Reinterpreting Revolution In Twentieth Century Europe:

Reinterpreting Revolution in Twentieth-Century Europe Moira Donald,Tim Rees,2017-03-14 Until the dramatic fall of Communist regimes in the East placed the possibility of revolution on the agenda once again sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe Looking back over the twentieth century it is plausible to argue that the twentieth rather than the nineteenth has been the most revolutionary of centuries In this volume leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences Revolution in the Making of the Modern World John Foran,David Lane,Andreja Zivkovic,2007-11-05 Featuring contributions from leading thinkers on revolution it combines theoretical concerns with case studies of individual revolutions to question whether ideas of revolution are still relevant in the postmodern and globalized world of the twenty first century **Twisted Paths** Robert Gerwarth,2007-08-09 A concise introduction to European history between 1914 and 1945 this series of succinct interpretations written by leading scholars offers a new introduction to the period Covering historical developments in all areas within Europe s natural borders from the Atlantic to the Arctic Ocean from the Bosphorus to the Urals and the Mediterranean the book moves beyond the view that the history of this period can only be understood in terms of catastrophe Instead it argues for a more balanced perspective suggesting that both darker and lighter elements in Europe s history were capable of evolving simultaneously Without neglecting the more familiar stories of war genocide and economic depression each chapter demonstrates that political stability and regime collapse social progress and mass poverty the crisis of European civilization and remarkable cultural achievements existed alongside each other Emphasising the histories of the smaller states and the multi faceted nature of the period Twisted Paths illuminates the diversity of Europe s experiences in the first half of the twentieth century

Political and Social Thought in Post-Communist Russia Axel Kaehne,2007-11-13 This is the first comprehensive study of Russian political and social thought in the post Communist era The book portrays and critically examines the conceptual and theoretical attempts by Russian scholars and political thinkers to make sense of the challenges of post communism and the trials of economic political and social transformation It brings together the various strands of political thought that have been formulated in the wake of the collapsed communist doctrine It engages constructively with the numerous attempts by Russian political theorists and social scientists to articulate a coherent model of liberal democracy in their country The book investigates critical as well as favourable voices in the Russian debate on liberal democracy a debate often marked by eclecticism and at times little conceptual discipline As such the book will be of great interest both to Russian specialists and to all those interested in political and social thought more widely 'The Politics' and 'The Political' of the Eastern Partnership Initiative Elena Korosteleva,Igor Merheim-Eyre,Eske Van Gils,2019-10-23 The Special Issue consolidates

new approaches to the study of the EU's role in the eastern neighbourhood and beyond informed by post structuralist traditions in international relations More specifically by revisiting the European Neighbourhood Policy's agenda from the conceptual perspective of the political and redefining the notions of othering differentiation and normalisation this volume renders a new and much needed theoretical and empirical outlook onto the policy developments and their practices By unpacking and connecting security regional institutional normative and sector thematic policy dimensions the book seeks to re politicise the agenda and re focus policy revision on understanding the fundamentals of power relations when applied to the EU external relations In light of the compounding crises external and internal one can no longer afford to simply tinker around the edges of the policy content and instruments A more radical theoretical undertaking is overdue to re shape re define and re centre the EU relations with the eastern region especially put in the context of the new EU's Global Security Strategy and the new aspirations for the 2017 European Neighbourhood summit The chapters originally published as a special issue in *East European Politics*

The African Renaissance and the Afro-Arab Spring Charles Villa-Vicencio, Erik Doxtader, Ebrahim Moosa, 2015-03-16 The hope and despair surrounding the Afro Arab Spring in North Africa has only begun to be played out in regional and global politics And the call for an African renaissance that followed the miraculous political transition in South Africa is twenty years later viewed with similar ambiguity What is clear is that current developments in Africa north and south promise something markedly different from what has prevailed at any point since the dawn of the African independence movements of the 1950s and 60s But the continent's own identity remains unresolved posing the question whether and how its multiple and divergent experiences can be understood and perhaps woven into a basis for unity Contributors to this volume explore whether or not events north of the Sahara and on the southern tip of Africa can be catalysts for change in other parts of the continent Chapters assesses the nature of political resistance revolution and transition in North and Southern Africa addressing critical factors economics culture gender theology that reveal the promises and perils of African reform Includes a foreword by former South African president Thabo Mbeki

Resistance Shane Moran, 2021-04-19 In *Resistance* Sol Plaatje and South Africa Shane Moran studies Sol Plaatje the founding secretary of what was to become the African National Congress ANC and his work within the context of colonial politics and resistance Arguing for a return to the study of one of the founders of anti racism Moran explores issues of land reform human rights and the legacy of colonialism Through an in depth analysis of Plaatje's resistance to racial domination Moran examines the nature of the struggles that continue within and beyond South Africa today In particular Moran analyzes events from the beginning of the previous century that shaped post 1994 South Africa such as the resolution of the ANC to expropriate land without compensation

