Reform and Growth Ajay Chhibber, R. Kyle Peters, Barbara J. Yale, 2017 Although the quest for growth remains as elusive as it was more than a decade ago there is now much greater consensus on the policies and institutional changes that are needed to foster growth and economic development But debate continues on the timing sequencing and local adaptation of these reforms Furthermore although the benefits of reform are well documented the reasons as to why and when reforms occur still remain somewhat unclear Many countries go through long periods of stagnation or even decline without being able to create an environment for change while others seem able to break the hold of vested interests and start following paths of reform In October 2004 the Operations Evaluation Department OED of the World Bank held a conference on the Effectiveness of Policies and Reform This event provided a forum at which participants over 500 government officials civil society representatives and World Bank staff could discuss how to improve the effectiveness of World Bank support for development policies and reform programs Included in this volume are the contributions of distinguished development practitioners on issues such as the links between good performance and policy change how windows of opportunity can best be used to promote reform how ownership of policies and reform programs can be encouraged and how developed country policies can be improved to create a better global environment for development Provided by publisher

The Political Economy of Macroeconomic Policy Reform in Latin America Eduardo Wiesner, 2009-01-01 This book is a must read for anyone interested in policy reforms in Latin America The author combines tremendous experience in the field and deep knowledge of economic theory a rare combination Alberto Alesina Harvard University US One of the key contributions of this book is its insistence on the importance of policy institutional and political accountability for evaluating and enhancing macroeconomic performance and for reducing inequality John B Taylor Stanford University and Hoover Institution US Dr Wiesner combines a command of modern political and economic theories and detailed knowledge of Latin America to clarify why reform of policies and institutions has proved so difficult in that region His general conclusion is that initial conditions of inequality and poverty reduce the demand for reform but he finds that the process manifests itself differently in different countries He identifies several necessary conditions for breaking out of these vicious circles Scholars and practitioners alike can learn from his impressively thorough and detailed analysis Avinash K Dixit Princeton University US This book argues insightfully that underdevelopment is the result of the political economy difficulties some countries have in the effectiveness of public expenditures in general and of social pro poor expenditures in particular The policy implication is that reform strategies should focus on identifying the wrong political incentives in public expenditures Ricardo Hausmann Harvard University US Eduardo Wiesner's book makes an important contribution to the understanding of development by blending together the interdependent issues of i macroeconomic performance and volatility ii equity and distributive justice iii fiscal deficits and the redistributive effectiveness of social public expenditures and iv the demand for the right institutions and for policy reform in Latin America It does this by examining recent macroeconomic crises from a political economy perspective and finds that information is the critical algorithm that links together the demand for macroeconomic stability macroeconomic performance and ultimately distributive justice This volume is geared toward those interested in the political economy of development and policy reform in general and in Latin America including academics policy makers and the general reader

Jumpstarting South Asia Pradumna B. Rana, Wai-Mun Chia, 2017-12-28 Jumpstarting South Asia focuses on the slowing pace of economic growth and makes the case for a two pronged strategy to jumpstart South Asian economies South Asian countries should complete the economic reform process that they had begun in the 1980s and the early 1990s and implement the more microeconomic reforms namely the sectoral and governance and institutional reforms to enhance competition and improve the operation of markets They should also implement the second round of Look East policies or LEP2 to link themselves to production networks in East Asia their fastest growing market and develop production networks in manufacturing and services within their region This book argues that the proposed strategy will lead to a win win situation for all countries in South Asia and East Asia and also reinvigorate economic integration within South Asia The book identifies the remaining policy agenda for each South Asian country

Foreign Aid and the Future of Africa Kenneth Kalu, 2018-05-22 During the past five decades sub Saharan Africa has received more foreign aid than has any other region of the world and yet poverty remains endemic throughout the region As Kenneth Kalu argues this does not mean that foreign aid has failed rather it means that foreign aid in its current form does not have the capacity to procure development or eradicate poverty This is because since colonialism the average African state has remained an instrument of exploitation and economic and political institutions continue to block a majority of citizens from meaningful participation in the economy Drawing upon case studies of Angola Cameroon Chad Equatorial Guinea Democratic Republic of the Congo and Nigeria this book makes the case for redesigning development assistance in order to strike at the root of poverty and transform the African state and its institutions into agents of development

What's Wrong with Rights? Radha D'Souza, 2018-01-20 Through mapping the rights discourse and the transformations in transnational finance capitalism since the world wars and interrogating the connections between the two Radha D Souza examines contemporary rights in theory and practice through the lens of the struggles of the people of the Third World their experiences of national liberation and socialism and their aspirations for emancipation and freedom Social movements demand rights to remedy wrongs and injustices in society But why do organisations like the World Bank and IMF the G7 states and the World Economic Forum want to promote rights Activists and activist scholars are critical of human rights in their diagnosis of problems But in their prognosis they reinstate human rights and bring back through the backdoor what they dismiss through the front Why are activists and activist scholars unable to let go of human rights Why do indigenous peoples find the need to invoke the UN Declaration on Rights of Indigenous People to make their claims sound reasonable Are rights in the 20th and 21st centuries the same as rights in the 17th and 18th centuries This book examines what is entailed in reducing rights to human rights and in the argument our understandings of rights are better than theirs that is popular within social movements and in critical scholarship
