Private Pensions Series Regulating Private Pension Schemes: Trends and Challenges OECD, 2002-04-19

This conference proceedings analyses the key policy implications arising from the growth of private pensions

Approaching retirement Kirk Mann, 2001-11-21 We are all approaching retirement but what should we expect For some it is a happy prospect Others approach retirement knowing they face hardship and social exclusion Amid alarming predictions of a demographic time bomb governments and the private pensions industry urge everyone to plan and save now but admit that there are risks But will the pension funds deliver on their promises Will the rich increasingly retire early but the poor work for longer How reliable are state pension schemes Do the USA Sweden or Australia have a better approach to retirement pensions than the UK *Approaching retirement* tackles these and many other questions from a number of sociological perspectives Using the idea of the social division of welfare as a template different approaches to retirement pensions policy are assessed and their strengths and weaknesses clearly presented This book will be an invaluable resource for social science students at all levels and for those who teach them Economists and pension practitioners will also find food for thought here

Regulation Without the State John Blundell, Colin Robinson, 2000 The rising tide of government regulation in most countries is provoking a reconsideration of the extent to which the state should lay down rules for others Self regulation and other forms of voluntary rule setting are being examined as substitutes for regulation by government

Readings 52 begins with a paper by John Blundell and Colin Robinson which analyses the forces behind government regulation its shortcomings and the scope for voluntary regulation Seven papers by distinguished commentators on regulation then examine Blundell and Robinson's conclusions

Regulating Pensions David Simpson, 1996 Discusses those transactions in personal investment contracts which are regulated by the Personal Investment Authority in Britain

Regulating Financial Markets George J. Benston, 1998 Financial services financial firms and financial markets are regulated to a greater extent than most other products and services In this radical book Professor George Benston provides a comprehensive critique of the justifications for financial services regulation and provides an innovative proposal for reform

Executive Summary Financial services financial firms and financial markets are regulated to a greater extent than most other products and services Financial service regulation goes back centuries It provides benefits to governments for example from direct and indirect taxation of banks and to regulated financial institutions which gain where entry is restricted Consumer protection is a common reason given for financial regulation But consumers in financial markets are probably less subject to fraud misrepresentation discrimination and information asymmetry than consumers of other products Concern about negative externalities costs born by others is another argument for regulation However on examination it is clear there are few genuine externalities Regulations on externality grounds is justified only for financial institutions which hold government insured deposits for insurance companies which provide government mandated non contracting third party insurance for instance for cars and for companies which underwrite long term life insurance and annuities Financial regulation incurs costs borne by consumers and taxpayers which probably exceed the benefits they receive There are substantial unintended costs such as reduced diversification of financial institutions and the absence of less costly and more innovative products because of restrictions on entry to financial markets An optimal regulatory system for banks would involve substantial capital requirements periodic reporting of assets liabilities and capital and a structured early intervention system for the authorities For government mandated third party liability insurance life insurance and annuities insurance companies should be subject to capital requirements similar to those for banks If governments wish to protect consumers of financial products the best procedure is to establish an Ombudsman to which consumers who feel they have been mistreated can go The proposed regulatory system would be almost costless to taxpayers the regulated companies and consumers of their products and services Compared with existing regimes it has the great advantage of not restricting entry to financial markets nor the introduction of new products

Money and the Market Kevin Dowd,2013-12-16 Kevin Dowd asserts that state intervention into financial and monetary systems has failed and that we would be better off if financial markets were left to regulate themselves This collection will appeal to students researchers and policy makers in the monetary and financial area

Regulating Private Pension Schemes International Network of Pensions Regulators and Supervisors. Conference,Organisation for Economic Co-operation and Development. Private Pensions and Insurance Unit,2002 The issue of providing appropriate financial security for retirement is of growing importance for both OECD member and non member countries and the approaches adopted to implement the necessary reforms vary depending on each country s economic social and demographic environment Increasingly however reform programmes involve the establishment or extension of private pension arrangements This book contains a selection of papers presented at a meeting in April 2001 of the International Network of Pension Regulators and Supervisors INPRS and the OECD to discuss the key policy implications arising from the growth of private pension schemes
