Regional Economic Cooperation in Central Asia Asian Development Bank,1998 **Technical Assistance for Regional Economic Cooperation in Central Asia (Phase II).** Asian Development Bank,1998 **The Experience with Regional Economic Cooperation Organizations** Johannes F. Linn,2008 Since the collapse of the Soviet Union Central Asia has witnessed repeated efforts to strengthen regional integration through cooperation with the establishment of a number of regional organizations with Central Asian participation In this paper we review the experience with regional cooperation initiatives and organizations in Central Asia and the rest of the world Using a typology of regional organizations that we have developed for this paper we review the functions and performance of selected regional organizations and compile evidence more generally on the experience with regional cooperation around the globe Based on this we draw some lessons to help Central Asian countries their partners and their regional organizations respond effectively to the opportunities and challenges of regional cooperation and integration Central Asian countries need to realize that effective cooperation is not easy It takes time and requires a flexible constructive approach of all major partners It also requires effective leadership by key countries institutions and individuals and a careful selectivity for membership and for the mandate of the organization Where multiple regional organizations overlap in membership and mandate it is essential to address the risk of costly duplication The paper concludes with an assessment of the specific implications for the Central Asia Regional Economic Cooperation Program CAREC Strengthening Central Asia Regional Economic Cooperation, 2007-2009 Asian Development Bank,2007 *Technical assistance for regional economic cooperation in central Asia* Asian Development Bank,1998 Technical Assistance for Regional Economic Cooperation in Central Asia ,1996 Technical assistance for regional economic cooperation in central Asia (phase II -year three). Economic Integration in Central Asia Regional Economic Cooperation Member Countries Muhammad Ayub Mehar Khan,2020 The nexus of the modes of financing trade and transport related infrastructure quantum of trade activities and economic growth is the core area of this paper It covers the impacts of regional economic integration of Central Asia Regional Economic Cooperation CAREC member countries on their trade and GDP growth Though several bilateral and multilateral agreements to boost mutual trade are considered as a measure of economic integration in the absence of high quality physical infrastructure of transport and logistic services the implementation of such agreements is not possible So the provision of good trade and transport related logistic services has been taken as a key indicator of integration among the countries in the region The role of the magnitudes and modes of financing in determining the provision of logistic services and transport related infrastructure has also been covered in the study The results emphasize the causal relations between trade and transport related infrastructure and GDP growth The most important conclusion is the identification of short term external borrowing as the most effective mode of financing The study does not recommend long term external borrowing or multilateral borrowing for the development of trade and transport related infrastructure The strong significant and robust impact of the share of short term borrowing in total external debt on GDP growth exports and infrastructure development indicates the pressure on policy makers and economic managers to utilize resources effectively and efficiently The global financial architecture should focus on the provision of short term lending facilities to improve the efficiency of developing projects

Central Asia Regional Economic Cooperation Corridor Performance Measurement and Monitoring Asian Development Bank,2014-11-01 This report describes how Central Asia Regional Economic Cooperation CAREC corridor performance measurement and monitoring CPMM helps to achieve the objectives of the CAREC Transport and Trade Facilitation Strategy and its Implementation Action Plan It presents the CPMM methodology and discusses the roles and responsibilities of key stakeholders especially the private sector It highlights ongoing efforts to provide accurate and reliable indicators despite the challenges of measuring corridor performance in the CAREC context The extensive depth of data collected and the richness of information that CPMM has been providing since 2009 supports detailed policy analysis and formulation Trade facilitation indicators have been developed to inform CAREC s Development Effectiveness Review These indicators provide a basis of comparison or benchmarking of one location border crossing point or corridor segment against another in terms of i the efficiency of border management agency policies and procedures in regulating trade ii infrastructure quality and in due

course iii the quality and performance of trade logistics service providers The four indicators include the standard measures of time and cost as the main components Selected corridor performance data are then analyzed to identify the physical and non physical barriers to trade and transit traffic encountered at specific locations helping to pinpoint the causes of excessive delays and costs With this study ADB underscores the value of CPMM for CAREC countries and for countries participating in other subregional programs as they craft policies and consider investments to facilitate trade **Technical Assistance for Central Asia Regional Cooperation in Trade, Transport, and Transit** B.
