Assistive Technology Assessment Handbook Stefano Federici, Marcia Scherer, 2017-11-23 Assistive Technology Assessment Handbook Second Edition proposes an international ideal model for the assistive technology assessment process outlining how this model can be applied in practice to re conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability The model provides reference guidelines for evidence based practice guiding both public and private centers that wish to compare evaluate and improve their ability to match a person with the correct technology model This second edition also offers a contribution to the Global Cooperation on Assistive Technology GATE initiative whose activities are strongly focused on the assistive products service delivery model Organized into three parts the handbook gives readers a toolkit for performing assessments describes the roles of the assessment team members among them the new profession of psychotechnologist and reviews technologies for rehabilitation and independent living including brain computer interfaces exoskeletons and technologies for music therapy Edited by Stefano Federici and Marcia J Scherer this cross cultural handbook includes contributions from leading experts across five continents offering a framework for future practice and research

Speech and Communication Problems in Psychiatry , 2013-12-20 This volume represents a painstaking and scholarly introduction to the management of children and adults who have problems of communication related to or in addition to mental disorder It is a relatively unexplored field having received scant attention until recent years but the quality of the work included here gives a clear indication that the area should move from the periphery into a main stream position in the education and practice of speech therapists Although all students in training receive some teaching in the area of psychiatry it tends to be limited to a brief consideration of the role of the psychiatrist and clinical psychologist very rarely the speech therapist It has been proposed that the education of the speech therapist who intends to enter this difficult but rewarding field should be developed at post graduate level and there are strong arguments given in this volume to support the idea Claims that the field is neglected during initial training are however well founded and this volume should alert those responsible for the education of speech therapists to this deficiency
