Nikiforos Diamandouros, Richard Gunther, 2001-06-11 In the acclaimed *Politics of Democratic Consolidation* Nikiforos Diamandouros Richard Gunther and their co authors showed how democratization unfolded in Greece Italy Portugal and Spain culminating in consolidated democratic regimes This volume continues that analysis posing the basic question What kind of democratic politics emerged in those countries It presents systematic analyses of the basic institutions of government and of the dynamics of electoral competition in the four countries set in comparative context alongside several other democracies as well as detailed studies of the evolution of the major parties their electorates their ideologies and their performances in government over the past twenty years The authors reach two major conclusions First the new democracies salient features are moderation centripetalism and the democratization of erstwhile antisystem parties on the Right and Left Second no single Southern European model has emerged the systems differ from one another about as much as do the other established democracies of Europe Contributors P Nikiforos Diamandouros University of Athens Richard Gunther Ohio State University Thomas C Bruneau Naval Postgraduate School Monterey Arend Lijphart University of California at San Diego Leonardo Morlino University of Florence Risa A Brooks Stanford University Jos R Montero Autonomous University of Madrid Giacomo Sani University of Pavia Paolo Segatti University of Trieste Gianfranco Pasquino University of Bologna Takis S Pappas College Year Athens Hans Jrgen Puhle Goethe University Frankfurt am Main Anna Bosco University of Trieste

The Dynamics of Democratization Geoffrey Pridham, 2001-01-01 A systematic comparison of three cases of democratization and regime transformation in Europe since 1945 this book highlights diversities of historical context

Inequality After the Transition Ekrem Karakoç, 2018 This book discusses the origins and trajectories of political parties welfare policies and income inequality and how the former two affects the latter *Democratization* Laurence Whitehead, 2002 Democratization has swept the globe over the past generation and analysts and policy makers have been struggling to keep up Bookshelves have been filled with case studies and assessments of this kaleidoscope of experiences and a related scholarly community has developed seeking to systematize all this material in accordance with well defined schemas and causal models But experience keeps wrong footing the country analysts so in this fresh interpretation the author goes back to foundational issues He argues that democratization is best understood as a complex long term dynamic

and open ended process extending over generations Standard models of causal explanation need to be supplemented by more interpretative approaches Basic questions of citizen security the nature of public accountability and the role of money as a source of political power need reconsideration The delicate balance between monetary authority and democratic consent is also examined in the light of the financial crises that have afflicted so many new democracies This book proposes a range of new perspectives on the complex linkages between democratization and state formation on the logic of paired comparisons and comparisons between large regions of the world and on the relationship between democratic ideals and really existing democratic outcomes It aims to equip those caught up in democratization and democracy promotion with a more realistic understanding of the tensions and turbulence involved

Political Parties Richard Gunther, José Ramón Montero, Juan Linz, 2002-03-07 This book with contributions from leading scholars in the field presents a critical overview of much of the recent literature on political parties It systematically assesses the capacity of existing concepts typologies and methodological approaches to deal with contemporary parties It critically analyses the decline of parties literature both from a conceptual perspective and with regard to antiparty attitudes among citizens on the basis of empirical analyses of survey data It systematically re examines the underpinnings of rational choice analyses of electoral competition as well as the misapplication of standard party models as the catch all party Several chapters reexamine existing models of parties and party typologies particularly with regard to the capacity of commonly used concepts to capture the wide variation among parties that exist in old and new democracies today and with regard to their ability to deal adequately with the new challenges that parties are facing in rapidly changing political social and technological environments In particular two detailed case studies demonstrate how party models are significant not only as frameworks for scholarly research but also insofar as they can affect party performance Other chapters also examine in detail how corruption and party patronage have contributed to party decline as well as the public attitudes towards parties in several countries In the aggregate the various contributions to this volume reject the notion that a decline of party has progressed to such an extent as to threaten the survival of parties as the crucial intermediary actors in modern democracies The contributing authors argue however that parties are facing a new set of sometimes demanding challenges Not only have parties differed significantly in their ability to successfully meet these challenges but the core concepts typologies party models and methodological approaches that have guided research in this area over the past 40 years have met with only mixed success in adequately capturing these recent developments and serving as fruitful frameworks for analysis This book is intended to remedy some of these shortcomings

