Manual of Dwarf Conifers Humphrey James Welch, 1979 **The Conifer Manual** Humphrey J. Welch, 2012-12-06

The research that has culminated in the publication being introduced worldwide save by one or two of this Manual was in the first place undertaken private conifer enthusiasts My own efforts at 1 for a new edition of the book Manual of Cultivated recording data at Devizes made possible the Conifers by P den Ouden and Dr B K Boom appearance in 1979 of a larger book Manual of both now deceased published in 1965 Dwarf Conifers That book was clearly in effect The claim in that book to have included every a partial up dating of the den Ouden and Boom cultivar published since 1753 was not entirely book under revision so the decision was made realised and the stated objective i e that the book to produce an entirely new work with the present should serve as a basis for the international register title and with the following objectives that was even at that date under consideration required a lot of space to be devoted to quite 1 To bring the taxonomy into line with current archaic information practice Each of the authors of the Manual of Cultivated 2 To extend the species descriptions and make them by the use of side headings more easy Conifers was well qualified for the task P den Ouden had been systematically collecting conifer to use 3 To supply some form of keys *Manual of Cultivated Conifers* P. den Ouden, B.K. Boom, 2012-12-06

As an introduction to the present book I would like to explain how it was that I a commercial nurseryman became so keenly interested in Conifers and their nomenclature In August 1924 the Dutch Dendrological Society was founded and at the same time a Committee for Nomenclature of woody plants was set up and I served on this committee as one of the members Our first activity was to bring the catalogues of the various leading nurserymen in the Netherlands into line with the International Rules of Botanical Nomenclature and also to check their nursery stock Formerly these catalogues had shown a rather confused nomenclature nurserymen having usually made use of a variety of inconsistent books as guides in compiling their catalogues In the course of the work a close co operation between scientific and practical workers developed Although I had also fully contributed to the correct naming of hardy shrubs and perennials I was most interested in Conifers I had tried out several species had grown a wide choice of garden forms and selected types of particular merit for propagation My special love for Conifers lead to the publication of my Name list of Conifers 1937 which was adopted as a standard for varietal names at the International Horticultural Congress in Berlin 1938 Later I prepared my book Coniferen Ephedra en Ginkgo in the Dutch language 1949 compiling the Conifers cultivated or known to be grown in the Netherlands and Belgium at that time Native and Cultivated Conifers of Northeastern North America Edward A. Cope, 1986 This useful manual provides a means for easy identification of the native and cultivated conifers of northeastern North America The territory covered is roughly eastern Canada and the northeastern fourth of the United States from Maine south to the southern border of Pennsylvania west to Kansas and north to North Dakota Because it includes so many cultivated species the book treats the great majority of conifers found in the western United States and Europe as well Twenty seven genera