The Politics of the Excluded, c. 1500-1850 Tim Harris, 2017-03-14 This collection of essays seeks to shed light on the politics of those people who are normally thought of as being excluded from the political nation in early modern England If by political nation we mean those who sat in parliament the governors of counties and towns and the enfranchised

classes in the constituencies then the excluded would be those who were neither actively involved in the process of governing nor had any say in choosing those who would rule over them the bulk of the population at this time Yet this volume shows that these people were not in fact excluded from politics Not only did the masses possess political opinions which they were capable of articulating in a public forum but they were also often active participants in the political process themselves and taken seriously in that capacity by the governmental elite The various essays deal with topics as wide ranging as riots rumours libels seditious words public opinion the structures of local government and the gendered dimensions of popular political participation and cover the period from the eve of the Reformation to the Industrial Revolution They challenge many existing assumptions concerning the nature and significance of public opinion and politics out of doors in the early modern period and show us that the people mattered in politics and thus why we as historians cannot afford to ignore them Politics was more participatory in this undemocratic age than one might have thought The contributors to this volume show that there was a lively and engaged public sphere throughout this period from Tudor times to the Georgian era

The Middling Sort of People Jonathan Barry, Christopher Brooks, 1994-10-26 This volume of essays seeks to offer a radical re evaluation of most of our preconceptions about the early modern English social order The majority of people who lived in early modern England were neither very rich nor very poor yet a disproportionate amount of historiography has been directed towards precisely these groups This book intends to define the term middle classes and treat them as active participants of history rather than as a simple by product rising and falling according to others activities

Information History in the Modern World Toni Weller, 2010-12-09 Information has a rich but under explored history The information age of the late twentieth century witnessed the emergence of a new history of information and in this timely collection of essays a team of international scholars from a variety of disciplines examines the changing understandings of information in the modern world Situating the concept of information in varying historical contexts since the eighteenth century *Information History in the Modern World* *Histories of the Information Age* Explores how this historical research can challenge our perceptions of the information age in the global twenty first century Discusses ephemera wars imagery empire identification and the transience of history in the digital era Argues that the changing uses perceptions and manifestations of information helped to shape the world we know today Authoritative and approachable this is an invaluable resource for anyone who is interested in how and why information has become a distinguishing feature of the modern world

Tudor England and its Neighbours Glenn Richardson, Susan Doran, 2017-09-16 This new study of Tudor international relations is the first in nearly thirty years Adopting a fresh approach to the subject this lively collection presents the work of a team of established and younger scholars who discuss how the Tudor monarchs made sense of the world beyond England's shores Taking account of recent developments in cultural gender and institutional history the contributors analyse the important changes and continuities in England's foreign policy during the Tudor age *Tudor England and its Neighbours* addresses key questions such as Did Henry

VII break with the past by pursuing peace with France What was the impact of the break with Rome and the introduction of Protestantism on England's relations with other countries Was war between Elizabethan England and Spain inevitable Using new evidence and reinterpreting traditional narratives these essays illuminate the complexities and the sometimes surprising subtleties of England's international relations between 1485 and 1603 **Frontiers in Question** Daniel Power, Naomi Standen, 1999-04-19 We are used to the idea that each state has clearly defined borders which cleanly separate different nationalities from one another What though were frontiers like before the evolution of the modern nation state The nine essays in this book seek to answer this question across a thousand years of Eurasian history **People Power and Political Change** April Carter, 2013-03-01 This book examines the upsurge in mass popular protest against undemocratic regimes Relating early revolutions to recent global trends and protests it examines the significance of people power to democracy Taking a comparative approach this text analyses unarmed uprisings in Iran 1977-79 Latin America and Asia in the 1980s Africa from 1989-1992 1989 in Eastern Europe and ex Soviet states after 2000 right up to the 2011 Arab Spring The author assesses the influence on people power of global politics and trends such as the growth of international governmental organizations and international law citizen networks operating across borders and emerging media like Twitter and Wikileaks Although stressing the positive potential of people power this text also examines crucial problems of repression examples of failure and potential political problems disintegration of empires and the role of power rivalries Drawing from contemporary debates about democratization and literatures on power violence and nonviolence from both academic sources and media perspectives this text builds an incisive analytical argument about the changing nature of power itself People Power and Political Change is a must read for students and scholars of democratic theory international politics and current affairs **Conscience, Dissent and Reform in Soviet Russia** Philip Boobbyer, 2008-08-05 Embracing the political intellectual social and cultural history of Soviet Russia this book provides a useful perspective of Putin's Russia Focusing on the ethics in Soviet Russia it explores the history of moral thinking amongst dissidents and examines the ethical assumptions of the perestroika era **Warfare in the Western World, 1882-1975** Jeremy Black, 2014-12-18 In this companion volume to Western Warfare 1775-1882 Jeremy Black takes his analysis of modern warfare into the twentieth century As before a distinctive feature of the author's approach is the coverage of both land and naval warfare as well as conflict within the West and between Western and non Western powers Beginning with the British conquest of Egypt in 1882 this book goes on to examine the Spanish American War of 1898 the Boer War and the Balkan conflicts leading to world war in 1914 A revisionist account of the First World War is followed by a discussion of Western expansionism in the period to 1936 Chapters on the interwar years and the Second World War lead on to a discussion of the retreat from empire and the advent of Cold War The narrative closes with the end of the Vietnam War in 1975 and a discussion of the limitations of Western military technique doctrine and technology Throughout the themes of military change and modernization are

