

THE POLITICS OF REGULATORY REFORM

MICHAEL D. REAGAN

University of California, Riverside

THE HISTORY of science abounds with examples of practical needs stimulating theoretical developments: navigational problems and gravity; schizophrenia and biomedical research; World War II and the harnessing of atomic power. In politics, President Nixon's mode of governance led to a rethinking of our discipline's long-time insistence that our system required a strong presidency and that the public interest was better served by the power of the presidency than by congressional logrolling. Now, legislative resurgence is celebrated.

In similar fashion, the attention to deregulation inaugurated under President Carter and pushed with rhetorical fervor by President Reagan may have as one of its more positive unintended consequences a resurgence of political science interest in the theory of regulation, a field largely dormant after what is known as "capture theory" was developed in the fifties. Some recent studies provide evidence that such reconsideration of the field of regulation may already be underway, although so far more in the writings of economists than of political scientists. It, therefore may be time for a state-of-the-art piece on the study of regulation, emphasizing *deregulation* as far as the literature permits. This will cover approaches and methods; substantive directions; the contributions of particular books for teaching and research; and, of course, further research needs and opportunities. The overall perspective taken is not economic, not legal, but political; the intent is to "see what's there," not to impose a thesis of the reviewer's devising.

DEREGULATION

Looking first at materials directly focused on deregulation, we find mostly an econo-legal literature. One of the latest broad-scope works is Robert W. Poole, Jr.'s *Instead of Regulation* (1982). An edited volume covering energy, transportation, securities markets, pollution, product safety and health, its contributors (economists, attorneys, and one public policy person teaching in a political science department) share a common theme and goal. The theme is that present directive (so-called "command and control") regulation can be greatly reduced by substituting more information for consumers and strengthened liability laws. The goal is to return substantial decision-making power to individuals, to recognize what Poole terms "the primacy of individual choice . . . and full responsibility for one's actions" (p. x). There is a strongly ideological tone to many of the essays, with market forces and consumer preferences given the benefit of the doubt generally whenever they are seen as in conflict with the alternative of governmental requirements. Clarkson and Muris, for example, in their chapter entitled "Letting competition serve consumers," argue against "coercing better quality" and contend that consumers

Handbook on the Politics of Regulation David Levi-Faur, 2011-01-01 Political science has leap frogged law economics and sociology to become the dominant discipline contributing to regulatory studies David Levi Faur s volume

taps the rich veins of regulatory scholarship that have made this the case. It brings together the talented new network of politics scholars intrigued by the importance of the changing nature of state and non state regulation. Their fresh insights complement important new work by established stars of the field. Definitely a book to have on your shelf when in search of exciting theoretical approaches to politics.

John Braithwaite, Australian National University: Regulation in its manifold forms is the central process of contemporary governance as it seeks to blend the dynamism of market economies with responsiveness to political and normative demands for health, safety, environmental protection and fairness. Understanding regulation's varieties, vulnerabilities and virtues has become a significant focus of academic research and theory. This volume provides an extraordinary survey of research in that field, a survey remarkable in its comprehensiveness, outstanding in the quality of the contributions by leading regulatory scholars from different nations and academic disciplines.

Robert A. Kagan, University of California, Berkeley, US: An authoritative collection by a range of contributors with outstanding reputations in the field.

Michael Moran, WJ MacKenzie Professor of Government: This is an extraordinarily useful one stop shop for a wide range of traditions and approaches to the political aspects of regulation.

David Levi-Faur: has assembled a fine collection that by reporting on the state of the art, also shows the way ahead for a discipline that has to capture and explain dramatic changes in real world regulatory philosophies and policies.

Claudio Radaelli, University of Exeter, UK: This is an unusually impressive edited volume. Its contributors include the leading academic experts on government regulation from around the world. Its several clearly written and informative essays address the most important topics, issues and debates that have engaged students of regulatory politics. I strongly recommend this volume to anyone interested in understanding the breadth and depth of contemporary scholarship on the political dimensions of regulation.

David Vogel, University of California, Berkeley, US: This unique Handbook offers the most up to date and comprehensive state of the art reviews of the politics of regulation. It presents and discusses the core theories and concepts of regulation in response to the rise of the regulatory state and regulatory capitalism and in the context of the golden age of regulation. Its ten sections include forty nine chapters covering issues as diverse and varied as theories of regulation, historical perspectives on regulation, regulation of old and new media, risk, regulation, enforcement and compliance, better regulation, civil regulation, European regulatory governance and global regulation. As a whole, it provides an essential point of reference for all those working on the political, social and economic aspects of regulation. This comprehensive resource will be of immense value to scholars and policymakers in numerous fields and disciplines including political science, public policy and administration, international relations, regulation, international law, business and politics, European studies, regional studies and development studies.

