Relativity A Point Of View A Point Of View Poems:

Relativity Kelly Cherry, 1977 **Yeats, Eliot, Pound and the Politics of Poetry** Cairns Craig, 2015-12-22 It has long been recognised that there is an apparently paradoxical relationship between the revolutionary poetic style developed by Yeats Eliot and Pound in the period during and after the First World War and the reactionary politics with which they were associated in the 1920s and 1930s Concentrating on their writings in the period up to the 1930s this study first published in 1982 helps to resolve the paradox and also provides a much needed reappraisal of the factors influencing their poetic and political development The work of these poets has usually been seen as deriving from the tradition of continental symbolist poetics Yeats Eliot Pound and the Politics of Poetry will be of interest to students of literature *This Ghostly Poetry* Daniel Aguirre-Otezia, 2020-04-02 The Spanish Civil War was idealized as a poet's war The thousands of poems written about the conflict are memorable evidence of poetry's high cultural and political value in those historical conditions After Franco's victory and the repression that followed numerous Republican exiles relied on the symbolic agency of poetry to uphold a sense of national identity Exilic poems are often read as claim making narratives that fit national literary history This Ghostly Poetry critiques this conventional understanding of literary history by arguing that exilic poems invite readers to seek continuity with a traumatic past just as they prevent their narrative articulation The book uses the figure of the ghost to address temporal challenges to historical continuity brought about by memory tracing the discordant disruptive ways in which memory is interwoven with history in poems written in exile Taking a novel approach to cultural memory This Ghostly Poetry engages with literature history and politics while exploring issues of voice time representation and disciplinarity

The Measured Word Kurt Brown, 2001 Though the interests of science and art frequently seem to inhabit opposite poles The Measured Word assembles a brilliant anthology of twelve essays that illumine the historic and newly emerging relationships between the poetic and scientific imaginations Assembling the writings of leading contemporary poets essayists and thinkers Kurt Brown highlights ways in which poets use scientific discoveries and mathematical ideas to their artistic advantage and offers insight on the recently apparent integration of technology and other discoveries into the postmodernist poetry Here are meditations on the similarities and differences between the poetic and scientific imagination on the poetic use of fractals on hypertext on the changing shape of poetry in the scientific age Commentary by Czech poet and immunologist Miroslav Holub Paul Lake Alison Hawthorne Deming Alice Fulton Forrest Gander and Stephanie Strickland among others presents a diverse selection of opinions These viewpoints are complemented by many careful innovative readings of individual poems informed by the sciences The writings in this collection not only celebrate the advent of a new age of discovery but also identify the need for a revision of the western thinking that separates the mind and the heart replacing division with the reciprocity of mutual communication *The Poetry of Physics and the Physics of Poetry* Robert K. Logan, 2010 This is a textbook for a survey course in physics taught without mathematics that also takes into account the

social impact and influences from the arts and society It combines physics literature history and philosophy from the dawn of human life to the 21st century It will also be of interest to the general reader **On the Nature of Poetry** Kenneth Verity, 2007-06-01 The entire history of Western poetry is surveyed in this study from the ancient world the Middle Ages the Renaissance and the modern period Two hundred poems extracts are included and 10 poets are covered in depth with critical appraisals of their lives and work Problems of translation in poetry are carefully considered and the book provides a working definition of poetry calling it a form of expression human beings turn to when they need to say something important in a memorable way **Poet's Work, Poet's Play** Daniel Tobin, Pimone Triplett, 2008 An indispensable resource for anyone interested in the art and craft of contemporary poetry **Browning, Victorian Poetics and the Romantic Legacy** Dr Britta Martens, 2013-05-28 Taking an original approach to Robert Browning's poetics Britta Martens focuses on a corpus of relatively neglected poems in Browning's own voice in which he reflects on his poetry his self conceptualization and his place in the poetic tradition She analyzes his work in relation to Romanticism Victorian reactions to the Romantic legacy and wider nineteenth century changes in poetic taste to argue that in these poems as in his more frequently studied dramatic monologues Browning deploys varied dramatic methods of self representation often critically and ironically exposing the biases and limitations of the seemingly authoritative speaker Browning The poems thus become devices for Browning's detached evaluation of his own and of others poetics an evaluation never fully explicit but presented with elusive economy for the astute reader to interpret The confrontation between the personal authorial voice and the dramatic voice in these poems provides revealing insights into the poet's highly self conscious conflicted and sustained engagement with the Romantic tradition and the diversely challenging reader expectations that he faces in a post Romantic age As the Victorian most rigorous in his rejection of Romantic self expression Browning is a key transitional figure between the sharply antagonistic periods of Romanticism and Modernism He is also as Martens persuasively demonstrates a poet of complex contradictions and an illuminating case study for addressing the perennial issues of voice authorial authority and self reference