brought into sharp focus and the revolutionary characteristics of the machination of war in this period are questioned Jeremy Black offers a new and challenging interpretation of modern warfare that will be required reading not only for students of military history but for all those interested in the impact of war in the making of the modern world **AntiFascism and Memory in East Germany** Josie McLellan, 2004-10-07 *AntiFascism and Memory in East Germany* is a book about remembering and about forgetting about war and about the peace which eventually followed In the unlikely setting of the German Democratic Republic GDR the Spanish Civil War became the subject of a debate which both predated and outlasted the Cold War involving historians veterans politicians censors artists writers and Church activists Examining these multiple memories and interpretations of Spain casts new and unexpected light on the legacy of the Spanish Civil War and the relationship between history and memory under state socialism The ruling Socialist Unity Party made full use of the antifascist legacy as legitimation for a non democratic state But despite dogged attempts at control and censorship the state was unable to silence competing voices All over East Germany International Brigade veterans preserved their version of events in letters to each other in communications with the party in discussions with friends and family around the kitchen table and in memoirs written for the desk drawer For younger East Germans the war retained an undeniably romantic aura From their perspective Spain was a far away land to which they were forbidden to travel the stuff of camp fire singalongs and fantasies of adventure This book dissects the relationship between state sponsored history the lobbying of veterans cultural interpretations of war and the memory traces left behind by marginalised or politically oppositional groups and individuals It is a cultural history of memory under state socialism a social history of veteran groups and their relationship with the state and a political history of communist culture Above all it is the story of how post war Europeans came to terms with the heavy burden of their pre war past **Russia Against the Rest** Richard Sakwa, 2017-10-12 In this book Richard Sakwa provides a new analysis of the end of the Cold War and the subsequent failure to create a comprehensive and inclusive peace order in Europe The end of the Cold War did not create a sustainable peace system Instead for a quarter of a century a cold peace reflected the tension between cooperative and competitive behaviour None of the fundamental problems of European security were resolved and tensions accumulated In 2014 the crisis exploded in the form of conflict in Ukraine provoking what some call a new Cold War Russia against the Rest challenges the view that this is a replay of the old conflict explaining how the tensions between Russia and the Atlantic community reflect a global realignment of the international system Sakwa provides a balanced and carefully researched analysis of the trajectory of European and global politics since the late 1980s **Routledge Handbook of the Arab Spring** Larbi Sadiki, 2014-12-17 The self immolation of Mohammed Bouazizi in Tunisia in December 2010 heralded the arrival of the Arab Spring a startling yet not unprecedented era of profound social and political upheaval The meme of the Arab Spring is characterised by bottom up change or the lack thereof and its effects are still unfurling today The Routledge Handbook of the Arab Spring seeks to provide a departure point for ongoing discussion of a fluid phenomenon on a plethora

of topics including Contexts and contests of democratisation The sweep of the Arab Spring Egypt Women and the Arab Spring Agents of change and the technology of protest Impact of the Arab Spring in the wider Middle East and further afield Collating a wide array of viewpoints specialisms biases and degrees of proximity and distance from events that shook the Arab world to its core the Handbook is written with the reader in mind to provide students practitioners diplomats policy makers and lay readers with contextualization and knowledge and to set the stage for further discussion of the Arab Spring

Breaking Boundaries Agnes Horvath, Bjørn Thomassen, Harald Wydra, 2015-05-01 Liminality has the potential to be a leading paradigm for understanding transformation in a globalizing world As a fundamental human experience liminality transmits cultural practices codes rituals and meanings in situations that fall between defined structures and have uncertain outcomes Based on case studies of some of the most important crises in history society and politics this volume explores the methodological range and applicability of the concept to a variety of concrete social and political problems Bibliographie Internationale de Science Politique, 2002-12 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences
