Selvanathan, 2024-07-05 This book analyzes consumption patterns in Asian countries that are at different stages of economic development and highlights the similarities and disparities of consumption patterns across countries using a system wide framework In a departure from previous studies in the literature which mainly present only single country analysis this book aims to provide a comprehensive analysis of cross country consumption patterns considering several Asian countries using the most recent consumption expenditure data for aggregate commodity groups In comparing consumption patterns across countries the book use unit free measurements such as budget shares and changes in logarithms of price and quantities thus avoiding problems associated with exchange rate conversions The book also analyses the dynamic behaviour in the consumption patterns of the Asian consumers The findings of this book will be invaluable to researchers in development economics as well as policymakers in the formulation of fiscal policy or other types of economic control

*A System-Wide Analysis of International Consumption Patterns* S. Selvanathan, 2012-12-06 The modern system wide approach to applied demand analysis emphasizes a unity between theory and applications Its firm foundations in economic theory make it one of the most impressive areas of applied econometrics This book presents a large number of applications of recent innovations in the area The database used consist of about 18 annual observations for 10 commodities in 18 OECO countries more than 3 100 data points Such a large body of data should provide convincing evidence one way or the other about the validity of consumption theory

**A PREVIEW OF THE BOOK** The overall importance of the analysis presented in the book can be seen from the following table which shows the significant contribution of the OECO to the world economy As can be seen the 24 member countries account for about 50 percent of world GOP in 1975 In this book we present an extensive analysis of the consumption patterns of the OECO countries

consumption patterns of food in general and soft drinks in particular In addition the book provides a detailed analysis of the consumption restrictions and regulations in place in various countries in relation to issues associated with taxation availability and marketing of these products The book s focus is on rigorous empirical analysis and presents the estimates of demand elasticities of these five commodities across different countries Such estimates are key inputs for government economic models that are used for the purpose of social policy analysis Furthermore the book presents hypothesis testing results on various demand theory hypotheses such as demand homogeneity and Slutsky symmetry Quantitative Econometrics ,1998 Household Demand for Consumer Goods in Developing Countries Eliyathamby A. Selvanathan,Saroja Selvanathan,Maneka Jayasinghe,2022-11-04 This book analyses the household demand for consumer goods using a diverse database consisting of 45 developed and developing countries Household consumption patterns have undergone dramatic changes due to rapid economic growth increasing household income and changing demographics Using the most recent data available and the latest econometric techniques the authors model demand for 12 different commodities such as food alcohol and tobacco housing health transport health communication and recreation and provide insightful comparisons of consumption patterns in developed and developing countries The analysis presented in this book highlights valuable policy insights for planning government budgetary allocations and implementing policies towards an enhanced standard of living for people The book also provides some important guidance for researchers interested in the theory and empirical application of the analysis of consumer demand **Economics and Marijuana** Kenneth W. Clements,Xueyan Zhao,2009-11-05 A fascinating analysis of a widely used but little understood illicit drug Index Numbers D.S. Prasada Rao,E.A. access to up to date and comprehensive knowledge of the social sciences      **World Consumption Economics** Dongling Chen,1999-12-13 This book extends research in consumption economics by identifying similarities and differences in consumption patterns in a large number of countries both developed and less developed Its approach is to carefully analyze a large body of data from a highly diverse group of countries to determine the extent to which a simple economic framework can be used to understand and explain consumer behavior It uses data from more than 40 countries which range from the most affluent to the poorest in the world The book pays particular attention to the consumption of food and to new simulation techniques applied to systems of demand equations      **Contributions to Consumer Demand and Econometrics** Ronald Bewley,1992-06-18 Contains essays on consumer demand and econometrics written in honour of Professor Henri Theil The essays report the results of current pioneering research work and cover a variety of topics including inequality tests mixing forecasts and dynamic panel data models      **Australian National Bibliography** ,1995      **APAIS 1992: Australian public affairs information service** ,      **Studies in Global Econometrics** H. Theil,2007-07-11 Studies in Global Econometrics is a collection of essays on the use of cross country data based on purchasing power parities The two major applications are the development over time of per capital gross domestic products including that of their inequalities among countries and regions and the fitting of cross country demand equations for broad groups of consumer goods The introductory chapter provides highlights of the author s work as relating to these developments One of the main topics of the work is a system of demand equations for broad groups of consumer goods fitted by means of cross country data These data are from the International Comparison Program which provides PPP based figures for a number of years and countries Similar data are used for the measurement of the dispersion of national per capita incomes between and within seven geographic regions      **International Evidence on Consumption Patterns** Henri Theil,Ching-Fan Chung,James L. Seale,1989 Part I Studies of consumer and worker behavior Part II Studies in econometric theory      Bibliographie der Wirtschaftswissenschaften ,1994      **The British National Bibliography** Arthur James Wells,1994      **Proceedings** ,1994      Bibliographic Index ,1994
