Working with Substance Users George Allan, 2014-04-17 Social care and health professionals encounter people with drug and alcohol problems on a daily basis but many feel ill equipped to respond Although people working across different professions will approach substance users from various perspectives the knowledge and skills needed to intervene effectively are the same for all With a strong emphasis on the core skills needed for practice this up to date and accessible text provides a complete guide to working with substance users and their relatives It covers the nature of problematic use and introduces theories as to why people experience substance problems and why people change The book moves on to examine a number of effective interventions and how they can be applied including assessment and care planning pharmacological treatments and cognitive behavioural therapy Distinctively in addition to chapters on working with specific groups such as adolescents and involuntary service users it also addresses the implications of parental problems for children and explores ways of helping adults affected by a relative's substance use Supported throughout by case examples and activities to help apply theories and concepts to practice this comprehensive text equips readers with the knowledge and skills needed to work with substance users

Clinical Handbook of Adolescent Addiction Richard Rosner, 2012-11-19 Since 1960 the burden of adolescent illness has shifted from the traditional causes of disease to the more behavior related problems such as drinking smoking and drug abuse nearly half of American adolescents have used an illicit drug sometime during their life Instilling in adolescents the knowledge skills and values that foster physical and mental health will require substantial changes in the way health professionals work and the way they connect with families schools and community organizations At the same time the major textbooks on addiction medicine and addiction psychiatry devote relatively little attention to the special problems of diagnosing and treating adolescent addicts Similarly the major textbooks on general and child and adolescent psychiatry direct relatively little

attention to the issues surrounding adolescent addiction The Clinical Handbook of Adolescent Addiction is one response to the challenge of meeting the mental health needs and behavior related problems of addicted teenagers The work has been edited as an independent project by members of the American Society for Adolescent Psychiatry the oldest professional organization of psychiatrists devoted solely to the mental health care and treatment of teenagers in the USA The forensic psychiatry perspective permeates the entire book It will help to produce health providers with a deep and sensitive understanding of the developmental needs and behavior related problems of adolescents The Clinical Handbook of Adolescent Addiction is a practical tool for all those who help adolescents practitioners of family medicine general psychiatrists child adolescent psychiatrists adolescent psychiatrists addiction psychiatrists non psychiatric physicians specializing in addiction medicine forensic psychiatrists psychologists clinical social workers mental health administrators Court Probation Parole Correctional health workers The book is organized in a user friendly format so that readers can easily locate the chapters that provide the information that is required In some instances topics of special importance deliberately have been addressed in more than one chapter to illuminate the topics from a variety of vantage points One aim of the editors is to move the topic from being a specialist area to a generalist one by providing tools for generalist to use
