Reform Of Direct Taxation:

The Structure and Reform of Direct Taxation (Routledge Revivals) James Meade, 2013-09-05 First published in 1978 The Structure and Reform of Direct Taxation presents the full findings and recommendations of the Meade committee set up by The Institute for Fiscal Studies It represents the most important contemporary examination of the structure of UK taxation and direct taxation systems in general The results of two years intensive research and discussion by this independent committee are presented as a report under the joint authorship of an outstanding team of tax experts The committee brought together professional practitioners lawyers accountants and taxation administrators and academic specialists in fiscal studies and here provides a unique review of direct taxation which is comprehensive singularly original and full of good sense The book begins with a return to first principles restates the objectives of a good tax system and analyses existing structures It goes on to examine the feasibility of basic reforms which would allow the system to become more straightforward in operation and which would base taxation on what individuals take out of the economy rather than on what they put into it

Tax Reform in Uganda Dorothy Kwagala-Igaga, 2016-12-14 In 1997 Uganda undertook extensive reforms in tax legislation This had been preceded by the structural reforms in tax administration that saw the creation of the Uganda Revenue Authority in 1991 The aim of the far reaching reforms was to improve the tax system and increase its revenue productivity This book demonstrates that the reforms were not as successful as anticipated and revenues have not improved in a sustained way The revenue from direct taxes only contributes about 20% to the total revenue well below the Sub Saharan average of 40% This has focused attention on the appropriateness of the reforms The focus of the reforms on achieving efficiency did not sufficiently take into account the fundamental importance of equity within the system As a result the Income Tax Act 1997 embodies distortions and inequalities in the treatment of taxable income and taxpayers that have led to inefficiency in the system as a whole The tax reforms also took a narrow technical view of the tax system The book employs political economy and optimal theory to explain the weaknesses in the tax system It is argued that the reforms although well designed were not likely to be successful given the timing and context of implementation The multidisciplinary and functionalist approach of the book is helpful in highlighting the constraints in which tax design and tax reform is undertaken in Uganda It is argued that the reforms were blunted by the manner of their formulation and context of implementation Taxation is a socio political issue and yet the IMF and World Bank which

supported the reforms did not take into account the limited political will The lack of consensus in policy formulation has weakened the socio contract and allowed the government to blame external factors for the poor performance The weaknesses in governance and corruption have had an impact on the tax system by encouraging tax avoidance and evasion among political elites as well as on activities in the informal sector

Tax Reforms and Fiscal Shock Smoothing