The Politics and Memory of Democratic Transition Diego Muro, Gregorio Alonso, 2010-11-23 Designed to evaluate the paradigmatic view of the Spanish transition as an ideal model for political and social change this new and innovative volume appraises Spain's movement to democracy from a variety of important perspectives

The Protection and Promotion of Human Security in East Asia B. Howe, 2013-10-01 Although many of the states of East Asia have achieved startling success

not all have benefited from the region's development. Many of the most vulnerable sections of East Asian populations still face tremendous challenges in their daily lives, have yet to enjoy the rewards of the Asian Century and may even be further imperiled as a result of the forces of development. Brendan Howe examines the measurements of success in East Asian development and governance from a human-centered perspective. He assesses obstacles to the protection and promotion of human security and development through detailed case studies of the most challenged states in the region, including Burma, Timor-Leste, Japan, and North and South Korea. He looks at the roles that East Asian actors can play and have been playing in protecting and promoting human security at the theoretical and practical level.

Ideology and Identity Pradeep K. Chhibber, Rahul Verma, 2018-08-24 Indian party politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of ideology is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism, the extent to which the state should dominate and regulate society, and recognition of whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

Economics of War and Peace Ben Goldsmith, Jurgen Brauer, 2010-06-14 Presents the research on economic factors affecting peace and war. This title includes theoretical perspectives on the economic foundations of peace, violence, and war within countries; connections between international trade and interstate conflict; and the role of legal and institutional factors in international and internal conflict.

Mapping Value Orientations in Central and Eastern Europe Loek Halman, Malina Voicu, 2010-11-11 This volume elaborates on a number of issues that seem particularly important for the people in Central and Eastern Europe: the development and working of democracy; the public support for legitimacy and efficacy of democracy; and the free market economy and, of course, the stability of the newly established political culture.

The 1999-2000 Elections in Russia Vicki L. Hesli, William M. Reisinger, 2003-08-18 Sample Text

Democratic Consolidation in Eastern Europe: Volume 2: International and Transnational Factors Jan Zielonka, Alex

Pravda, 2001-06-14 This is the second volume in a two-volume series of books on democratic consolidation in Eastern Europe. The first volume focused on the issue of institutional engineering. This second volume analyses the external parameters of democratic consolidation in thirteen Eastern European countries: how different international actors and various economic, cultural, and security types of transnational pressures have shaped democratic politics in the region. The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years. The volume tries to avoid complex debates about definitions, methods, and the uses and misuses of comparative research. Instead, it seeks to

establish what has really happened in the region and which of the existing theories are helpful in explaining these developments. The volume is divided into two parts. The first part presents a conceptual and comparative frame of analysis; the second consists of detailed studies of individual countries undergoing democratic consolidation. Case study chapters deal with the following countries: Estonia and Latvia, Hungary, Poland, the Czech Republic, Slovakia, Romania, Bulgaria, and Macedonia; the states of former Yugoslavia, Belarus, and Ukraine; and finally Russia. The concluding chapter identifies a set of variables responsible for the enormous impact of external factors on democratic consolidation in Eastern Europe. It conceptualises the interplay of internal and external factors impinging upon democracy and shows the interplay of different positive and negative types of external pressures. It also evaluates the conscious Western effort to craft or engineer democracy in Eastern Europe.

