Regional Integration The West European Experience:

Regional Integration William Wallace, 2000-08-21 The European Union is the oldest and most highly developed example of institutionalized regional integration Since its establishment in the early 1950s the EU has moved from the shallow integration of dismantling trade barriers to the deep integration of accepting common policies on agriculture environment transport and working conditions common rules on competition mergers and financial transfers and common laws in the domestic courts of member states The EU experience is a successful example of integrating national economies but how far should those promoting regional integration in the Western Hemisphere and the Pacific look to the EU as a model Can regional and global integration proceed harmoniously Or will tensions between regional and global priorities unavoidably arise This book part of the Integrating National Economies series examines the evolution of West European integration over the past forty years William Wallace analyzes the historical circumstances under which the institutions of integration developed and the internal tensions and contradictions created by the deepening of integration and repeated enlargements He explains that in recent years deep integration has presented a challenge to national identity forcing policymakers to confront issues of sovereignty political commitment and regional balance Wallace concludes that the European experience provides a number of important cautionary lessons for those promoting regional integration in the Western Hemisphere and the Asia Pacific region However it does not offer a model that these areas can easily follow Wallace emphasizes that the experience of West European economic integration during the cold war years will do little to reconcile global and regional integration in the post cold war world the political and security concerns are no longer the same He contends that the international community must develop rules for the new global order witho The EU's Experience in Integration Lisheng Dong, Günter Heiduk, 2007 The thirteen ASEAN 3 countries are inching forward toward closer economic cooperation Can the European Union serve as a model for this Asian interregional integration process Although there are common cultural threads running through all ASEAN 3 countries these countries have not so far envisaged themselves forming a political and supra national legal community similar to the EU Nevertheless the EU as innovator and forerunner offers Asia an unparalleled road map to further regional integration Where are the boundaries of the European Model What form will Asian economic cooperation take Asian and European scholars discussed these and other pressing questions on the invitation of the EU China European Studies Centres Programme ESCP at a conference entitled The EU s Experience in Integration A Model for ASEAN 3 held in Shanghai in January 2006 Their findings are presented in this collection of fifteen papers on politics economics and history of the two regions **Comparative Regional Integration** Finn Laursen, 2016-12-05 This volume features up to date studies of regional integration efforts in all major parts of the world especially North America South America and East Asia Comparisons are drawn between these efforts and those made in the EU where integration has progressed much further The book asks what explains the variation in achievements What kind of agreements and

A Handbook on the Ecowas Treaty and Financial Institutions Maiyaki, 2012-09-14 The inspiration to write on the ECOWAS Treaty and the role of financial institutions derived from the apparent and unabated efforts of the various governments in the West African subregion to find solutions to the inexplicable sufferings and underdevelopment of the region and its people in the face of abundant but untapped human and natural resources The strategy of integration has been employed by other jurisdictions some of them more developed as an option in addressing the forgoing challenges So many years after the establishment of ECOWAS the dream is far from being attained Given the critical financial engagements inherent in the ECOWAS integration strategy it is considered desirable that the treaty is rationalized to accommodate a wider role for financial institutions within the control of a supra national framework

Regionalism, Globalisation and International Order Jens-Uwe Wunderlich, 2016-03-23 New regionalism and globalization have been

prominent themes in academic and political debates since the beginning of the 1990s. Despite the considerable amount of scholarly attention that the new regionalism has received in recent years, its full empirical and theoretical potential has yet to be fully investigated. This illuminating study provides an overview of new avenues in theorizing regionalism and proposes a consolidated framework for analysis and comparison. Offering a comparative historical perspective of European and Southeast Asian regionalism, it presents new and imaginative insights into the theory and practice of regionalism and the links between regional developments, globalization and international order.

New Regionalism and the European Union Alex Warleigh-Lack, Nick Robinson, Ben Rosamond, 2011-06-01. The debates on regionalism have been polarized between European Union (EU) scholars and non-EU scholars with the assumption being that regionalism within the EU and other regions of the world are quite distinct with little to be learnt from dialogue with each other. This book challenges such assumptions and calls for a genuine debate between scholars of regionalism. This book demonstrates that more can and needs to be learned about

regional integration all over the world through comparison and reflection on specific regional trends Beginning with a theoretically driven introduction leading experts in the field are brought together to offer a series of case studies on regional integration within Latin America Africa Asia North America and Europe In Part III the authors investigate the links between the EU and selected other regional organisations and processes exploring the dynamics through which these interregional relations are developing and the implications they have for the study of contemporary regionalism regionalisation both inside and beyond the continent of Europe The conclusions set out a challenging research agenda for comparative studies in the field Addressing one of the under explored aspects of EU studies the EU s coexistence with other pan continental regional organisations in the European continent this book will be of interest to students and scholars of regionalism IPE European Studies and international politics African Regional Organizations Domenico Mazzeo,1984 Essays examine security political financial and economic organizations in Africa and discuss the problems and prospects of each group

Contemporary Europe William Outhwaite,2016-10-04 Europe is one of the most dynamic and interesting areas of the world pioneering in the European Union a new form of governance for half a billion people represented in the world s first directly elected transnational parliament This book situates the European Union in a broader European global historical and geographical context providing a readable presentation of the most important facts and drawing on the theoretical approaches which have transformed the study of contemporary Europe over the past two decades The European Union is still on the road to what has been called an unknown destination and this book presents its economic political legal and social trajectory from the middle of the last century to the present Contemporary Europe covers some of these issues in an interdisciplinary framework aiming to situate the development of the European Union in a broader context of pan European and global processes Europe has been cut down to size but it does not have to become a global backwater and the study of contemporary Europe s institutional reality does not have to be boring The book counter this misperception conveying the essential facts and theories of contemporary European reality in a clear and approachable analysis It will serve as a readable introduction both to the academic field of European studies and to contemporary Europe itself *International Law: Theory and Practice* Karel Wellens,2023-12-04