The Political Economy of Telecommunications Reforms in Thailand Sakkarin Niyomsilpa, 2018-10-24: A study of the changing character of state-society relations in contemporary Thailand using the telecommunications industry as a case study. It examines the privatization and gradual reforms of the 1980s and 1990s and the political dynamics behind these policies as well as conflicts and co-operation.

among the various players and their interests The book also covers bureaucratic and political corruption and their implications for Thailand's political democratization and economic liberalization It argues not only that the bureaucracy is no longer the dominant power in Thai politics but also that the country has moved towards a more pluralistic socio political system in which a broadly based liberalization coalition has emerged *New Instruments of Environmental Governance?* Andrew Jordan, Rudiger K.W. Wurzel, Anthony R. Zito, 2004-11-23 The use of so called new environmental policy instruments such as eco taxes tradable permits voluntary agreements and eco labels has prompted widespread claims that these devices have replaced regulation These papers offer a fresh perspective on the evolving tool box of environmental policy *China's Quest for Political Legitimacy* Baogang Guo, 2010-09-23 This book examines the new equity enhancing politics in China in the context of Chinese traditional cognitive patterns of political legitimacy and its implication for Chinese political development in the near future Based on an analysis of the new governing philosophy the generation of political elite and a new set of public policies the book reaffirms the emergence of a new Chinese polity that infuses one party rule with limited electoral and deliberative democracies Unlike many scholars who perceive the contemporary Chinese history as a constant search for democracy this book takes a very different approach It asserts that the enduring question in political development in China today is no different from what was sought after throughout Chinese history namely the constant search for political legitimacy Even though the quest for democracy is instrumental to that end it may not ultimately lead to the embrace of a full fledged liberal democracy The new politics is not only a rationalization of the efficiency based development but also a major paradigm shift in China's developmental strategy **Encyclopedia of Public Administration and Public Policy - 5 Volume Set** Domonic A. Bearfield, Evan Berman, Melvin J. Dubnick, 2020-08-14 Now in its third edition Encyclopedia of Public Administration and Public Policy remains the definitive source for article length presentations spanning the fields of public administration and public policy It includes entries for Budgeting Bureaucracy Conflict resolution Countries and regions Court administration Gender issues Health care Human resource management Law Local government Methods Organization Performance Policy areas Policy making process Procurement State government Theories This revamped five volume edition is a reconceptualization of the first edition by Jack Rabin It incorporates over 225 new entries and over 100 revisions including a range of contributions and updates from the renowned academic and practitioner leaders of today as well as the next generation of top scholars The entries address topics in clear and coherent language and include references to additional sources for further study *Money and Politics Program: Guide to Applying Lessons Learned*, 2006 *The Theory and Practice of Command and Control in Environmental Policy* Peter Berck, 2018-01-12 This title was first published in 2003 Economists have had increasing success in arguing the merits of market based approaches to environmental problems By making polluting expensive market based approaches provide polluters with incentives to clean up rather than mandates to stop polluting These approaches include pollution taxes transferable emissions permits and subsidies for

pollution abatement The purpose of this volume is to explore the situations where Command and Control CAC may not be all bad and in fact might even have some advantages over market based instruments MBI The Politics of Regulatory Reform Stuart Shapiro, Debra Borie-Holtz, 2014-01-21 Regulation has become a front page topic recently often referenced by politicians in conjunction with the current state of the U S economy Yet despite regulation s increased presence in current politics and media The Politics of Regulatory Reform argues that the regulatory process and its influence on the economy is misunderstood by the general public as well as by many politicians In this book two experienced regulation scholars confront questions relevant to both academic scholars and those with a general interest in ascertaining the effects and importance of regulation How does regulation impact the economy What roles do politicians play in making regulatory decisions Why do politicians enact laws that require regulations and then try to hamper agencies abilities to issue those same regulations The authors answer these questions and untangle the misperceptions behind regulation by using an area of regulatory policy that has been underutilized until now Rather than focusing on the federal government Shapiro and Borie Holtz have gathered a unique dataset on the regulatory process and output in the United States They use state specific data from twenty eight states as well as a series of case studies on regulatory reform to question widespread impressions and ideas about the regulatory process The result is an incisive and comprehensive study of the relationship between politics and regulation that also encompasses the effects of regulation and the reasons why regulatory reforms are enacted **The Environment Goes to Market** National Academy of Public Administration, 1994 Focusing on the practical aspects of using economic incentives to achieve environmental goals this book analyzes the design and implementation of market based programs and identifies critical issues for creating successful programs in the future The book examines the conditions in which market incentives are most useful and probes the important new roles of both government and the private sector It highlights the administrative institutional organizational and informational requirements for successful operation of the programs and it especially stresses the importance of program evaluation This analysis is based on case studies of four programs at different levels of government local state federal and overseas that use different tools credit trading direct taxes variable fee structures and refunds the air credit trading program in the Los Angeles metropolitan area the national pollution charge system of Russia the recycling initiative of King County Washington and the deposit refund system of Michigan Distributed for the National Academy of Public Administration US - Vietnam Economic and Political Cooperation Handbook IBP USA, 2013-08 2011 Updated Reprint Updated Annually US Vietnam Economic and Political Cooperation Handbook

