 - For example, EU and NAFTA
- Multilateralism
 - Non-discriminatory basis of the World Trade Organization (WTO)
 - Trade liberalization policies by any member countries are extended to all other members

Multilateralism and Regionalism in Global Economic Governance Junji Nakagawa, 2012-03-29 Reconciling regionalism and multilateralism is a challenge common to all branches of global economic governance While the Bretton Woods GATT WTO institutions decades old multilateral framework for global economic governance are facing serious challenges to their effectiveness regional framework are emerging as complementary or alternative means of global economic governance The real challenge is how to reconcile multilateralism and regionalism in global economic governance This book tackles this problem by analysing issues of multilateral regional conciliation and coordination in global economic governance focusing on Asia Chapters of the book deal with challenges of multilateralism and regionalism in three fields of global economic governance namely global monetary financial governance global trade governance and global investment governance The major regional focus is on Asia though some chapters deal with regionalism in Europe and North America Topics include Asian Monetary Fund and Asian financial architecture open accession provisions of regional trade agreements and APEC's role in multilateral investment rules As a whole the book elucidates the contemporary reach of Asian regionalism in global economic governance and shows the neat balance between regionalism and multilateralism in global economic governance It is of particular use to the students and practitioners of international economic law international political economy international finance and international economics both with and without Asian focus

Multilateralism, Regionalism and Bilateralism in Trade and Investment Philippe De Lombaerde, 2007-08-26 Global governance is a concern of not only global organisations but also of all individual states and of regional co-operation agreements among sovereign states In 2001 the United Nations University has launched UNU CRIS a research and training programme on comparative regional integration to study the role of regional integration in global governance The present first volume of the World Report on Regional Integration is a timely product of the research undertaken at UNU CRIS This new series of World Reports will certainly contribute to the discussion on the interaction between regional and global governance And by bringing together insights from different parts of the UN system in particular the five UN regional economic commissions and UNCTAD this report will also contribute to a better understanding of the role of regions in the UN Hans van Ginkel Under Secretary General of the United Nations and Rector of UNU The World Report on Regional Integration brings together a well balanced mix of economic analysis facts and political perspectives on the topic of regional integration The most valuable and unique contribution of this volume is the enhanced clarity it brings to the complex picture of trade and investment integration the entanglement of which points to the need for more effective regional governance as a building block of multilateral

governance in this area As the world s most dynamic trading region Asia and the Pacific is a key player in this process and the UNESCAP secretariat in its service to the region will continue to accord high priority to this policy objective Kim Hak Su Under Secretary General of the United Nations and Executive Secretary of UNESCAP

Regionalism, Multilateralism, and Deeper Integration Robert Z. Lawrence, 2000-07-26 Over the past decade international economic liberalization has been pursued through both multilateral and regional arrangements In the Uruguay Round more than one hundred governments pledged their commitment to greater open trade in goods and services and established new rules under the enforcement of the World Trade Organization At the same time however many regional arrangements have been negotiated including the European Union and the North American Free Trade Agreement Nonetheless controversy still rages about these arrangements Are regional arrangements stumbling blocks or in fact building blocks for a more integrated and successful international economy In this book Robert A Lawrence addresses this question and explains both sides of the debate A volume of Brookings Integrating National Economies Series

Regionalism, Multilateralism, and the Politics of Global Trade Donald Barry, Ronald C. Keith, 1999 The essays in this volume reflect the current debate about whether the new regionalism and interregional politics of the last decade support or undermine the global trading system Political scientists and international relations scholars from North America examine the changing relationship between regionalism and multilateralism and discuss the implications for national policy in the globalized economy The essays are arranged into four categories covering regionalism globalism and the state the dynamics of regional integration interregional relations and the policy implications particularly for Canada Annotation copyrighted by Book News Inc Portland OR

Multiregionalism and Multilateralism Sebastian Bersick, W. A. L. Stokhof, Paul Velde van der, Benedikt Seemann, 2006 The sovereign power of the nation state has been steadily eroding for decades under the pressure of multilateral organizations such as the United Nations and multiregional organizations such as the European Union The increasing prominence of non governmental organizations such as Greenpeace and Human Rights Watch in times of crisis has also contributed since the problems such groups address often extend beyond national borders and are thus difficult for national governments to manage alone Multiregionalism and Multilateralism investigates these forces as they factor into political and economic relations between Asia and Europe

Alan Winters, 1999 November 1996 Do the forces that regional integration arrangements set up encourage or discourage a trend toward globally freer trade We don t know yet The literature on regionalism versus multilateralism is growing as economists and political scientists grapple with the question of whether regional integration arrangements are good or bad for the multilateral system Are regional integration arrangements building blocks or stumbling blocks in Jagdish Bhagwati s phrase or stepping stones toward multilateralism As economists worry about the ability of the World Trade Organization to maintain the GATT s unsteady yet distinct momentum toward liberalism and as they contemplate the emergence of world scale regional

integration arrangements the EU NAFTA FTAA APEC and possibly TAFTA the question has never been more pressing Winters switches the focus from the immediate consequences of regionalism for the economic welfare of the integrating partners to the question of whether it sets up forces that encourage or discourage evolution toward globally freer trade The answer is We don't know yet One can build models that suggest either conclusion but these models are still so abstract that they should be viewed as parables rather than sources of testable predictions Winters offers conclusions about research strategy as well as about the world we live in Among the conclusions he reaches Since we value multilateralism we had better work out what it means and if it means different things to different people make sure to identify the sense in which we are using the term Sector specific lobbies are a danger if regionalism is permitted because they tend to stop blocs from moving all the way to global free trade In the presence of lobbies trade diversion is good politics even if it is bad economics Regionalism's direct effect on multilateralism is important but possibly more so is the indirect effect it has by changing the ways in which groups of countries interact and respond to shocks in the world economy Regionalism by allowing stronger internalization of the gains from trade liberalization seems likely to facilitate freer trade when it is initially highly restricted The possibility of regionalism probably increases the risks of catastrophe in the trading system The insurance incentives for joining regional arrangements and the existence of shiftable externalities both lead to such a conclusion So too does the view that regionalism is a means to bring trade partners to the multilateral negotiating table because it is essentially coercive Using regionalism for this purpose may have been an effective strategy but it is also risky This paper a product of the International Trade Division International Economics Department was prepared for a conference on regional integration sponsored by the Centre for Economic Policy Research La Coru a Spain April 26-27 1996 and will appear in the conference proceedings

