Men of Their Words Nigel Harkness, 2017-12-02 Whereas the centrality of femininity to nineteenth century French fiction has been the focus of widespread critical attention masculinity has until recently received little sustained treatment in either the literary or socio historical domains In this book Nigel Harkness uses the fiction of George Sand 1804 1876 the pre eminent woman writer of the period to explore questions of masculinity as they pertain to the nineteenth century French novel and to map out new approaches to the study of literary masculinity Drawing on contemporary theories of gender and narrative Harkness reveals how Sands novels repeatedly focus on a nexus of language masculinity and power in which narrative is both a vehicle for the expression of manhood and a site where masculinity is discursively performed Masculinity is thus reconfigured in Sands fiction as an identity constituted as much through words as through actions Analysis of the performances of masculinity staged in Sands novels opens onto an exploration of gendered processes of literary representation the links between masculinity and the doxa the equation of writing and power the homosocial function of acts of narration and the masculinity of authorship and authority

Masculinity in the Modern West Christopher E. Forth, 2008-09-16 Across the Western world, crisis is the word most commonly used to describe the state of masculinity today, but how new is this idea? Can we identify a time when masculinity was actually stable and secure? *Masculinity in the Modern West* engages with these questions by examining how traditional ideals about male physical prowess have clashed with the lifestyle changes that accompanied the rise of modern civilization since 1700. In countries like America, Britain, France, Germany, and Russia, modernity bolstered male dominance in commerce, politics, technology, and the world of ideas, yet images of masculinity have continued to be haunted by the negative effects that polite, cerebral, consumerist, and sedentary lifestyles might have on the minds and bodies of men. Modernity thus exercises a double logic that supports male privilege while diminishing the physical difference used to legitimate that privilege. By focusing on the male body, this wide-ranging study proposes that crises of masculinity may be structural and thus inescapable features of life in our world.

Young Black Street Masculinities Brendan King, 2022-02-12 This book describes how young Black men on a disadvantaged housing estate in London navigate the estate's expectations for their behaviour as they operate within a street code that endorses violence, knife carrying, and challenging masculinity. This street code informs the men's masculine identities by promoting values of misogyny, violence, and the possession of expensive material objects while subduing any performance or features deemed as weak or feminine. Chapters detail the daily pressure on young men to gain respect and perform the estate's street code while also providing examples of young men who have escaped or rejected its influence. King also outlines how youth workers can support those trapped by the estate's street code by embodying personalised or caring masculinity features that seek to transform the dominant masculinity.