The Political Economy of Structural Reforms in Europe Nauro F. Campos, Paul De Grauwe, Yuemei Ji, 2018-07-04 Reforms in labour and product markets play a central role in government policies The Political Economy of Structural Reforms in Europe takes stock of current frontier work It brings together leading contributions from academia the

central banks in Europe and the OECD to argue that structural reforms can make a fundamental contribution to improve economic performance across Europe The Political Economy of Structural Reforms in Europe brings together theoretical and empirical studies that address the potential role of structural reforms in restoring macroeconomic stability resuming economic growth addressing income inequality and grappling secular stagnation It throws new light on the determinants and effects of structural reforms and on how these shape the European integration experience Reforming the Workplace

Joseph Rees, 2016-11-11 Government regulatory agencies are too often tangled webs of bureaucracy fraught with internal politics and in conflict with both industries and individuals How to instigate and implement the needed reform is a timely issue that is currently being debated Reforming the Workplace is an account of a successful program that is now a model for nationwide improvements in various regulatory agencies Joseph Rees's focus is the Occupational Safety and Health Administration OSHA which in 1982 announced a major shift in policy from strict government regulation to self regulation by industries with proven safety records In California this resulted in the Cooperative Compliance Program CCP an arrangement among labor unions management and California OSHA that became responsible for overseeing safety regulations at seven large construction sites throughout the state In his detailed study of the CCP Joseph Rees provides important empirical data and assesses the reasons the program succeeded That success is so important he demonstrates because the CCP represents a different approach to reform self regulation that can be extended to and tailored for many troubled agencies Reforming the Workplace is a comprehensive study that will be a valuable resource for scholars and students of law and social policy in general and of federal regulation policies in particular **Building New Competition Law Regimes** David Lewis, 2013

Nearly every important country now has a competition law It is vital to understand the institutions that drive the operation of these laws This excellent volume provides case studies of some of the more substantial new competition authorities written by former or current top agency officials and academics closely connected with those institutions The book highlights the fact that whilst these institutions have certain features in common they are very much shaped by the history and circumstances of their own countries and cultures and that any serious prescription for them needs to balance those factors against the general economic doctrines that lie behind competition law around the world Without that understanding regulators and those dealing with them are likely to face failure The book points to ways of resolving those problems Allan Fels The Australia and New Zealand School of Government ANZSOG This detailed book focuses on the development of competition law institutions and contains case studies that examine this against the backdrop of the debate around global convergence of competition law and the limits imposed by particular national circumstances Five of the chapters examine the development of competition law regimes in a diverse range of countries Mexico Hungary South Africa Thailand with comparative remarks on South Korea and Zambia The remaining chapters examine the role of multinational institutions particularly the International Competition Network and the practice of and potential for regional competition law arrangements The majority of the

authors are seasoned practitioners of competition law all of whom acknowledge the importance of convergence while simultaneously demonstrating the limits imposed by divergent national circumstances This carefully edited collection is a companion volume to *Enforcing Competition Rules in South Africa* an account of the development of competition law institutions in South Africa authored by David Lewis and published by Edward Elgar Building New Competition Law Regimes will be of particular benefit to scholars teachers and practitioners of competition law It will also be of interest to development studies scholars teachers and practitioners and to specialists in the countries that are the subjects of the case studies

The Political Economy of Environmental Regulation Robert N. Stavins, 2004 This new authoritative collection comprises previously published papers on the political economy of environmental regulation economic analyses of the processes through which political decisions regarding environmental regulation are made principally in the institutional context found in the United States Despite this geographic focus many of the papers contain analytical models that are methodologically of interest and or have lessons that are relevant in other parts of the world In the environmental realm questions of political economy emerge along three fundamental dimensions which are closely interrelated but conceptually distinct 1 the degrees of government activity 2 the form of government activity and 3 the level of government that has responsibility The first three parts of the book deal respectively with these three fundamental dimensions of inquiry The fourth part of the book examines the use of economic analysis in contemporary environmental policy The *Political Economy of Environmental Regulation* will be of significant interest to environmental scholars students and policy makers alike
