**Egalitarian Dynamics** Bruce Kapferer, Marina Gold, 2024-07-01 Liminality the state of being betwixt and between is one of anthropology s most influential concepts This volume reconsiders Victor Turner s innovative extension of Arnold Van Gennep s concept of liminality from within the Manchester tradition of Social Anthropology established by Max

Gluckman Turner's work was grounded in ethnography and engaged with philosophical perspectives in varied socio historical contexts extending well beyond the confines of the anthropology that initially inspired much of his work. Liminality has therefore become a concept with broad interdisciplinary reach. Engaging with topical issues across the globe from neuroscience to open access publishing and refugee experiences in Europe, this volume launches Turner's fundamental work into the future.

**Markets, Morals and Development** Wahiduddin Mahmud, 2021-10-12. This book presents or rather re-presents the intricacies of a developing economy in the light of recent theoretical developments in economics while also providing a fresh perspective on the perceived inadequacies of the discipline in addressing the discontents of the contemporary global economic order. The book argues that there is scope for economics to be a more humane discipline and more relevant to contemporary economic problems by embracing new ideas including those from other disciplines. It attempts to show how economic concepts and theories can be contextualised to help better understand real life economic phenomena, how to rethink the ways in which the market economy can address the moral issues of human wellbeing and social justice, and overall how the study of economics and public discourses on economic issues can be made more engaging as well as more relevant to the problems of developing countries. Based on public lectures given by the author in Dhaka and using illustrations from Bangladesh, India and other countries, the book offers an authoritative understanding of diverse economic realities by taking a fresh look at the familiar. Comprehensive and accessible, the book will be of interest to students and researchers of economics, development economics, and policy, sociology and business studies as well as to journalists, public intellectuals and policymakers in developing countries.

**Management, Society, and the Informal Economy** Paul Godfrey, 2015-07-03. Informal economic activity, defined as exchanges made by individuals and organizations in extra-legal or non-bureaucratic contexts, represents a significant and growing share of global economic activity. The informal economy brings to mind images of street vendors in markets and bazaars throughout the developing world; indeed, informal economic activity ranges from 25-75% of economic activity depending on the country under study. Informal activity also includes under-the-table or off-the-books business in the developed world, such as informal labor arrangements in child care, construction, or home cleaning in the United States or Western Europe. What many fail to realize, however, is the increasing presence of informal economic activity in the developed world's largest corporations and most innovative entrepreneurial ventures, such as technology development work in Silicon Valley, open source software agreements, or employment arrangements between technology stars and firms. *Management, Society, and the Informal Economy* brings to light the role of the informal economy in the 21st century. The book does more than illuminate; however, it also calls for increased focus on the informal economy by management scholars. Each chapter contains a call to action as well as practical and methodological advice for scholarship on the topic. *Management, Society, and the Informal Economy* contains a multi-faceted set of arguments, descriptions, and illustrations designed to convince management scholars that they should attend to the informal economy and view it as a

serious and rigorous context for theorizing empirical research and even practical advocacy     The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system     **Microeconomics in Context**

Goodwin, Designed for one semester use this innovative principles level text takes a broad contextual approach to economics including serious consideration of ecological feminist and social concerns while still including coverage of the standard microeconomic concepts and models Unlike most microeconomics textbooks which focus exclusively on markets and efficiency this book starts with the question of human well being and then examines how economic activities can contribute to or detract from well being It addresses such critical concerns as ecological sustainability distributional equality the quality of employment and the adequacy of living standards Like its companion volume Macroeconomics in Context this text includes discussions of historical institutional political and social factors that encourage students to engage with the subject matter An Instructor s Resource Manual Test Bank and Student Study Guide are available on the authors website for instructors who adopt the text     **The Oxford Handbook of Professional Economic Ethics** George F. DeMartino, Deirdre N.

McCloskey, 2016-01-04 For over a century the economics profession has extended its reach to encompass policy formation and institutional design while largely ignoring the ethical challenges that attend the profession s influence over the lives of others Economists have proven to be disinterested in ethics Embracing emotivism they often treat ethics a matter of mere preference Moreover economists tend to be hostile to professional economic ethics which they incorrectly equate with a code of conduct that would be at best ineffectual and at worst disruptive to good economic practice But good ethical reasoning is not reducible to mere tastes and professional ethics is not reducible to a code Instead professional economic ethics refers to a new field of investigation a tradition of sustained and lively inquiry into the irrepressible ethical entailments of academic and applied economic practice The Oxford Handbook of Professional Economic Ethics explores a wide range of questions related to the nature of ethical economic practice and the content of professional economic ethics It explores current thinking that has emerged in these areas while widening substantially the terrain of economic ethics There has never been a volume that poses so directly and intensively the question of the need for and content of professional ethics for economics

