Marx's Scientific Dialectics Paul Paolucci, 2007 This book examines both problems in traditional readings of Marx's texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx's continuing methodological relevance

Marx, Marxism and the Spiritual Anjan Chakrabarti, Anup Dhar, Serap A. Kayatekin, 2020-09-10 While Marxian theory has produced a sound and rigorous critique of capitalism has it faltered in its own practice of social transformation Has it faltered because of the Marxian insistence on the hyper secularization of political cultures The history of religions with the exception of some spiritual traditions has not been any less heartless and soulless This book sets up a much needed dialogue between a rethought Marxian praxis of the political and a rethought experience of spirituality Such rethinking within Marxism and spirituality and a resetting of their lost relationship is perhaps the only hope for a non violent future of both the Marxian reconstruction of the self and the social as also faith based life practices Building on past work in critical theory this book offers a new take on the relationship between a rethought Marxism and a rethought spirituality rethought in the life philosophy and works of Christian thinkers anti Christian thinkers Marxian thinkers those critical of Marxist Statecraft Dalit neo Buddhist thinkers thinkers drawing from Judaism as well as thinkers drawing critically from Christianity Contrary to popular belief this book does not see spirituality as a derivative of only religion This book also sees spirituality as what Marx designated the sigh of the oppressed against both social and religious orthodoxy In that sense spirituality is not just a displaced form of religion it is a displaced form of

the political too This book therefore sets up the much needed dialogue between the Marxian political and the spiritual traditions The chapters in this book were originally published in *Rethinking Marxism A Journal of Economics Culture and Society*

Confronting Capitalism in the 21st Century Marc Silver,2019-04-23 This book analyzes key aspects of Marx's Capital with an eye towards its relevance for an understanding of issues confronting us in the 21st Century The contributions to this volume suggest that while aspects of Marx's original analysis must be adjusted to take into account changes that have occurred since its initial publication in 1867 his overall perspective remains necessary for understanding the nature of crises in 21st century Part I emphasizes the central concepts Marx employed in Capital including exploitation capital accumulation commodity fetishism and his use of dialectics as a method for baring the underlying relations that define capitalism Parts II and III extend that focus by addressing the concept of value fictitious capital credit and financialization Parts IV and V offer analyses of several concrete manifestations of contemporary crises from national contexts Europe Latin America China and the United States The volume argues that we have to combat the imperatives of capitalism to move towards a more humane and egalitarian future

Metromarxism Andrew Merrifield,2013-04-15 Metromarxism discusses Marxism's relationship with the city from the 1850s to the present by way of biographical chapters on figures from the Marxist tradition including Marx Walter Benjamin Guy Debord and David Harvey Each chapter combines interesting biographical anecdotes with an accessible analysis of each individual's contribution to an always transforming Marxist theory of the city He suggests that the interplay between the city as center of economic and social life and its potential for progressive change generated a major corpus of work That work has been key in advancing progressive political and social transformations

Labour Managed Firms and Post-Capitalism Bruno Jossa,2016-11-25 This book illustrates and discusses the major points of the economic theory of producer cooperatives its evolution since the 1950s and links with Marxian theory Most importantly this book demonstrates that a system of producer cooperatives offers a wealth of advantages compared to capitalism There is general agreement that the main benefit of this form of economic democracy is that people allowed to freely pursue their interests are happier than those acting on somebody else's instruction The author argues that a system of democratic firms would eradicate classical high wage unemployment and

scale down both Keynesian and structural unemployment levels

Critical Strategies for Social Research William K. Carroll, 2004 Edited by Canadian sociologist William K Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences *Critical Strategies for Social Research* explores ways in which several key research strategies bring an emancipatory dimension to social analysis The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality Carroll considers five influential and productive strategies of inquiry Dialectical Social Analysis Institutional Ethnography Participatory Action Research Critical Discourse Analysis Social Inquiry as Communicative Reason Producer Cooperatives as a New Mode of Production Bruno Jossa, 2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and poor However since the appearance of Benjamin Ward s seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav Vanek s definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre existing relation between capital and labour Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would constitute a form of market socialism Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future

International Encyclopedia of Economic Sociology Jens Beckert, Milan Zafirovski, 2005-10-27 The International Encyclopedia of Economic Sociology is the first encyclopedia in the field and a timely response to the surge of interest in economic sociology over the last 30 years Economic Sociology deals with the multiple and complex relations between economy and society In particular it focuses on the impact of social political and culture