Regionalism and Multilateralism After the Uruguay Round Paul Demaret, Jean-François Bellis, Gonzalo García Jiménez, 1997 Analyses the relationship between regional trade agreements and multilateral trade regulation in the wake of the Uruguay Round held in Liege October 1996 The first part of the book is devoted to a comparative analysis of the major trade agreements in Europe the Americas and the Asia Pacific Area Covers also an emerging new form of inter regionalism The second part presents a comparative analysis of the treatment of selected issues under the major regional trade agreements in the world and their relation with existing or emerging multilateral rules Finally discusses the extent to which multilateral rules acted as a constraint on regional trade arrangements under the GATT or the new WTO

International Trade and Investment Law Leal-Arcas, Rafael, 2010-05-28 This timely book examines international trade and investment law at various levels of governance including unilateral bilateral regional and multilateral arrangements

The Politics of Economic Regionalism K. Cai, 2010-01-20 While major theories of

economic regionalism in the existing literature are primarily constructed to explore institutionalized regional integration European integration in particular the analytical framework developed in this work explains the unique process and pattern of regional integration in East Asia **Regionalism Versus Multilateralism** Christopher R. Thomas, Juliana T. Magloire, 2000-09-30

In today's globalized international system international and regional organizations can only function effectively within the context of a larger social partnership with governments the private sectors and a plethora of increasingly influential interest groups Regionalism Versus Multilateralism seeks to illustrate these new roles by tracing the way the Organization of American States OAS the oldest regional organization has pursued its objectives in the context of evolving hemispheric and international circumstances It analyzes the impact of these circumstances on the operations programs and activities of the Organization and the adjustments and direction which metamorphosed the regional membership at certain crucial junctures of hemispheric and international evolution The book does so in three parts through an historic examination of the objectives of the Organization a critical analysis of its response over time to the forces of growth transformation and change and the projection of what continuing developments might dictate on the future characteristics of the Organization if it is to respond effectively to the needs and aspirations of member states This book is a collaboration between Christopher R Thomas and Julian T Magloire with both parties contributing equally to its content and preparation **Effective Multilateralism** Jochen Prantl, 2013-11-06

Existing theories of cooperation assume a stable geo political order led by countries with a shared conception of the modalities of cooperation These assumptions are no longer justified Effective Multilateralism makes the case for a new approach to explaining international cooperation through the lens of East Asian Regional Economic Integration and Dispute Settlement in East Asia Anna G Tevini, 2018-06-28 The accession of the People's Republic of China to the World Trade Organization WTO in 2001 significantly transformed the global economy both de facto and de jure At the regional level China's WTO accession served as an important catalyst for the establishment of Regional Trade Agreements RTAs in East Asia This was a novel development for the region since East Asian States had previously followed a largely informal market driven approach to regional economic integration By contrast rules based economic integration involving East Asian States was traditionally limited to multilateral integration under the GATT WTO framework This book systematically analyses and explains the development nature and challenges of rules based regional economic integration in East Asia with particular attention to the region's first four RTAs While also addressing the socio economic historical and political factors influencing the development of RTAs in East Asia the book focuses on the legal institutions governing economic integration in the Association of Southeast Asian Nations ASEAN as well as under the ASEAN China Comprehensive Economic Co Operation Agreement ACFTA the Japan Singapore New Age Economic Partnership Agreement JSEPA and the Mainland China Hong Kong Closer Economic Partnership Arrangement CEPA The book provides a systematic comparative account of the scope depth and hard law versus soft law quality of rules based

economic integration achieved under these four RTAs in the areas of trade in goods and services investment liberalisation and protection labour mobility and dispute settlement *Handbook of International Trade* E. Kwan Choi, James C. Hartigan, 2008-04-15 This second volume of the Handbook of International Trade focuses on the economic and legal analysis of international laws and institutions as they impact trade. It provides its readers with critical analysis of the key concepts of multilateral, global and regional governance and Europe's role in the world and this in an accessible and intelligible fashion. This volume collects contributions by eminent scholars from world-class universities from five different continents. As such, this unique exercise in transnational multi-disciplinary cooperation provides extensive coverage of the main issues pertaining to multilateral cooperation, notably its history, troubles, legitimacy challenges and efficiency questions from a variety of national perspectives. The book covers the major issues confronting students of European and global studies amongst which pressing security challenges, new forms of institutionalized cooperation, shifting international trade flows, the notion of responsibility to protect, social imbalances and environmental emergencies, the need for less contingent forms of legitimacy for global regulation as well as global public opinion and transnational civil society networks. Each chapter includes a summary of its salient points, methodological indications, illuminating illustrations and a suggested list for further reading. This textbook strives to help students develop a better and more secure grasp of the innovative balance between interdisciplinary openness and disciplinary rigor when engaging with global governance studies, comparative regionalism, normative studies, international political economy or international law.
