**Better Regulation** Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union

*The Paradox of Regulation* Fiona Haines, 2011-01-01 The Paradox of Regulation is a tour de force of regulatory scholarship that successfully contextualizes the regulatory project as an effort to reduce multiple forms of risk Three case studies of regulatory reforms fascinating in their own right when read together forcefully demonstrate why context matters to the actuarial assessments political realities and possibilities for insuring safety security and integrity Haines penetrating analysis presents no simple answers to what works and why The Paradox of Regulation nimbly demonstrates that the strengths and limits of a particular regulatory reform must be understood as a complicated response to a dynamic constellation of actuarial political and socio cultural risks Nancy Reichman University of Denver US This new book by Fiona Haines is an elegant but sophisticated analysis of the three risks technical social and political that regulation must address if it is to be effective This analysis is original and fresh bringing together critiques of risk based regulation with empirical literature on compliance and

effectiveness evaluation This is exactly the sort of book we need more of to develop and deepen empirical and theoretical research in regulatory scholarship it helpfully melds together different literatures and theoretical approaches with her own empirical work on regulatory reforms to build a multi layered theoretical analysis that really pushes forward our understanding of regulation why it happens and how it fails and succeeds Christine Parker Monash University Australia This is an insightful and nuanced analysis of the strengths and limitations of regulation Through a close grained analysis of three recent disasters Haines demonstrates that regulation is not just a technical but also a political and a social project and how a failure to recognise its multiple dimensions can lead to regulatory failure This book is a major contribution that enriches our understanding of the challenges of risk management and of how best to address them Neil Gunningham Australian National University Canberra Fiona Haines shows us that regulatory policy is complex and paradoxical in ways that should require us to attend to the substance and the politics of specific regulatory regimes This book is a major contribution to the reconceptualisation of risk and regulation It is a perceptive treatment of the role of crisis by one of the best scholars of regulation we have John Braithwaite Australian National University Canberra

**Regulating Workplace Risks** David Walters,R. Johnstone,Kaj Frick,Michael Quinlan,Geneviève Baril-Gingras,Annie Thébaud-Mony,2011-01-01 State of the art research into the state of the art of occupational health and safety management and inspection Its authors provide a warts and all assessment of the possibilities and limits of regulating health and safety in an increasingly challenging environment A must read for anyone concerned about improving workplace health and safety in the new world of work Eric Tucker York University Canada This book long in gestation provides a profound analysis of the challenge to labour inspection of regulating OHS through a focus on management systems Its detailed analysis of 5 disparate countries is a treasure trove of research providing a rich opportunity for learning across jurisdictions It provides a masterly dissection of the increasingly complex competitive and pared down context of globalisation and then challenges it Recording some successes but more shortcomings it is food for deep reflection by inspectorates and politicians internationally Andrew Hale Hastam UK and Emeritus Professor Delft University The Netherlands Despite the complaints of neo liberal ideologists about the burden on business this book argues that there is no justification for reduced regulation and regulatory surveillance of health and safety at work Drawing on analyses of the role played by labour inspection in Australia Sweden Canada France and the UK the authors provide a timely examination of the contemporary organisational and other challenges it faces with particular reference to the inadequacy of self regulation and the rise of systematic occupational health and safety management Theo Nichols Cardiff University UK An impressively broad and sophisticated study of a critical aspect of OHS regulation This is the best socio legal analysis available of the contexts strategies and practices involved in inspection of approaches to managing health and safety in the face of change Neil Gunningham Australian National University Canberra Regulating Workplace Risks is a study of regulatory inspection of occupational health and safety OHS and its management in five countries

Australia Canada Quebec France Sweden and the UK during a time of major change It examines the implications of the shift from specification to process based regulation in which attention has been increasingly directed to the means of managing OHS more systematically at a time in which a major restructuring of work has occurred in response to the globalised economy These changes provide both the context and material for a wider discussion of the nature of regulation and regulatory inspection and their role in protecting the health safety and well being of workers in advanced market economies With its comparative nature and empirical studies this book will appeal to OHS policy makers and regulators all over the world as well as students in the field of occupational health and safety regulation internationally

*Private Regulation and Enforcement in the EU* Madeleine de Cock Buning, Linda Senden, 2020-06-25 Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors such as companies or special interest groups to regulate and enforce significant aspects of people's daily lives from environmental and social protection to the areas of food safety advertising and financial markets This book investigates the trust vested in private actors from the perspective of European citizens It answers the question of whether private actors live up to citizens expectations or whether more should be done as to the safeguarding of citizens interests Several cross cutting studies explore how private regulation and enforcement are embedded in EU law The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which unlike the national and transnational ones has not yet been widely explored This context merits a stand alone analysis because of the unique normative framework of the EU as a particular polity itself but also in relation to its Member States With an overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU the book adds a missing tile to the mosaic of public private governance studies