A New Model of Socialism Bruno Jossa, 2018-04-27 Economic democracy is essential for creating a truly democratic political sphere This engaging book uses Marxist theory to hypothesise that capitalism is not a democratic system and that a modern socialist system of producer cooperatives and democratically managed enterprises is urgently needed *A New Model of Socialism* focuses on the current crisis of the political Left a result of the collapse of the Soviet model of society and the decline of statism and kingship Bruno Jossa expands on existing theories to explore Marx s notions on economic democracy in a modern setting He advocates a move away from the centralised planning form of economic socialism towards

a self management system for firms that does not prioritise the interests of one class over another in order to achieve greater economic democracy It is argued that the establishment of such a system of democratic firms is the precondition for reducing intervention in the economy thus enabling the State to perform its ultimate function of serving the public interest This timely book is ideal for advanced scholars of Marxist radical and heterodox economic theory as well as academics with an interest in the rise of socialism in our modern world Indeed it will also be of value to all those seeking a viable and practical alternative to existing capitalist and socialist thinking *Re-Inventing Western Civilisation* Niklas Olsen,Hagen

Schulz-Forberg,2014-08-20 The volume shows that neoliberalism concerns a tradition carried by a network of people who understood themselves as liberals and at times as neoliberals and who sought to create societies based on individual freedom and a free market economy It also shows that neoliberalism emerged as a transnational and multilingual phenomenon and that it cannot be reduced to one doctrine or practice The book will enrich the reader s knowledge of the political ideological landscapes and developments in various European regions and countries in addition to transforming the overall picture of European neo liberalisms in the twentieth century **Routledge Encyclopedia of International Political Economy:**

Entries A-F R. J. Barry Jones,2001 This important new work is the first comprehensive reference to the rapidly developing field of international political economy IPE Featuring over 1200 A Z entries the coverage encompasses the full range of issues concepts and institutions associated with IPE in its various forms Comprehensively cross referenced and indexed each entry provides suggestions for further reading along with guides to more specialized sources Selected entries include African Development Bank benign neglect Black Monday casino capitalism debt management efficiency floating exchange rates General Agreement on Tariffs and Trade GATT information society economy Organization of Petroleum Exporting Countries OPEC Microsoft multinational corporations definitions NATO patents rent seeking Schellin Thomas tax havens trusts Value Added Tax VAT zero sum games and many more **Seeing Through the System** Gus Bagakis,2013-06 Most people think

of class as a ranking system the more you have the higher your class status In contrast to this view in this new study author Gus Bagakis demonstrates that class is a tool that explains how the capitalist system works and why the class struggle is invisible Capitalism was and is a developing system in which the working class is turned into a commodity selling its labor power to the capitalist class that owns the factories businesses and corporations While capitalism claims to promote efficiency wealth and freedom it is also a system where the rich are getting richer the earth and climate are being destroyed and the poor get more and more desperate with each passing day All of this is happening because we live in a system that stunts personality and corrupts human relations by pitting people against one another for economic gain Through class analysis Bagakis explains that we must take off the filters that we ve been indoctrinated with so that we can see how personal social and international problems develop Primary among these false filters is the idea that we are all middle class and so there are no class conflicts in our society Seeing through the System seeks to help students workers social activists

and those interested in understanding the reasons behind many of the problems in the world today You can come to understand how our society was put together how it works and how it can be transformed

Hegel's Dialectical Political Economy Paul Diesing, 2019-03-01 This book demonstrates how Hegel's dialectic can be used in empirical research and shows how one can do dialectical research in economics It also shows how one can use dialectical thinking to interpret some personal or social or political problem and devise a possible solution

Global

Capitalism and Climate Change Hans A. Baer, 2012-06-28 Many progressive scholars particularly in the social sciences have increasingly come to acknowledge that anthropogenic climate change constitutes yet another contradiction of global capitalism This book constitutes an effort to develop a critical social science of climate change one that posits its roots in global capitalism with its emphasis on profit making a treadmill of production and consumption heavy reliance on fossil fuels and commitment to ongoing economic expansion It explores the systemic changes necessary to create a more socially just

and sustainable world system that would possibly start to move humanity toward a safer climate and discusses the role of a burgeoning climate movement in this effort
