depictive secondary predicates such as raw in George ate the fish raw are central to current issues in syntactic and semantic theory in particular predication theory phrase structure theories issues of control and grammatical relations and verbal aspect This is the first book to approach depictive secondary predication from a cross linguistic perspective It describes all the relevant phenomena and brings together critical surveys and new contributions on their morphosyntactic and semantic properties It considers similarities and differences between secondary predicates and other types of adjuncts including adverbials of manner comparison quantity and location The authors are leading scholars with a first hand knowledge of the languages they discuss Their approach is theory neutral and pragmatic they draw on insights and research traditions ranging from the minimalist program to semantic maps methodology The book will interest scholars working on the semantics or syntax of secondary predicates adverbials and the role of agreement and other morphological marking It has been designed for use in advanced syntax and typology classes      **Finiteness** Irina

Nikolaeva, 2007-04-06 This book explores the nature of finiteness one of most commonly used notions in descriptive and theoretical linguistics but possibly one of the least understood Scholars representing a variety of theoretical positions seek to clarify what it is and to establish its usefulness and limitations In doing so they reveal cross linguistically valid correlations between subject licensing subject agreement tense syntactic opacity and independent clausehood show how these properties are associated with finiteness and discuss what this means for the content of the category The issues explored include how different grammatical theories represent finiteness whether the finite nonfinite distinction is universal whether there are degrees of finiteness whether the syntactic notion of finiteness has a semantic corollary whether and how finiteness is subject to change and how finiteness features in language acquisition Irina Nikolaeva opens the book by describing the history of finiteness and its place in current thinking and research She then introduces the chapters of the book comparing the authors perspectives and showing what they have in common The book is then divided into four parts Part I considers the role finiteness plays in formal syntactic theories and Part II its deployment in functional theories and as the subject of research in typology Parts III and IV look respectively at the finite nonfinite opposition in individual languages and at the role finiteness plays in linguistic change and linguistic development The book is written and structured to appeal to scholars and students of syntax and general linguistics at graduate level and above      Grammatical Agreement in Hindi-Urdu and Its

Major Varieties Pradeep Kumar Das, 2006      *The Evolution of Grammar* Joan Bybee, Revere Perkins, William Pagliuca, 1994-11-15 Joan Bybee and her colleagues present a new theory of the evolution of grammar that links structure and meaning in a way that directly challenges most contemporary versions of generative grammar This study focuses on the use and meaning of grammatical markers of tense aspect and modality and identifies a universal set of grammatical categories The authors demonstrate that the semantic content of these categories evolves gradually and that this process of

evolution is strikingly similar across unrelated languages Through a survey of seventy six languages in twenty five different phyla the authors show that the same paths of change occur universally and that movement along these paths is in one direction only This analysis reveals that lexical substance evolves into grammatical substance through various mechanisms of change such as metaphorical extension and the conventionalization of implicature Grammaticization is always accompanied by an increase in frequency of the grammatical marker providing clear evidence that language use is a major factor in the evolution of synchronic language states The Evolution of Grammar has important implications for the development of language and for the study of cognitive processes in general

**Correlatives Cross-linguistically** Anikó Klára Lipták, 2009

This volume brings together recent work in generative syntax on correlative relative constructions Greatly expanding on the Hindi oriented scope of previous studies it describes and analyzes correlative constructions in a range of languages such as Basque Dutch Hungarian Polish Sanskrit Serbo Croatian and Tibetan in comparison to correlativization in Hindi The articles zoom in on three areas of interest firstly the similarities and differences between correlatives and other wh and relative constructions secondly the derivation of correlative constructions and the position correlative clauses occupy in the host clause and thirdly the matching effects that characterize the pairings between relative phrases and demonstrative phrases The studies presented here will appeal to researchers and students with an interest in syntax in general and relativization strategies in particular