Resistance to Science in Contemporary American Poetry Bryan Walpert, 2011-09-26 This book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them Walpert argues that contemporary poetry offers a palimpsest of resistance using as case studies the poets Alison Hawthorne Deming Pattiann Rogers Albert Goldbarth and Joan Retallack to trace the recapitulation of romantic arguments inherited from Keats Shelly and Coleridge which in turn were produced in part in response to Newtonian physics modernist arguments inherited from Eliot and Pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e.g Barthes Derrida Foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science Some of these poems reveal the discursive ideologies of scientific language reveal in other words the

performativity of scientific language In doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation Reading Retallack alongside science studies scholar Karen Barad the book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science *Nineteenth-Century Poetry and the Physical Sciences* Gregory Tate,2020-06-17 Poetical Matter examines the two way exchange of language and methods between nineteenth century poetry and the physical sciences The book argues that poets such as William Wordsworth Mathilde Blind and Thomas Hardy identified poetry as an experimental investigation of nature s materiality It also explores how science writers such as Humphry Davy Mary Somerville and John Tyndall used poetry to formulate their theories to bestow cultural legitimacy on the emerging disciplines of chemistry and physics and to communicate technical knowledge to non specialist audiences The book s chapters show how poets and science writers relied on a set of shared terms form experiment rhythm sound measure and how the meaning of those terms was debated and reimagined in a range of different texts A stimulating analysis of nineteenth century poetry and physics In this groundbreaking study Tate turns to sound to tease out fascinating continuities across scientific inquiry and verse Reflecting that the processes of the universe were themselves rhythmic he shows that a wide range of poets and scientists were thinking through undulatory motion as a space where the material and the immaterial met The motion of waves Tate demonstrates was the exemplary form in the physical sciences Sound waves light energy and poetic meter were each characterized by a process of undulation that could be understood as both a physical and a formal property Drawing on work in new materialism and new formalism Tate illuminates a nineteenth century preoccupation with dynamic patterning that characterizes the undulatory as in John Herschel s words not things but forms Anna Henchman Associate Professor of English at Boston University USA This impressive study consolidates and considerably advances the field of physics and poetry studies Moving easily and authoritatively between canonical and scientist poets *Nineteenth Century Poetry and the Physical Sciences* draws scientific thought and poetic form into telling relation disclosing how they were understood variously across the nineteenth century as both comparable and competing ways of knowing the physical world Clearly written and beautifully structured *Nineteenth Century Poetry and the Physical Sciences* is both scholarly and accessible a fascinating and indispensable contribution to its field Daniel Brown Professor of English at the University of Southampton UK Essential reading for Victorianists Tate s study of nineteenth century poetry and science reconfigures debate by insisting on the equivalence of accounts of empirical fact and speculative theory rather than their antagonism The undulatory rhythms of the universe and of poetry the language of science and of verse come into new relations Tate brilliantly re reads Coleridge Tennyson Mathilde Blind and Hardy through their explorations of matter and ontological reality He also addresses contemporary theory from Latour to Jane Bennett Isobel Armstrong Emeritus Professor of English at Birkbeck University of London UK *A Gathering of Poets* Maggie Anderson,Alex Gildzen,Raymond A.

Literary History: Towards a Global Perspective Anders Pettersson, Gunilla Lindberg-Wada, Margareta Petersson, Stefan Helgesson, 2011-12-22 Literary History Towards a Global Perspective is a research project funded by the Swedish Research Council Vetenskapsrådet Initiated in 1996 and launched in 1999 it aims at finding suitable methods and approaches for studying and analysing literature globally emphasizing the comparative and intercultural aspect Even though we nowadays have fast and easy access to any kind of information on literature and literary history we encounter more than ever the difficulty of finding a credible overall perspective on world literary history Until today literary cultures and traditions have usually been studied separately each field using its own principles and methods Even the conceptual basis itself varies from section to section and the genre concepts employed are not mutually compatible As a consequence it is very difficult if not impossible for the interested layperson as well as for the professional student to gain a clear and fair perspective both on the literary traditions of other peoples and on one's own traditions The project can be considered as a contribution to gradually removing this problem and helping to gain a better understanding of literature and literary history by means of a concerted empirical research and deeper conceptual reflection The contributions to the four volumes are written in English by specialists from a large number of disciplines primarily from the fields of comparative literature Oriental studies and African studies in Sweden All of the literary texts discussed in the articles are in the original language Each one of the four volumes is devoted to a special research topic

on the papers presented at the Crawford symposium Grouped by subject matter in a roughly chronological order these essays reflect research on topics spanning two millennia of Chinese history The result is an interdisciplinary exploration of the complex set of relationships between words and images by art historians literary historians and scholars of calligraphy Their findings provide us with a new level of understanding of this rich and complicated subject and suggest further directions for the study of Chinese art history The essays are accompanied by 255 illustrations some of which reproduce works rarely published Chinese characters have been provided throughout the text for artists names terms titles of works of art and literature and important historical figures as well as for excerpts of selected poetry and prose A chronology also containing Chinese characters and an extensive index contribute to making this book illuminating and invaluable to both the specialist and the layman