The Handbook incorporates the work of leading scholars and practitioners including academic economists from various theoretical traditions applied economists beyond academia whose work has direct and immense social impact and philosophers professional ethicists and others whose work has addressed the nature of professionalism and its implications for ethical practice     Encyclopedia Of The Global Economy A Guide For Students And Researchers David E. O connor,2006

The Oxford Handbook of Computational Economics and Finance Shu-Heng Chen,Mak Kaboudan,Ye-Rong Du,2018 The Oxford Handbook of Computational Economics and Finance provides a survey of both the foundations of and recent advances in the frontiers of analysis and action It is both historically and interdisciplinarily rich and also tightly connected to the rise of digital society It begins with the conventional view of computational economics including recent algorithmic development in computing rational expectations volatility and general equilibrium It then moves from traditional computing in economics and finance to recent developments in natural computing including applications of nature inspired intelligence genetic programming swarm intelligence and fuzzy logic Also examined are recent developments of network and agent based computing in economics How these approaches are applied is examined in chapters on such subjects as trading robots and automated markets The last part deals with the epistemology of simulation in its trinity form with the integration of simulation computation and dynamics Distinctive is the focus on natural computationalism and the examination of the implications of intelligent machines for the future of computational economics and finance Not merely individual robots but whole integrated systems are extending their immigration to the world of Homo sapiens or symbiogenesis

**Agent-Mediated Electronic Commerce and Trading Agent Design and Analysis** Wolfgang Ketter,Han La Poutré,Norman M. Sadeh,Onn Shehory,William Walsh,2010-08-18 This volume contains 13 thoroughly refereed and revised papers detailing recent advances in research on trading agents negotiating agents dynamic pricing and auctions They were originally presented at the 10th International Workshop on Agent Mediated Electronic Commerce AMEC 2008 collocated with AAMAS 2008 in Estoril Portugal or the 6th Workshop on Trading Agent Design and Analysis TADA 2008 collocated with AAAI 2008 in Chicago IL USA The papers originating from AMEC 2008 address agent modeling and multi agent problems in the context of e negotiations and e commerce The TADA papers stem from the effort to design scenarios where trading agents and market designers can be pitched against each other in applications from supply chain management and procurement They are all characterized by interdisciplinary research combining fields such as artificial intelligence distributed systems game theory and economics     **Risk and Regulation of Islamic Banking** Mervyn K Lewis,Mohamed

Ariff,Shamsher Mohamad,2014-08-29 The expert contributors examine why an ethical foundation is important and why the system requires well thought out regulations to ensure outcomes that protect the community s well being The volume explores in detail the nature of Islamic banking prod     *Adaptive Agents and Multi-Agent Systems III. Adaptation and Multi-Agent Learning* Karl Tuyls,Ann Nowe,Zahia Guessoum,Daniel Kudenko,2008-02-08 This book contains selected and

revised papers of the European Symposium on Adaptive and Learning Agents and Multi Agent Systems ALAMAS editions 2005 2006 and 2007 held in Paris Brussels and Maastricht The goal of the ALAMAS symposia and this associated book is to increase awareness and interest in adaptation and learning for single agents and multi agent systems and encourage collaboration between machine learning experts software engineering experts mathematicians biologists and physicists and give a representative overview of current state of affairs in this area It is an inclusive forum where researchers can present recent work and discuss their newest ideas for a first time with their peers

The symposia series focuses on all aspects of adaptive and learning agents and multi agent systems with a particular emphasis on how to modify established learning techniques and or create new learning paradigms to address the many challenges presented by complex real world problems These symposia were a great success and provided a forum for the presentation of new ideas and results bearing on the conception of adaptation and learning for single agents and multi agent systems Over these three editions we received 51 submissions of which 17 were carefully selected including one invited paper of this year's invited speaker Simon Parsons This is a very competitive acceptance rate of approximately 31% which together with two review cycles has led to a high quality LNAI volume We hope that our readers will be inspired by the papers included in this volume

*Great Minds in Management* Ken G. Smith, Michael A. Hitt, 2005-09-22 In *Great Minds In Management* Ken G Smith and Michael A Hitt have brought together some of the most influential and original thinkers in management Their contributions to this volume not only outline their landmark contributions to management theory but also reflect on the process of theory development presenting their own personal accounts of the gestation of these theories The result is not only an ambitious and original panorama of the key ideas in management theory presented by their originators but also a unique collection of reflections on the process of theory development an area which to date little has been written about by those who have actually had experience of building theory In their concluding chapter Ken G Smith and Michael A Hitt draw together some common themes about the development of management theory over the last half a century and suggest some of the conclusions to be drawn about how theory comes into being
