### **Reforming the Health Care Market** David F.

Drake, 1994-09-19 Examining the health care market in a historical framework Drake analyzes the forces and events that have shaped American health care in the twentieth century and sheds new light on why and how our health care system has dampened competitive market forces and failed to provide sound value for much of our health care expenditures He examines the roles that physicians hospitals insurance companies businesses individual consumers and government legislation have played in creating a provider dominated market in which the cost of care has been concealed from consumers Comparing U S health care expenditures with those of other developed countries he concludes that a significant part of our health care problem is the style of medicine practiced in the United States which is much more specialized and high tech than in other developed nations Drake develops proposals for health care financing reform that consider the political and economic difficulties involved He first examines the Clinton health care reform plan and makes specific recommendations for revisions that would improve its likelihood of controlling costs He then offers an alternative proposal

that would both maintain the principle of universal noncancelable coverage and eliminate the flaws in the market for health care services by giving consumers a financial stake in cost containment This timely argument combining economic and historical analysis with thoughtful consideration of the motivating humanitarian and political concerns will be of interest to everyone seeking to understand and to reform our ailing health care system *The Politics of Addiction* S. Mars, 2012-08-20

The Politics of Addiction examines power and policy making in the context of a bitter conflict between private and publicly employed doctors treating addiction Regulation was used by both the profession and the state to shape the treatment of addiction and who could provide it with the media feeding into the process **The Two New Yorks** Gerald Benjamin, Charles Brecher, 1988-12-15

Over the past eight years a marked shift in the national political mood has substantially reduced the federal government's involvement in ameliorating urban problems and enhanced the prominence of state and local governments in the domestic policy arena Many states and big cities have been forced to reassess their traditionally vexed relationships Nowhere has this drama been played out more stormily than in New York In *The Two New Yorks* experts from government the academy and the non profit sector examine aspects of an interaction that has a major impact on the performance of state and city institutions The analyses presented here explore current state city strategies for handling such troubling policy areas as education health care and housing Attention is also given to important contextual factors such as economic and demographic trends and to structural features such as the political framework relationships with the national government and the system of public finance Despite its uniquely large scope the drama of the new New Yorks parallels or presages issues faced by virtually all large cities and their states This unprecedented study makes a vital contribution in an era of declining federal aid and pressing urban need *A Reader In Health Policy And Management* Mahon, Ann, Walshe, Kieran, Chambers, Naomi, 2009-06-01

This reader offers instant access to fifty classic and original readings in health policy and management Compiled by experts the editors introduce a framework setting out the key policy drivers and policy levers giving a conceptual framework that provides context for each piece **Competition and Health Planning** Judith R. Gelman, 1982 [Understanding Health Care Reform](#) Theodore R. Marmor, 1994-01-01

The reform of American medical care is the most important topic on the nation's domestic agenda and the centerpiece of the Clinton administration's plans for social policy and long term economic development This book written by a preeminent analyst of medical politics and policy who is a frequent adviser to Congress helps to clarify the current debate over the President's bill and the proposed alternatives to it It is essential reading Theodore Marmor whose work has appeared in the nation's major newspapers and magazines as well as in scholarly journals and books here presents some of his most recent writings that illuminate the historical political and economic considerations behind various proposals now under debate Marmor explains what we can and cannot expect from reform of American medicine and he addresses the many conflicting claims about remedies for America's problems with medical costs quality of care and access to treatment *Social Administration:*

*Managing finances, personnel, and information in human services* Simon Slavin, 1985 Featuring pragmatic guidelines for all administrators and practitioners in the social services this book presents both theory and case materials to give the student of social administration a textured understanding of the social agency and its dilemmas and walks the student through the very practical daily problems and challenges Published in two parts Volume 1 An Introduction to Human Services Management Volume 2 Managing Finances Personnel and Information in Human Services **The Aging** Bennett M. Rich, Martha Baum, 2010-11-23 This book provides a comprehensive analysis of federal programs for the aging and their origins Landmark federal legislation affecting the aging was enacted in the 1930s and the intervening decades have witnessed a dramatic increase in the number and scope of programs But far from constituting a cohesive national policy for the elderly the many programs reflect the particular political and social conditions surrounding their origin and implementation The multiplicity and complexity of resources and services available make achieving even a reasonable grasp of this field extremely difficult This study offers a coherent and readable summary of this important area of federal legislation
