Disunited Kingdoms Michael Brown, 2014-07-10 In the last decades of the thirteenth century the British Isles appeared to be on the point of unified rule dominated by the lordship law and language of the English However by 1400 Britain and Ireland were divided between the warring kings of England and Scotland and peoples still

starkly defined by race and nation Why did the apparent trends towards a single royal ruler a single elite and a common Anglicised world stop so abruptly after 1300 And what did the resulting pattern of distinct nations and extensive borderlands contribute to the longer term history of the British Isles In this innovative analysis of a critical period in the history of the British Isles Michael Brown addresses these fundamental questions and shows how the national identities underlying the British state today are a continuous legacy of these years Using a chronological structure to guide the reader through the key periods of the era this book also identifies and analyses the following dominant themes throughout the changing nature of kingship and sovereignty and their links to wars of conquest developing ideas of community and identity key shifts in the nature of aristocratic societies across the isles the European context particularly the roots and course of the Hundred Years War This is essential reading for undergraduates studying the history of late Medieval Britain or Europe but will also be of great interest for anyone who wishes to understand the continuing legacy of the late medieval period in Britain

Excommunication in Thirteenth-Century England Felicity Hill, 2022-05-12 Excommunication was the medieval churchs most severe sanction used against people at all levels of society It was a spiritual social and legal penalty Excommunication in Thirteenth Century England offers a fresh perspective on medieval excommunication by taking a multi dimensional approach to discussion of the sanction Using England as a case study Felicity Hill analyzes the intentions behind excommunication how it was perceived and received at both national and local level the effects it had upon individuals and society The study is structured thematically to argue that our understanding of excommunication should be shaped by how it was received within the community as well as the intentions of canon law and clerics Challenging past assumptions about the inefficacy of excommunication Hill argues that the sanction remained a useful weapon for the clerical elite bringing into dialogue a wide range of source material allows effectiveness to be judged within a broader context The complexity of political communication and action are revealed through public conflicting accepted and rejected excommunications Excommunication could be manipulated to great effect in political conflicts and was an important means by which political events were communicated down the social strata of medieval society Through its exploration of excommunication the book reveals much about medieval cursing pastoral care fears about the afterlife social ostracism shame and reputation and mass communication

between the eleventh and the early fourteenth centuries is the subject of this volume of essays by twelve historians including scholars as well known as C N L Brooke R C van Caenegem R Foreville S Kuttner and W Ullmann Each essay is concerned with a major historical text such as Geoffrey of Monmouth's History of the Kings of Britain or an important type of historical document such as the writings of a famous civilian Master Vacarius The general theme of Church and government in the Middle Ages is illustrated through the eyes of different types of officials among them English royal justices Norman bishops and monastic archdeacons as well of scholars and thinkers who also served the needs of government both lay and ecclesiastical such as Gratian of Bologna and the hitherto neglected canon lawyer John Baconthorpe *The Nobility and Ecclesiastical Patronage in Thirteenth-century England* Elizabeth Gemmill, 2013 While there has been work on the nobility as patrons of monasteries this is the first real study of them as patrons of parish churches and is thus the first study to tackle the subject as a whole Illustrated with a wealth of detail it will become an indispensable work of reference for those interested in lay patronage and the Church more generally in the middle ages Professor David Carpenter Department of History King's College London This book provides the first full length integrated study of the ecclesiastical patronage rights of the nobility in medieval England It examines the nature and extent of these rights how they were used why and for whom they were valuable what challenges lay patrons faced and how they looked to the future in making gifts to the Church It takes as its focus the thirteenth century a critical period for the survival and development of these rights being a time of ambitious Church reform of great change in patterns of land ownership in the ranks of the higher nobility and of bold assertion by the English Crown of its claims to control Church property The thirteenth century also saw a proliferation of record keeping on the part of kings bishops and nobility and the author uses new evidence from a range of documentary sources to explore the nature of the relationships between the English nobility the Church and its clergy a relationship in which patronage was the essential feature Dr Elizabeth Gemmill is University Lecturer in Local History and Fellow of Kellogg College University of Oxford *Questions on the Posterior Analytics (Second Redaction)* Simon of Faversham, 2025-09-18 Simon of Faversham was an English scholar affiliated with the University of Paris during the 1280s where he most likely wrote his commentaries on Aristotle's philosophical works The Posterior Analytics one of Aristotle's most important treatises addresses the nature of scientific demonstration Faversham's two extant commentaries on The Posterior Analytics are invaluable witnesses to key elements of late medieval accounts of scientific demonstration including views on the extent and limits of demonstration its metaphysical underpinnings and its epistemic power The commentary edited here together with the accompanying translation offers new insight into Simon of Faversham's philosophy a fascinating chapter in the history of late medieval thought It also deepens our understanding of the philosophical discussions on demonstration and related topics that took place during the early period of Europe's university history and of the ways in which these discussions drew on earlier philosophical developments in non European traditions notably the Islamic philosophical tradition Law as