The Legacies of Law Jens Meierhenrich, 2008-10-13. Focusing on South Africa during the period 1650-2000, this book examines the role of law in making democracy work in changing societies. *The Legacies of Law* sheds light on the neglected relationship between path dependence and the law. Meierhenrich argues that legal norms and institutions, even illiberal ones, have an important and hitherto undertheorized structuring effect on democratic outcomes. Under certain conditions, law appears to reduce uncertainty in democratization by invoking common cultural backgrounds and experiences. In instances where interacting adversaries share a law reasonably convergent mental model, transitions from authoritarian rule are shown to be less intractable. Meierhenrich's historical analysis of the evolution of law and its effects in South Africa during the period 1650-2000, compared with a short study of Chile from 1830-1990, shows how and when legal norms and institutions serve as historical causes to both liberal and illiberal rule.

Democracy, Intermediation, and Voting on Four Continents Richard Gunther, Hans-Jürgen Puhle, José R. Montero, 2007. This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents. It is based on national election surveys held in old and new democracies in Europe (Germany, Britain, Spain, Greece, Italy, Portugal, Bulgaria), North and South America (the United States, Chile, and Uruguay), and Asia (Hong Kong) between 1990 and 2004. It is methodologically innovative notwithstanding the fact that its core concern with political intermediation, i.e., the flow of political information from parties and candidates to voters through the mass communications media, membership in secondary associations, and direct face-to-face contacts within interpersonal networks, was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s. In addition to reviving that long neglected analytical framework, this book breaks new ground by systematically exploring the impact of socio-political values on electoral behavior. It also analyzes the role of political intermediation in forming basic attitudes towards democracy, which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior. Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior. So too are socio-political

values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project

Democracy's Voices Robert M. Fishman, 2018-07-05 Building on one of sociology's core ideas that social ties can shape collective outcomes *Democracy's Voices* shows that connections across class boundaries can remake public rhetoric and thus the quality of democratic life Robert M Fishman takes up a question of enduring significance to people concerned with the quality of democratic public life focusing on why political rhetoric proves engaging and broadly relevant or disengaging and narrow The answer to that question he argues is to be found not only in the deeds of prominent politicians and the nature of official institutions but also in the existence and the character of social connections among ordinary citizens Fishman's book based on long term fieldwork and systematic survey research in Spain identifies the special contribution to democratic quality made by conversations between intellectuals and workers Fishman focuses on what he calls the discursive horizons of local leaders and communities the actual location of the problems and proposed remedies articulated in political rhetorics *Democracy's Voices* shows how the subcultural context of social ties may accentuate or diminish their power to reshape rhetorics Fishman argues that conversations are able to remake public rhetorics whereas ties that take the form of brokerage lack that ability The book also offers a general critique of social capital theory and argues that the full ability of social ties to shape collective outcomes can only be observed when one distinguishes in useful ways among types of ties

Power, Money, and Media Jinquan Li, 2000 This book addresses as few books in English have a broad range of topics pertaining to China's expanding media and telecommunications systems American and Chinese experts in journalism communication government and political science use fieldwork including participant observations surveys and in depth interviews conducted within media organizations to provide richly detailed analyses of the issues and of the changing face of media in China

Global Histories of the Portuguese Revolution Luís Trindade, Rita Lucas Narra, Ricardo Noronha, Pedro Ramos Pinto, 2025-05-29 The Portuguese revolution marked the closure of the country's five centuries of imperial history as well as its 48 year authoritarian period a dramatic moment of political radicalization and social conflict that took place against the backdrop of rapid social transformation in an increasingly globalised world This collection goes beyond the limits of national history to locate the revolution at the intersection of transnational historical phenomena such as the long 1960s the Cold War the emergence of the Third World and postwar modernization Foregrounding the complex geographies and chronologies of semi peripheral Portugal this book combines its status as the centre of a global Empire with its subaltern position in Europe Offering a new global approach to this still understudied event chapters explore transnational socialist and grassroots forms of solidarity processes of global communication and Cultural Revolution decolonization feminism and socio economic transformations to offer a non Eurocentric global history from within Europe itself
