The Relationship of Organizational Trust and Job Satisfaction Phuong Callaway, 2007 The issues of trust and job satisfaction have taken on a greater strategic importance in organizations since the post Enron scandal Without trust or the lack of it among organizational members and between management and employees organizational communication knowledge management organizational performance and involvement may tend to close down Trust has been identified as a crucial ingredient for organizational effectiveness A linkage between trust and job satisfaction in private organizations has been established by researchers however in the U S federal government the linkage between organizational trust and job satisfaction has not yet been studied This study therefore explores the relationship between organizational trust and job satisfaction in seven selected small medium and large U S federal agencies This study indicated that there are no significant differences between males and females however significant differences in attitudes between supervisors and nonsupervisors were found regarding what good communications meant and how they interpret the question top management truly listens to employees concerns Nonsupervisors tend to disagree more frequently than supervisors The study also found that there are significant association between gender age group job location position and occupation and agency The differences in attitudes between supervisors and nonsupervisors about what would make communications seem good and what would contribute to the belief that top management listens to employees concerns lead to the conclusion that there is a disconnection among organizational members and among management and employees This disconnection may lead to mistrust job dissatisfaction and the difficulty in attracting and retention of human talents

Market, Class, and Employment Patrick McGovern, Stephen Hill, Colin Mills, Michael White, 2007-12-06 Much of the received wisdom about the world of work emphasizes the marketization of the employment relationship the decline of class based forms of inequality

and the individualization of employment relations Non standard forms of employment the delayering of organizational hierarchies and the use of individual performance based payment systems are all held up as examples of a new neo liberal order in which employers and employees no longer feel a sense of obligation to each other Drawing on a range of employee and employer surveys including the authors own Working in Britain 2000 survey this ambitious study presents a comprehensive examination of the conditions attitudes and experiences of British employees from the mid 1980s to the early years of this century The authors analyses provides a compelling critique of the received wisdom while also providing an original alternative account of recent developments in work and labour markets Along the way the book covers such topical issues as the changing nature of trade union membership the consequences of Britain s long hours culture and the apparent inability of women to ask for pay rises Significantly the authors seek to reposition debates about the future of work by restoring the concepts of contracts and social class to the analysis of the employment relationship Based on the ESRC funded Future of Work research programme this book is destined to shape our understanding of employment in Britain for the foreseeable future
