Regions Near and Far Gloria P. Hagans, 1987      The Geometry of Meaning Peter Gardenfors, 2014-01-17 A novel cognitive theory of semantics that proposes that the meanings of words can be described in terms of geometric structures In The Geometry of Meaning Peter Gardenfors proposes a theory of semantics that bridges cognitive science and linguistics and shows how theories of cognitive processes in particular concept formation can be exploited in a general semantic model He argues that our minds organize the information involved in communicative acts in a format that can be modeled in geometric or topological terms in what he terms conceptual spaces extending the theory he presented in an earlier book by that name Many semantic theories consider the meanings of words as relatively stable and independent of the communicative context Gardenfors focuses instead on how various forms of communication establish a system of meanings that becomes shared between interlocutors He argues that these meetings of mind depend on the underlying geometric structures and that these structures facilitate language learning Turning to lexical semantics Gardenfors argues that a unified theory of word meaning can be developed by using conceptual spaces He shows that the meaning of different word classes can be given a cognitive grounding and offers semantic analyses of nouns adjectives verbs and prepositions He also presents models of how the meanings of words are composed to form new meanings and of the basic semantic role of sentences Finally he considers the future implications of his theory for robot semantics and the Semantic Web      **Sensation and Perception** John Harris, 2014-04-01 Sensation and Perception covers in detail the perceptual processes related to vision and hearing taste and smell touch and pain as well as the vestibular and proprioceptive systems Individual chapters cover separate topics including the fast developing areas of perception of emotions and attractiveness and recognition of faces plus newer topics not seen regularly in other textbooks for example changes in perception throughout the lifespan and pathologies of perception Key features Chapters begin with summaries of key topics and questions to aid learning Includes key points spotlights on research and Thinking about Research sections designed to encourage students to design their own studies Chapters close with Test Yourself questions a review of key terms and annotated further readings A Companion Website offers additional resources for lecturers and students available on publication at [www.sagepub.co.uk/harris](http://www.sagepub.co.uk/harris)      **Nanoscale Networking and Communications Handbook** John R. Vacca, 2019-07-05 This comprehensive handbook serves as a professional reference as well as a practitioner's guide to today's most complete and concise view of nanoscale networking and communications It offers in depth coverage of theory technology and practice as they relate to established technologies and recent advancements It explores practical solutions to a wide range of nanoscale networking and communications issues Individual chapters authored by leading experts in the field address the immediate and long term challenges in the authors' respective areas of expertise      **Regions Near and Far** Gloria P. Hill, 2007-12-01 In this comparative history of religious life in the South and the North Samuel Hill considers the religions of America from a unique angle Tracing the religious history of both areas this study dramatically shows how a common religion was altered by hostilities and then continued to develop as separate entities until recently Coming almost full circle both North and South now find their religions again to be highly similar Two factors Hill believes were major influences in the diversification of the regional religions the presence of Afro Americans as an underclass of people with a distinctive role to play in the development of southern religious life and the presence or absence of a large immigrant population Hill's overall purpose is to answer the questions How did there come to be a South without which there would not have been a North Why is the South the heartland of Evangelical Protestantism and a kind of Bible belt What historical developments dispatched the two regions on distinctive courses religiously and otherwise How much interaction has there been between the religious institutions of the two regions How similar and divergent have the cultural patterns styles and values been in the South and the North *Diarrhoeal Diseases Research*, 1991-09 **NASA Reference Publication**, 1987 **Advances**

**in Cognitive Neuroscience of Numerical and Mathematical Processing** Filip Van Opstal, Seppe Santens, Daniel Ansari, 2012-09-12 In this special issue the most recent advances in the domain of numerical cognition will be presented During the last decades our understanding of how numbers are processed increased dramatically with the arrival of different imaging techniques and neurophysiological experiments in humans and monkeys We are now starting to build up a clearer picture of how numbers are represented in the brain how this representation develops in the course of a lifetime how numbers are embedded in other cognitive features like attention spatial memory etc and how this eventually leads to our capability to perform complex mathematics Ultimately this accumulation of knowledge might provide us with an understanding of why numbers are problematic for some people This special issue deals with all aspects of numerical

cognition findings on the basic neural responses to magnitudes the link between numbers space time attention action etc mathematical processing numerical development in healthy and clinical populations This special issue solicits contributions from the field of neurobiology neuropsychology and behavioral and computational neuroscience that will increase our understanding of the neural mechanisms underlying numerical cognition

**Kappa Distributions** George Livadiotis, 2017-04-19 Kappa Distributions Theory and Applications in Plasmas presents the theoretical developments of kappa distributions their applications in plasmas and how they affect the underpinnings of our understanding of space and plasma physics astrophysics and statistical mechanics thermodynamics Separated into three major parts the book covers theoretical methods analytical methods in plasmas and applications in space plasmas The first part of the book focuses on basic aspects of the statistical theory of kappa distributions beginning with their connection to the solid backgrounds of non extensive statistical mechanics The book then moves on to plasma physics and is devoted to analytical methods related to kappa distributions on various basic plasma topics spanning linear nonlinear plasma waves solitons shockwaves and dusty plasmas The final part of the book deals with applications in space plasmas focusing on applications of theoretical and analytical developments in space plasmas from the heliosphere and beyond in other astrophysical plasmas Kappa Distributions is ideal for space plasma and statistical physicists geophysicists especially of the upper atmosphere Earth and planetary scientists and astrophysicists Answers important questions such as how plasma waves are affected by kappa distributions and how solar wind magnetospheres and other geophysical space and astrophysical plasmas can be modeled using kappa distributions Presents the features of kappa distributions in the context of plasmas including how kappa indices temperatures and densities vary among the species populations in different plasmas Provides readers with the information they need to decide which specific formula of kappa distribution should be used for a certain occasion and system toolbox

This book delves into Regions Near And Far. Regions Near And Far is an essential topic that needs to be grasped by everyone, ranging from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Regions Near And Far, encompassing both the fundamentals and more intricate discussions.
