Regulation Through Litigation:

Regulation through Litigation Kip W. Viscusi, 2004-05-13 Recent high profile lawsuits involving cigarettes guns breast implants and other products have created new frictions between litigation and regulation Increasingly litigation is being used as a financial lever to force companies to accept negotiated regulatory policies policies that invariably involve less public input and accountability than those arising from government regulation The process not only usurps the traditional governmental authority for regulation but also shifts the locus of establishing tax policy from the legislature to the parties involved in the litigation Citizen interests are not explicitly represented and there is no mechanism to ensure that these outcomes are in society's best interests By focusing on case studies involving the tobacco industry guns lead paint breast implants and health maintenance organizations the contributors to this volume collectively shed light on the likely consequences of regulation through litigation for insurance markets and society at large They analyze the ramifications of large scale lawsuits mass torts and class actions for the insurance market and advocate increased public scrutiny of attorney reimbursement and a competitive bidding process for all lawsuits involving government entities as the plaintiffs

Regulation Versus Litigation Daniel P. Kessler, 2011-02 The efficacy of various political institutions is the subject of intense debate between proponents of broad legislative standards enforced through litigation and those who prefer regulation by administrative agencies This book explores the trade offs between litigation and regulation the circumstances in which one approach may outperform the other and the principles that affect the choice between addressing particular economic activities with one system or the other Combining theoretical analysis with empirical investigation in a range of industries including public health financial markets medical care and workplace safety *Regulation versus Litigation* sheds light on the costs and benefits of two important instruments of economic policy [Research Handbook on International Insurance Law and Regulation](#) Julian Burling, Julian M. Subcommittee on Regulatory Affairs, 2005 **Regulating Lifestyle Risks** Alberto Alemanno, Amandine Garde, 2015-01-01 This collection of essays looks at the role the European Union could and should play in promoting healthier lifestyle in light of the moral philosophical legal and political challenges associated with the regulation of individual choices By tackling the main non communicable diseases NCD risk factors tobacco consumption harmful use of alcohol unhealthy diets and lack of physical activity the contributors endeavour to identify common themes and determine whether and if so to what extent the lessons learned in relation to each area of EU intervention could be transposed to the others By focusing on the European Union legal order the book highlights both the opportunities that legal instruments offer for NCD prevention and control agenda in Europe as well as the constraints that the law imposes on policy makers *Experimentalist Competition Law and the Regulation of Markets* Yane Svetiev, 2020-11-26 This book charts the emergence of experimentalist governance in the implementation of EU competition law as a response to uncertainty and the limits of hierarchical enforcement in an increasingly dynamic and heterogeneous economic environment It contributes to ongoing debates about the current state of EU competition law and provides an innovative account of emergent enforcement trends and its future direction It also argues that an experimentalist evolution of competition law and market regulation attenuates concerns about the competitive strictures of EU law on national economic and regulatory institutions Through its focus on

experimentalist governance the book provides guidance on completing experimentalist infrastructures for market regulation as well as on the role of courts in triggering and sustaining experimentalist solutions As such it offers a novel perspective on implementing competition law in the EU and beyond Personal Responsibility in Food Consumption Act United States. Air Passenger Rights Michal Bobek, Jeremias Adams-Prassl, 2016-01-28 Regulation 261 2004 on Air Passengers Rights has been amongst the most high profile pieces of EU secondary legislation of the past years generating controversial judgments of the Court of Justice from C 344 04 ex parte IATA to C 402 07 Sturgeon The Regulation has led to equally challenging decisions across the Member States ranging from judicial enthusiasm for passenger rights to domestic courts holding that a Regulation could not be relied upon by an individual claimant or even threatening outright to refuse to apply its provisions The economic stakes are

significant for passengers and airlines alike and despite the European Commission's recent publication of reform proposals controversies appear far from settled At the same time the Regulation should according to the Treaty have uniform direct and general application in all the Member States of the Union How then can this diversity be explained What implications do the diverging national interpretations have for the EU's regulatory strategy at large This book brings together leading experts in the field to present a series of case studies from 15 different Member States as well as the extra territorial application of Regulation 261 combined with high level analysis from the perspectives of Aviation law and EU law
